In order to fill this gap, Dr. Rubén Ardila has invited the most important researchers and practitioners in the region to present an overview of psychology as both a profession and a research field in Latin America in the following areas: · Scientific research · Professional issues · Clinical and health psychology · Developmental psychology · Educational and school psychology · Organizational and work psychology · Social psychology · Community psychology · Legal and forensic psychology *Psychology in Latin America – Current Status, Challenges and Perspectives* seeks to place Latin American psychology on the map of international psychology, and by doing so it aims to foster cooperation between researchers, practitioners and students from the region with its peers from all over the world.

The Masorah of Biblia Hebraica Stuttgartensia Page H. Kelley, Daniel S. Mynatt, Timothy G. Crawford, 1998-04-09 One of the barriers involved in teaching students of Biblical Hebrew about the Masorah is the lack of introductory literature on the subject. Although a lot of information about the Masorah is available in print, most of it is in technical professional journals or encyclopedia articles. Scattered about in disparate sources, often not in English, this literature is easier to ignore than it is to incorporate into introductory Hebrew classes. As a result, most students of Biblical Hebrew complete their studies without any background on the Masorah. This volume fills this gap by providing an introduction and glossary to the Masorah of the Biblia Hebraica Stuttgartensia. Although the volume could be used by any student of the Hebrew Bible, it is specifically designed to be helpful for students who are just learning Hebrew. Thus it can serve as an important parallel text for second semester or second year Hebrew courses. The introductory chapters give an overview of the field of Masoretic studies and explain the mechanics of using the Masorah of BHS. The annotated glossary provides students with definitions and explanations for most of the terms used in BHS, including examples.

The Changing Languages of Europe Bernd Heine, Emeritus Professor Institute of African Studies Bernd Heine, Tania Kuteva, 2006 Professor Heine and Professor Kuteva look for the causes of linguistic change in cultural and economic exchanges across national and regional boundaries and in the processes that occur when speakers learn or are in close contact with another language. Testing their data and conclusions against findings from elsewhere in the world, the authors reconstruct and reveal when, how, and why common grammatical structures have evolved and continue to evolve in processes of change that will, they argue, transform the linguistic landscape of Europe. The book is written in clear, non-technical language. It will appeal to scholars and students of language change and variation in Europe and elsewhere. It will also interest everyone concerned to understand the nature of language and language change.--BOOK JACKET.

Ozain Mystery of the Congo and Yoruba ,2013-08-13 Origin history The origin of Osahin also comes from the mythology of the Egyptians. The word Osahi(n) come from the word Egyptian Sahu, this is the name of a God of the stars identified as or with Orion. In other papers before there was mention of him being referred to the God Orion, and it has been shown he lived under the name of oro in the land of the Yoruba. Therere other words Egyptian, Sahu that signified a spiritual body, which that so they say germinated form a mummified body. The ideas that explain the conception of this Yoruba God Osahin has been based with the association that he has with God Sahu and the spiritual body known with the same name. This Orisha is the owner of the mountains and there in Cuba they associate him with the Regla of the Congos. Also very particular with palo Monte or mayombe. Supposedly one of the stories evidently cabana. Osain was working his regla with Palo Monte, drinking bad liquors, using gun powder and he didnt have peace. He was dressed dirty and with torn clothing, he never saw the results of his work, nothing. Even though he worked very hard with a lot of integrity. He saw that the Lucumi were always doing well, they dressed very elegant and they had money and tranquility. So Osain decided and went to see Shango asking Shango for advice. Shango told him that he was a palero and he knew it perfectly, but after knowing the regla lucumi he found himself in better conditions. He dressed in red clothing, he was clean and powerful. With this argument he convinced Osain and took him to the feet of Orumila, and that was his remedy. Osain has no mother or father; he was born by himself from direction of God. It is the Orisha that is very important in the religion Yoruba. He could be more important than all. The use of Osain in the religion lucumi is very important and needed. The Ozainistas could be male or female. But the women cannot receive him until the have passed their menopause. What happens is that they the women cannot give or make Osain for anybody.

Heretics Gerd Ludemann,1996-01-01 According to the commonly held view, early Christianity was a time of great harmony, and heresy emerged only at a later stage. To the contrary, Gerd Ludemann argues that the time from the first Christian communities to the end of the second century was defined by struggle by various groups for doctrinal authority. Drawing on a wealth of data, he asserts that the losers in this struggle actually represented Christianity in its more authentic, original form. Orthodoxy has been defined by the victors in this struggle and it is they who subsequently silenced alternative views and labeled them heretical. Ludemann's findings are important as well as liberating for the understanding of both Christianity and the Bible. Readers will gain a new understanding of Jesus and the early church from this compelling and controversial book.

Swinging Single Hilary Radner, Moya Lockett, 1999 Critics and defenders alike connect today's widespread anxieties about sexuality and culture to the political activism of the 1960s and the counterculture's preoccupation with the individual pursuit of pleasure. In contrast, the essays in Swindling Single attribute the new sexual mores of that era not to its political upheavals but to a confluence of social, cultural, and economic factors that encouraged personal gratification and altered traditionally defined gender roles. Contributors analyze a broad range of topics: the commercialization of avant-garde and exploitation films; new visions of female sexuality in *That Girl* and *The Avengers*; the social context of such cultural icons as Hugh Hefner and Charles Manson; the intersection of race and sexuality in Eldridge Cleaver's *Soul on Ice*; and depictions of sexual pleasure in pornography and scientific films.

Women's Worlds Ros Ballaster, Margaret Beetham, Elizabeth Frazer, Sandra Hebron, 1991-07-12 This book integrates new material, using sources from the eighteenth and nineteenth century periodical press, research with contemporary readers, the authors' critical reading of past and present magazines, and a clear discussion of theoretical approaches from literary criticism. The development of the genre, and its part in the historical process of forging modern definitions of gender, class and race are analysed through critical readings and a discussion of readers' negotiations with the contradictory pleasures of the magazine, and its constricting ideal of femininity.

A Mind Of Her Own Anne Campbell, 2013-05-16 In the new edition of a successful book, Anne Campbell redresses the balance of evolutionary theory in favour of women. She examines how selection pressures have shaped the female mind over thousands of generations: Their emotions, friendship, competition, aggression and mate choice.

Evolutionary Psychology, Public Policy and Personal Decisions Charles Crawford, Catherine Salmon, 2004-05-20 During the last 15 years, human sociobiology has metamorphosed into evolutionary psychology. It is concerned with the social problems and stresses hominid and primate ancestors encountered, the psychological mechanisms natural selection shaped to deal with these stresses, and the way those ancient mechanisms work now. Evolutionary psychologists are making great progress in expanding the understanding of human nature, however, this knowledge has had little impact on policymakers and legislators. Supreme Court justices and managers seldom consult evolutionary psychologists to help with their deliberations. When faced with private decisions few individuals ask themselves how a Darwinian perspective might help them. This volume's aim is to start the process of using theory and findings of evolutionary psychology to help make the world a better place to live. This book takes evolutionary psychology explicitly into applied areas in a way no other book has. It includes a reasonable scope of applications from pornography to psychopaths and from morality to sex differences in the workplace. An applications section provides concrete ideas for dealing with social and policy issues, including chapters on women in the workplace, rape, and child support. Providing good coverage of basic issues and theory of the field, this book gives lay people and law/policymakers appropriate background to fully understand the applications chapters. Part II provides information on basic psychological mechanisms for group living--including chapters on emotions, reciprocity and legal reasoning, and self deception--that impact on how well public policy and law function. The material in the first two sections provide an intellectual basis for the chapters in the third part of the book which deals with the application of evolutionary psychology to a variety of substantive areas related to public policy and personal decisions. A political scientist concludes the book with a commentary on evolutionary psychology and public policy. The book is designed to serve as a stand-alone text in evolutionary psychology and public policy that can be used in a variety of disciplines, such as psychology, social work, law and psychology, and public policy.
