Google Wallet - a Glimpse Into the Future of Mobile Payments Rohan Handa,Kritika Maheshwari,Malvika Saraf,2011-12 Project Report from the year 2011 in the subject Information Management, University of Southern California, language: English, abstract: Over the past few thousand years of evolution, the way we pay has changed shapes and materials. It has gone from gold to coins, paper money to plastic cards and now with Google's venture into the mobile payment industry, we are at the threshold of the next big shift. Google Wallet is a mobile payment Android app that transforms a phone into a wallet. This app utilizes the Near Field Communication (NFC) technology that allows its users to pay for purchased items and redeem offers. At this initial stage of business, there are many features and factors that Google needs to change in order to bring about the mass adoption of this service. As the Business Technology Analysts at Google, we - Kritika Maheshwari, Malvika Saraf and Rohan Handa aim at addressing the hurdles for this technology and the methods to bring it to fruition. In the process we evaluate Google's profit motivation and the bigger strategy behind this service. First, we explain the business approach which describes the importance of the adopted business model. We use Porter's Five Force analysis to determine the competitive intensity in the market followed by SWOT analysis to give recommendations that will help in the mass adoption. Finally, we focus our paper on formulating a strategy canvas in order to study the existing payment methods in comparison to our service. The paper concludes with recommendations to Google for promoting wide customer acceptance.

**Theatrum Arbitri** C. Panayotakis,2018-07-17 Theatrum Arbitri is a literary study dealing with the possible influence of Roman comic drama (comedies of Plautus and Terence, theatre of the Greek and Roman mimes, and fabula Atellana) on the surviving fragments of Petronius' Satyrica. The theatrical assessment of this novel is carried out at the levels of plot-construction, characterization, language, and reading of the text as if it were the narrative equivalent of a farcical staged piece with the theatrical structure of a play produced before an audience. The analysis follows the order of each of the scenes in the novel. The reader will also find a brief general commentary on the less discussed scenes of the Satyrica, and a comprehensive account of the theatre of the mimes and its main features.

*Graphic Thinking for Architects and Designers* Paul Laseau,2000-08-03 Hier ist sie endlich - die langersehnte überarbeitete 3. Auflage des Klassikers in neuer Aufmachung: mit Hunderten neuer Illustrationen und neuen Technologien im Bereich 'Graphic Thinking' (bildhaftes Denken). Komplett aktualisiert, mit Computeranimationen für digitale und andere Kommunikationsmedien. Diskutiert werden u.a. folgende Themen: Grundlagen für Freihandzeichnen, Fertigen von Symbolzeichnungen, Notizen in Bildern und Diagrammen - alles im Kontext moderner Architektur und aktuellem Design. Der Begriff 'Graphic Thinking' beschreibt, welche Tools, Zeichen- und Skizziermethoden Architekten und Studenten verwenden, um eine Designlösung zu finden. In der Architektur wird diese Form des Denkens im allgemeinen mit der Entwurfsphase eines Projektes assoziiert - ein Zusammenspiel von Denken und Skizzieren. (y09/00)

**The Internet Myth** Paolo Bory,2020-04-29 ‘The Internet is broken and Paolo Bory knows how we got here. In a powerful book based on original research, Bory carefully documents the myths, imaginaries, and ideologies that shaped the material and cultural history of the Internet. As important as this book is to understand our shattered digital world, it is essential for those who would fix it.’ — Vincent Mosco, author of *The Smart City in a Digital World* The Internet Myth retraces and challenges the myth laying at the foundations of the network ideologies – the idea that networks, by themselves, are the main agents of social, economic, political and cultural change. By comparing and integrating different sources related to network histories, this book emphasizes how a dominant narrative has extensively contributed to the construction of the Internet myth while other visions of the networked society have been erased from the collective imaginary. The book decodes, analyzes and challenges the foundations of the network ideologies looking at how networks have been imagined, designed and promoted during the crucial phase of the 1990s. Three case studies are scrutinized so as to reveal the complexity of network imaginaries in this decade: the birth of the Web and the mythopoesis of its inventor; and the histories of two Italian networking projects, the infrastructural plan Socrate and the civic network Iperbole, the first to give free Internet access to citizens. The Internet Myth thereby provides a compelling and hidden sociohistorical narrative in order to challenge one of the most powerful myths of our time. This title has been published with the financial assistance of the Fondazione Hilda e Felice Vitali, Lugano, Switzerland.

**The Anthropology of Time** Alfred Gell,2021-03-10 Time - relentless, ever-present but intangible and the single element over which human beings have no absolute control - has long proved a puzzle. The author examines the phenomenon of time and asks such fascinating questions as how time impinges on people, to what extent our awareness of time is culturally conditioned, how societies deal with temporal problems and whether time can be considered a `resource' to be economized. More specifically, he provides a consistent and detailed analysis of theories put forward by a number of thinkers such as Durkheim, Evans-Pritchard, Lévi-Strauss, Geertz, Piaget, Husserl and Bourdieu. His discussion encompasses four main approaches in time research, namely developmental psychology, symbolic anthropology (covering the bulk of post-Durkheimian social anthropology) `economic' theories of time in social geography and, finally, phenomenological theories. The author concludes by presenting his own model of social/cognitive time, in the light of these critical discussions of the literature.

The Mercury 13 Martha Ackmann,2004-07-13 For readers of The Astronaut Wives Club, The Mercury 13 reveals the little-known true story of the remarkable women who trained for NASA space flight. In 1961, just as NASA launched its first man into space, a group of women underwent secret testing in the hopes of becoming America's first female astronauts. They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts, but they were summarily dismissed by the boys' club at NASA and on Capitol Hill. The USSR sent its first woman into space in 1963; the United States did not follow suit for another twenty years. For the first time, Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women, all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America's space race against the Soviet Union. In addition to talking extensively to these women, Ackmann interviewed Chuck Yeager, John Glenn, Scott Carpenter, and others at NASA and in the White House with firsthand knowledge of the program, and includes here never-before-seen photographs of the Mercury 13 passing their Lovelace tests. Despite the crushing disappointment of watching their dreams being derailed, the Mercury 13 went on to extraordinary achievement in their lives: Jerrie Cobb, who began flying when she was so small she had to sit on pillows to see out of the cockpit, dedicated her life to flying solo missions to the Amazon rain forest; Wally Funk, who talked her way into the Lovelace trials, went on to become one of the first female FAA investigators; Janey Hart, mother of eight and, at age forty, the oldest astronaut candidate, had the political savvy to steer the women through congressional

hearings and later helped found the National Organization for Women. A provocative tribute to these extraordinary women, *The Mercury 13* is an unforgettable story of determination, resilience, and inextinguishable hope.

History of Modern Architecture Leonardo Benevolo, 1977 A serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations. Let it be said at once that the format of this work is richly handsome: it is a two-volume boxed set comprising 844 pages and well over 1,000 high-quality illustrations, and it reflects throughout its publisher's conviction that good design is an essential, not superficial, part of bookmaking. Beyond that, it should be emphasized that this work is not another facile cultural tour of modern architecture. It is a serious and original study of the beginnings and development of modernism in which the pictorial aspects are designed to aid in the communication of the author's closely reasoned formulations, rather than to gloss over a lack of substantive content. The book is a translation of the third Italian edition, published in 1966. Benevolo, who is on the faculty of architecture in Venice, has earned an international reputation as a historian of architecture and town planning, and his publications embrace the span of time from the Renaissance to the foreseeable future. One such publication, *The Origins of Modern Town Planning* (The MIT Press, 1967), may be read as a prelude to the present work as well as an independent contribution. Perhaps more than any other architectural historian in our time, Benevolo has made a determined effort to place developments in design and planning in their proper social and political settings. Indeed, the author argues that the development of the modern movement in architecture was determined, not by aesthetic formalisms, but largely by the social changes that have occurred since about 1760: After the middle of the eighteenth century, without the continuity of formal activity being in any way broken, indeed while architectural language seems to be acquiring a particular coherence, the relations between architect and society began to change radically.... New material and spiritual needs, new ideas and modes of procedure arise both within and beyond the traditional limits, and finally they run together to form a new architectural synthesis that is completely different from the old one. In this way it is possible to explain the birth of modern architecture, which otherwise would seem completely incomprehensible.... This second volume is concerned with the modern movement proper, from 1914 to 1966. The author emphasizes the unity of the movement, rejecting the usual treatment that allots to the individual architects separate and unconnected biographical accounts. Benevolo remarks at one point, When one talks about modern architecture one must bear in mind the fact that it implies not only a new range of forms, but also a new way of thinking, whose consequences have not yet all been calculated. His main concern is to provide a more exact calculation of those consequences.

New Media and Politics Barrie Axford, Richard Huggins, 2001-01-26 Exploring the theme of the putative transformation of political modernity under the impact of new media, this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life, and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures. *New Media and Politics* examines: the extent to which commercial populism now dominates electoral and other political discourses; the ways in which the functions of leadership, government and political parties are modified by different forms of both old and new media; the democratic or undemocratic import of such changes; and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media.

**Talk on Television** Sonia Livingstone, Peter Lunt, 2002-09-10 Not only is everyday conversation increasingly dependent on television, but more and more people are appearing on television to discuss social and personal issues. Is any public good served by these programmes or are they simply trashy entertainment which fills the schedules cheaply? *Talk on Television* examines the value and significance of televised public debate. Analysing a wide range of programmes including *Kilroy*, *Donohue* and *The Oprah Winfrey Show*, the authors draw on interviews with both the studio participants and with those watching at home. They ask how the media manage discussion programmes and whether the programmes really are providing new 'spaces' for public participators. They find out how audiences interpret the programmes when they appear on the screen themselves, and they unravel the conventions - debate, romance, therapy - which make up the genre. They also consider TV's function as a medium of education and information, finally discussing the dangers and opportunities the genre holds for audience participation and public debate in the future.

*Critique of Architecture* Douglas Spencer, 2021-01-18 *Critique of Architecture* offers a renewed and radical theorization of the relations between capital and architecture. It explicates the theoretical gymnastics through which architecture legitimates its services to neoliberalism, examines the discipline's production of platforms for happily compliant consumers, and challenges its entrepreneurial self-image. *Critique of Architecture* also addresses the discourse of autonomy, questioning its capacity to engage effectively with the terms and conditions of capitalism today, analyses the post-political turns of contemporary architecture theory, and reckons with the legacies and limitations of critical theory.

*The Formation and Transmission of Western Legal Culture* Serge Dauchy, Georges Martyn, Anthony Musson, Heikki Pihlajamäki, Alain Wijffels, 2016-12-01 This volume surveys 150 law books of fundamental importance in the history of Western legal literature and culture. The entries are organized in three sections: the first dealing with the transitional period of fifteenth-century editions of medieval authorities, the second spanning the early modern period from the sixteenth to the eighteenth century, and the third focusing on the nineteenth and twentieth centuries. The contributors are scholars from all over the world. Each 'old book' is analyzed by a recognized specialist in the specific field of interest. Individual entries give a short biography of the author and discuss the significance of the works in the time and setting of their publication, and in their broader influence on the development of law worldwide. Introductory essays explore the development of Western legal traditions, especially the influence of the English common law, and of Roman and canon law on legal writers, and the borrowings and interaction between them. The book goes beyond the study of institutions and traditions of individual countries to chart a broader perspective on the transmission of legal concepts across legal, political, and geographical boundaries. Examining the branches of this genealogical tree of books makes clear their pervasive influence on modern legal systems, including attempts at rationalizing custom or creating new hybrid systems by transplanting Western legal concepts into other jurisdictions.
