Science and Moral Imagination Matthew J. Brown, 2020-11-17 The idea that science is or should be value-free, and that values are or should be formed independently of science, has been under fire by philosophers of science for decades. *Science and Moral Imagination* directly challenges the idea that science and values cannot and should not influence each other. Matthew J. Brown argues that science and values mutually influence and implicate one another, that the influence of values on science is pervasive and must be responsibly managed, and that science can and should have an influence on our values. This interplay, he explains, must be guided by accounts of scientific inquiry and value judgment that are sensitive to the complexities of their interactions. Brown presents scientific inquiry and value judgment as types of problem-solving practices and provides a new framework for thinking about how we might ethically evaluate episodes and decisions in science, while offering guidance for scientific practitioners and institutions about how they can incorporate value judgments into their work. His framework, dubbed "the ideal of moral imagination," emphasizes the role of imagination in value judgment and the positive role that value judgment plays in science.

Voice and Agency Jeni Klugman, Lucia Hanmer, Sarah Twigg, Tazeen Hasan, Jennifer McCleary-Sills, Julieth Santamaria, 2014-09-29 Despite recent advances in important aspects of the lives of girls

and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women's empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

Smart Learning Andrew Middleton, 2015-03-30 The use of smart technologies and social media by staff and students in and out of the classroom has implications for academic practice in post-compulsory education. Unlike previous eras of learning with technology, change is being led by the students and academics themselves and this establishes a challenge to institutions. This shift demands that we reassess our understanding of formal and informal engagement, the physical and virtual environments we use, and the people we involve. *Smart Learning: teaching and learning with smartphones and tablets in post compulsory education* observes how personal smart technology, social media, rich digital media as well as ideas about open learning work together to form a new immersive and interactive space for learning. The *Smart Learning* book is a product of the Media-Enhanced Learning Special Interest Group (MELSIG) which has considered the opportunities and challenges afforded by new media in developing a forward looking Digital Age, learner-centred view of academia since 2008. MELSIG is a self-driven association fascinated and excited by thinking differently, reflectively and critically. Working informally across UK post-compulsory education around special foci, the group runs sharing and developing practice events and webinars, as well as organising collective research and writing activities about academic innovation with digital and social media. *Smart Learning* is made up of thought pieces, research chapters and case studies. It is punctuated with scenario vignettes, making real this new thinking about learning with personal smart

devices.

IFZ FinTech study 2017 : an overview of Swiss FinTech Thomas Ankebrand, 1966-,2017 The “IFZ FinTech Study 2017” of the Lucerne University of Applied Sciences and Arts provides interested parties with a comprehensive overview of the Swiss FinTech sector. The first part of the study describes the ecosystem of FinTech: On the one hand, it deals with the political and legal, economic, social, as well as technological environment. On the other hand, it provides the reader with an evaluation of the business models of 190 Swiss FinTech companies. The second part of the study introduces the reader in more detail to 104 Swiss companies that offer digital financial services. These overviews of the companies include information about target markets, distribution channels and revenue models, as well as various business performance indicators.

Vatican Assassins Eric Jon Phelps,2001

Technological and Industrial Applications Associated With Industry 4.0 Alberto Ochoa-Zezzatti,Diego Oliva,Aboul Ella Hassanien,2021-07-01 This book includes chapters related to the analysis of cultural differences as a tool to enrich tacit knowledge and make processes more efficient, the factors that influence job satisfaction and the value of social capital as a competitive strategy to achieve productivity and competitiveness of organizations, in addition to research of the utmost importance to discover the facets of the diamond with respect to the symbolic capital of the organizations where Generation Z will work and how it will discover the best time to establish an innovation ecosystem that will influence its work trajectory. Industry 4.0 requires a major paradigm shift, since human capital is a source of competitive advantage. Being competitive enables to a company, a region, a society or a country the power to advance in different areas, contributing to the benefit of a social group, therefore, and organizations need to make efforts that lead to adding value and generate a competitive advantage. Industrial applications based on artificial intelligence can change our lives in just one generation. The chapters in this book show progress and challenges related to real-world applications, as well as the need to strengthen human capital to achieve systemic and comprehensive competitiveness required in the XXI century.

Developing Hybrid Applications for the iPhone Lee S. Barney, 2009-06-16 “For those not ready to tackle the complexities of Objective-C, this is a great way to get started building iPhone apps. If you know the basics of HTML, JavaScript, and CSS, you’ll be building apps in no time.” –August Trometer, Owner of FoggyNoggin Software, www.foggynoggin.com Discover the Easier, Faster Way to Build High-Quality iPhone Applications Now, you don’t need to dive headfirst into Objective-C to write state-of-the-art applications for the iPhone. You can use web development tools and technologies you already know: JavaScript, HTML, and CSS. In this book, long-time web and mobile application developer Lee S. Barney shows you how to use the QuickConnect and PhoneGap frameworks to create secure, high-quality, modular hybrid iPhone applications. Lee S. Barney walks you through the entire hybrid iPhone development process, from creating great user interfaces to compiling, deploying, and executing applications. Along the way, he introduces techniques and sample code designed to streamline development, eliminate complexity, optimize performance, and leverage all iPhone’s native

capabilities—from its accelerometer and GPS to its built-in database. Coverage includes Using Dashcode and Xcode together to create unique, exciting hybrid iPhone applications Using the QuickConnect JavaScript API to perform tasks ranging from vibrating the phone to accessing the accelerometer and GPS location data Accessing native iPhone functionality using the PhoneGap JavaScript API Storing, retrieving, and managing data on the iPhone, even without network access Using XMLHttpRequest to access or synchronize remote data and use web services Creating Google-based maps for your own app that work like those you see in the iPhone's Maps application This book systematically lowers the barriers to iPhone development, enabling web developers to build any iPhone application they can imagine without long development cycles or steep learning curves!

Afgantsy Rodric Braithwaite, 2013-09-11 The story of the Soviet occupation of Afghanistan is well known: the expansionist Communists overwhelmed a poor country as a means of reaching a warm-water port on the Persian Gulf. Afghan mujahideen upset their plans, holding on with little more than natural fighting skills, until CIA agents came to the rescue with American arms. Humiliated in battle, the Soviets hastily retreated. It is a great story-but it never happened. In this brilliant, myth-busting account, Rodric Braithwaite, the former British ambassador to Moscow, challenges much of what we

know about the Soviets in Afghanistan. He provides an inside look at this little-understood episode, using first-hand accounts and piercing analysis to show the war as it was fought and experienced by the Russians. The invasion was a defensive response to a chaotic situation in the Soviets' immediate neighbor. They intended to establish a stable, friendly government, secure the major towns, and train the police and armed forces before making a rapid exit. But the mission escalated, as did casualties. Braithwaite does not paint the occupation as a Russian triumph. To the contrary, he illustrates the searing effect of the brutal conflict on soldiers, their families, and the broader public, as returning veterans struggled to regain their footing back home. Now available in paperback, Braithwaite carries readers through these complex and momentous events, capturing those violent and tragic days as no one has done before.

Women, Business and the Law Bloomsbury Publishing, 2013-11-07 Women perform 66% of the world's work, produce 50% of the food, but earn 10% of the income and own 1% of the property. To shed light on why this grim statistic still holds true, Women, Business and the Law aims to examine legal differentiations on the basis of gender in 143 of the world's economies. Women, Business and the Law tracks governments' actions to expand economic opportunities for women across six key areas: accessing institutions, using property, getting a job, providing incentives to work, building credit and going to court. The report uncovers legal differentiations for women and married versus unmarried women such as being able to register a business, open a bank account and work at night. These issues are of fundamental importance. When, because of tradition, social taboos or simple prejudice, half of the world's population is prevented from making its contribution to the life of a nation, the economy will suffer. The empirical evidence does suggest that, slowly but surely, governments are making progress in expanding opportunities for women. It is our hope that data presented in Women, Business and the Law will both facilitate research on linkages between legal differentiation and outcomes for women, and promote better informed policy choices on what governments can do to expand opportunities for women.

World Development Report 1978 , 1978 This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy

issues which will affect these prospects.

Reading Challenge Casey Malarcher, Andre Janzen, 2005

Attacking Poverty, 2000 At the start of each decade the World Development Report focuses on poverty reduction. The World Development Report, now in its twenty-third edition, proposes an empowerment-security-opportunity framework of action to reduce poverty in the first decades of the twenty-first century. It views poverty as a multidimensional phenomenon arising out of complex interactions between assets, markets, and institutions. This Report shows how the experience of poverty reduction in the last fifteen years has been remarkably diverse and how this experience has provided useful lessons as well as warnings against simplistic universal policies and interventions. It shows how current global trends present extraordinary opportunities for poverty reduction but also cause extraordinary risks, including growing inequality, marginalization, and social explosions. The World Development Report 2000/2001 explores the challenge of managing these risks in order to make the most of the opportunities for poverty reduction.
