The Business of America is Lobbying Lee Drutman, 2015 Corporate lobbyists are everywhere in Washington. Of the 100 organizations that spend the most on lobbying, 95 represent business. The largest companies now have upwards of 100 lobbyists representing them. How did American businesses become so invested in politics? And what does all their money buy? Drawing on extensive data and original interviews with corporate lobbyists, *The Business of America is Lobbying* provides a fascinating and detailed picture of what corporations do in Washington, why they do it, and why it matters. Prior to the 1970s, very few corporations had Washington offices. But a wave of new government regulations and declining economic conditions mobilized business leaders. Companies developed new political capacities, and managers soon began to see public policy as an opportunity, not just a threat. Ever since, corporate lobbying has become increasingly more pervasive, more proactive, and more particularistic. Lee Drutman argues that lobbyists drove this development, helping managers to see why politics mattered, and how proactive and aggressive engagement could help companies' bottom lines. All this lobbying doesn't guarantee influence. Politics is a messy and unpredictable bazaar, and it is more competitive than ever. But the growth of lobbying has driven several important changes that make business more powerful. The status quo is harder to dislodge; policy is more complex; and, as Congress increasingly becomes a farm league for K Street, more and more of Washington's policy expertise now resides in the private sector. These and other changes increasingly raise the costs of effective lobbying to a level only businesses can typically afford. Lively and engaging, rigorous and nuanced, *The Business of America is Lobbying* will change how we think about lobbying-and how we might reform it.

Quiet Politics and Business Power Pepper D. Culpepper, 2010-11-22 Does democracy control business, or does business control democracy? This study of how companies are bought and sold in four countries - France, Germany, Japan and the Netherlands - explores this fundamental question. It does so by examining variation in the rules of corporate control - specifically, whether hostile takeovers are allowed. Takeovers have high political stakes: they result in corporate reorganizations, layoffs and the unraveling of compromises between workers and managers. But the public rarely pays attention to issues of corporate control. As a result, political parties and legislatures are largely absent from this domain. Instead, organized managers get to make the rules, quietly drawing on their superior lobbying capacity and the deference of legislators. These tools, not campaign donations, are the true founts of managerial political influence.

Carjacked: The Culture of the Automobile and Its Effect on Our Lives Catherine Lutz, Anne Lutz Fernandez, 2010-01-05 *Carjacked* is an in-depth look at our obsession with cars. While the automobile's contribution to global warming and the effects of volatile gas prices is widely known, the problems we face every day because of our cars are much more widespread and yet much less known -- from the surprising \$14,000 that the average family pays each year for the vehicles it owns, to the increase in rates of obesity and asthma to which cars contribute, to the 40,000 deaths and 2.5 million crash injuries each and every year. *Carjacked* details the complex impact of the automobile on modern society and shows us how to develop a healthier, cheaper, and greener relationship with cars.

The Learning Economy and the Economics of Hope Bengt-Åke Lundvall, 2016-12-01
'The Learning Economy and the Economics of Hope' brings together contributions by an expert on policies, management and economics of innovation and knowledge. It offers original insights in processes of innovation and learning and it draws implications for economic theory and public policy. It introduces the reader to important concepts such as innovation systems and the learning economy. It throws a new light on economic development and opens up for a new kind of economics – the economics of hope. It offers a fresh perspective on many of the most important global challenges of today showing how full attention to the characteristics of the learning economy needs to be combined with innovation in global governance if we want to be able to handle these challenges. 'The Learning Economy and the Economics of Hope' presents work published between 1985 and 1992 and introduces the core concepts innovation as an interactive process. The analysis demonstrates that new technology is developed in an interaction between individuals and organisations and that innovation would not thrive in an economy similar to textbook models of pure markets and perfect competition. It also presents articles that were published between 2004 and 2010. These may be seen as further developments and evidence-based consolidation of ideas that were presented more than ten years earlier. It presents the learning economy through the perspective of the economics of knowledge. The concluding part of the book includes three papers that make use of the conceptual frameworks developed in an analysis of China's innovation system and policy, Europe's crisis and Africa's underdevelopment.

Battery Management Algorithm for Electric Vehicles Rui Xiong, 2019-09-23 This book systematically introduces readers to the core algorithms of battery management system (BMS) for electric vehicles. These algorithms cover most of the technical bottlenecks encountered in BMS applications, including battery system modeling, state of charge (SOC) and state of health (SOH) estimation, state of power (SOP) estimation, remaining useful life (RUL) prediction, heating at low temperature, and optimization of charging. The book not only presents these algorithms, but also discusses their background, as well as related experimental and hardware developments. The concise figures and program codes provided make the calculation process easy to follow and apply, while the results obtained are presented in a comparative way, allowing readers to intuitively grasp the characteristics of different algorithms. Given its scope, the book is intended for researchers, senior undergraduate and graduate students, as well as engineers in the fields of electric vehicles and energy storage.

Leadership Theory and Research Christian Harrison, 2017-11-16 This book provides a concise yet comprehensive literature review on leadership. As well as offering critical insight into leadership research, the author addresses emerging paradigms and identifies new approaches. A vital tool for leadership students and scholars, the text will enable readers to demonstrate a critical awareness of current developments both in theory and

practice of leadership and its importance in modern organizations. Both scholars and practitioners will find the engaging discussion in this book particularly useful as the author offers practical ideas for development and a much-needed unified theory on leadership.

A Life Less Ordinary John Hodge, 1997 He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them. The major motion picture from 20th Century Fox starring Ewan McGregor, Cameron Diaz and Holly Hunter hits the box office in October.

Regulation, Deregulation, Reregulation Claude Ménard, Michel Ghertman, 2009 After 25 years of industry restructuring, regulatory reform and deregulation across many industrial sectors in many countries, it is an appropriate time to take stock of the impacts of these reforms on consumers, producers and overall economic performance. This book contains the latest thinking on these issues by a distinguished international group of scholars. It is a collection of essays for our time that is well worth reading. Paul L. Joskow, Massachusetts Institute of Technology, US The most exciting development in the study of regulation in the past quarter century is research on the incentives that are created by the details of the procedures for creating and enforcing regulatory rules. This book brings together a rich collection of studies that collectively advance our understanding of the effect of regulatory governance on the performance of regulated firms, with important lessons about how to design more effective regulatory instruments and processes. Roger G. Noll, Stanford University, US Cycles of poorly-designed or weakly-enforced regulation, disappointing performance and political over-reaction are now familiar to students of regulated industries. Nourished by recent developments in the economics of incentives, including their transaction costs and property rights dimensions, and written by renowned experts in the field, *Regulation, Deregulation, Reregulation* is a must-read for all those interested in the economics and politics of regulation. A timely book, the publication of which coincides with the designing of a post-subprime regulatory framework for the financial industry. Jean Tirole, Toulouse School of Economics, France Building on Oliver Williamson's original analysis, the contributors introduce new ideas, different perspectives

and provide tools for better understanding changes in the approach to regulation, the reform of public utilities, and the complex problems of governance. They draw largely upon a transaction cost approach, highlighting the challenges faced by major economic sectors and identifying critical flaws in prevailing views on regulation. Deeply rooted in sector analysis, the book conveys a central message of new institutional economics: that theory should be continuously confronted by facts, and reformed or revolutionized accordingly. With its emphasis on the institutional embeddedness of regulatory issues and the problems generated by the benign neglect of institutional factors in the reform of major public utilities, this book will provide a wide-ranging audience with challenging views on the dynamics of regulatory approaches. Economists, political scientists, postgraduate students, researchers and policymakers with an interest in institutional economics and economic organization will find the book to be a stimulating and enlightening read.
