Public Procurement Law Duncan Fairgrieve,François Lichère,2011-11-01 Public procurement represents more than 15 per cent of European GDP and is one of the fastest growing sectors of the European economy. Public procurement law is also developing rapidly, not least in the area of remedies for breach of procurement rules. The aim of this book is to analyse the remedy of damages in public procurement law. The European Directive of 11 December 2007 amending Council Directives 89/665/EEC and 92/13/EEC has reaffirmed the importance of damages as a tool to enforce the proper award of public contracts, but has left the exact architecture of the damages remedy in the hands of the Member States. This book offers an overview of damages liability which is inclusive, coherent and practical, covering the relevant law and jurisprudence from a number of countries across Europe and further afield. The contributors are high-profile and authoritative commentators on public procurement law, including policy-makers, judges, academics and practitioners.

Public food procurement for sustainable food systems and healthy diets – Volume 2 International Center for Tropical Agriculture,Editore da UFRGS,2021-12-23 Sustainable Public Food Procurement (PFP) represents a key game changer for food systems transformation. It can influence both food consumption and food production patterns. It can deliver multiple social, economic and environmental benefits towards sustainable food systems for healthy diets. This publication aims to contribute to the improved understanding, dissemination and use of PFP as a development tool in particular in the case of school meals programmes. In this Volume 2, researchers, policymakers and development partners can find extensive evidence of the instruments, enablers and barriers for PFP implementation. It also provides case studies with local, regional and national experiences from Africa, Asia, Europe and North and South America. Volume 1 of this publication, available at <https://doi.org/10.4060/cb7960en>, presents further analysis on how PFP can be used as a development tool and deliver multiple benefits for multiple beneficiaries. It argues that PFP can provide a market for local and smallholder farmers, promote the conservation and sustainable use of agrobiodiversity, and improve the nutrition and health of children and communities.

Enhancement of Public Real-estate Assets and Cultural Heritage Lucia Della Spina,Francesco Calabrò,2021-01-21 The management of cultural heritage and public real-estate assets is one of the most crucial challenges concerning the sustainable use of these resources, involving dynamic methods to stimulate preservation, development, renewal, and transmission to future generations of these essential assets. The contributions presented in this book provide a rich and varied panorama of research experiences and innovative tools, capable of promoting the re-use of cultural heritage in European cities and cultural landscapes, using a circular economy logic as a model of sustainable development. From this point of view, cultural capital becomes the driver of a regeneration process on the local, urban, and metropolitan scales, in which the transversal interconnections between the production cycles of the adaptive re-use of the available heritage, both in the adaptation and in the management phase, configure a circular process of multidimensional production of value. Therefore, future territorial redevelopment projects can base their idea strength on an open system of appropriately selected social attractors, whose enhancement and use have the objective of triggering widespread regeneration effects on the whole territory of influence, receiving inducement and

resources to progress.

Le controversie sui contratti pubblici De Paolis Maurizio, 2010-12-09 Il volume approfondisce tutte le innovazioni introdotte nel Codice dei contratti pubblici a seguito del recepimento della Direttiva 2007/66/CE attraverso il d.lgs. 20 marzo 2010, n. 53. In tal modo, il lettore dispone di un aggiornato strumento operativo per risolvere le articolate controversie che possono sfociare in una transazione, nell'accordo bonario e nell'arbitrato oppure in una causa davanti al giudice civile (esecuzione del contratto di appalto), al giudice penale (reati contro la pubblica amministrazione), al giudice amministrativo (vizi nel procedimento dell'evidenza pubblica; annullamento e revoca dell'aggiudicazione; sorte del contratto), ovvero in una causa davanti al giudice contabile (danno erariale diretto e indiretto). L'opera offre le opzioni più opportune per pervenire alla corretta soluzione delle singole controversie che insorgano nell'attività contrattuale della P.A., dall'indizione della gara sino alla sottoscrizione e all'esecuzione del contratto di appalto pubblico, proponendo sempre una visione globale delle problematiche esaminate sotto il profilo civile, penale, amministrativo e contabile. Ampio spazio è dedicato alla casistica giurisprudenziale su cui fondare le decisioni prese dai liberi professionisti operanti per conto delle imprese private e delle pubbliche amministrazioni (avvocati, ingegneri, architetti), dai pubblici dipendenti coinvolti nelle procedure contrattuali (dirigenti e funzionari) e dai giudici. Il presente volume può essere utilizzato anche per la preparazione dei concorsi pubblici per conseguire l'abilitazione all'esercizio della professione di avvocato, per accedere alla Magistratura ordinaria e amministrativa ovvero per entrare nei ruoli della Pubblica Amministrazione. L'agile lettura dell'opera è ulteriormente facilitata da particolari percorsi grafici che evidenziano parole chiave all'interno dei singoli paragrafi e da un pratico indice analitico strutturato per voci e sottovoci.

New Metropolitan Perspectives Francesco Calabrò, Lucia Della Spina, Carmelina

Bevilacqua, 2018-05-18 This book explores the role of cities and the urban-rural linkages in spurring innovation embedded in spatial planning, strategic and economic planning, and decision support systems. In particular, the contributions examine the complexity of the current transitional phase towards achieving smart, inclusive and sustainable growth, and investigate the post-2020 UE cohesion policy. The main topics include: Innovation dynamics and smart cities; Urban regeneration – community-led and PPP; Inland and urban area development; Mobility, accessibility, infrastructures; Heritage, landscape and Identity; and Risk management, Environment and Energy. The book includes a selection of articles accepted for presentation and discussion at the 3rd International Symposium New Metropolitan Perspectives (ISTH2020), held at the University of Reggio Calabria, Italy on 22-25 May 2018. The symposium, which addressed the challenge of local knowledge and innovation dynamics towards territory attractiveness, hosted the final event of the MAPS-LED project under Horizon2020 – MSCA RISE.

Mafia-type Organisations and Extortion in Italy Giacomo Di Gennaro, Antonio La Spina, 2018-09-05

Mafia-type organizations generate several distorting effects on the economy. In Italy their presence is endemic, and not only in Southern regions such as Sicily, Campania or Calabria. Such organizations endure the fierce and continuous pressure exerted by Italian anti-mafia policy, maybe the most articulate and effective such policy in the world. Nevertheless, they have survived by submerging, transforming, and relocating their operations. The analysis of the different Mafias of today benefits from a huge amount of empirical data produced by investigators. This allows us to outline more reliable indexes of the penetration of Mafiosi in given territories, as well as to estimate the size of their activities in a transparent and empirically testable way. The contributions gathered in this book stem from the application of an innovative methodology originally introduced by the Fondazione Rocco Chinnici, and they enlarge our understanding of such a complex and dynamic phenomenon.

After the presentation of the approach, the chapters are devoted to the Camorra's present situation, to an estimate of the size of extortion, to a comparison between Cosa Nostra and Camorra, to the analysis of wiretapped conversations and, finally, to the delocalization of Mafias and the perspectives of a European anti-mafia policy. This book was originally published as a special issue of Global Crime.

EU Public Contract Law Roberto Caranta, Gunilla Edelstam, Martin Trybus, 2013-12-13 This book analyses many aspects of the present EU regulatory framework for public contracts, especially public procurement, taking the ongoing reform process into account. First, several chapters discuss the regime of the Public Sector Procurement Directive 2004/18/EC governing the procurement activities of the EU Member States, the coverage of the Directive, qualification and technical specifications, procurement procedures, and award criteria. A specific chapter describes the EU principles applicable to contracts not covered or partially covered by the Directive, which have been the subject of relevant developments in the case law of the European Court of Justice. Another chapter covers sustainable procurement. Second, three chapters are devoted to special procurement regimes, namely public private partnerships, defence and utilities. Third, the review and remedies regime for public procurement is covered in two chapters. Fourth, one chapter goes beyond public procurement and looks at the effect of EU law on the contract management of public contracts, after their conclusion. Fifth, three chapters go beyond the regulation of the Member States and look at the EU law regime applicable to contracts of the EU institutions. Sixth and finally, a concluding chapter provides a critique of the EU legal framework by an author from outside the EU.
