**Modern Construction Envelopes** Andrew Watts,2019-05-20 Modern Construction Envelopes deals with the facade and roof as an integral part of the building, allowing a holistic approach to the design of the building envelope and providing greater design freedom. The book is aimed at readers who want to extend their knowledge of wall and roof construction beyond the information given in the Modern Construction Handbook, using state-of-the-art construction principles of modern facade and roof systems. The third edition of this classic has been fully brought up to date; it contains new examples in all chapters and presents the projects in revised, new 3D drawings and in 27 AR applications that can be accessed free of charge via smartphone and tablet.

**Modern Construction Case Studies** Andrew Watts,2019-06-17 Modern Construction Case Studies focuses on the interface between the design of facades, structures and environments of 12 building projects, all developed by Newtecnic. The Author compares facade technologies, particularly in the way they interface

with structure and MEP (mechanical, electrical, plumbing services) in complex projects, to provide insights into the design process for building envelopes. Each envelope technology is described with an emphasis on one of three aspects: geometry, construction and performance. The analysis links the 12 case studies by comparing their structural and environmental performance. The aim is achieved by analyzing typical bays which are representative of each project and which illustrate the implications of using different building envelope technologies.
