Jeffrey Rotter

The Unknown Knowns Jeffrey Rotter, 2009-03-17 Jim Rath's wife has grown tired of his hobbies: his immaculately maintained comics collection, his creepy underwater experiments, and his dreams of building a museum based on the Aquatic Ape Theory of Human Evolution. On the night that she leaves him, Jim thinks he has spotted an emissary from a lost aquatic race called the Nautikons. In truth, the man is a low-level agent of the Department of Homeland Security. What follows is a riveting story of two quixotic men who stalk each other toward a bloody showdown -- a spectacularly moronic act of terrorism at an aging water park. *The Unknown Knowns* -- its title is a reference to a quote from former defense secretary Donald Rumsfeld -- is a brilliant send-up of the insidious language and sometimes tragically comic focus of our country's Homeland Security Department. Combining the social satire of Kurt Vonnegut with the paranoid delusions of Thomas Pynchon, Rotter takes everyday domestic fixations and turns them into a hilarious assessment of the human condition. Fresh, imaginative, and deft, *The Unknown Knowns* marks the arrival of a unique new voice in literary fiction.

Economics and Financial Management for Nurses and Nurse Leaders, Third Edition Susan J. Penner, RN, MN, MPA, DrPH, CNL, 2016-08-28 Written by and for nurses, this key foundational text helps to build the fundamental economics and financial management skills nurses and nurse leaders need for daily use. This third edition delivers several new features, adding to its value as the

only timely and relevant text written for the full spectrum of RN-to-BSN, BSN, and MSN students. It has been significantly revised to simplify content, to address the vast changes in and increasing complexity of U.S. health care financing, and to be useful in both traditional in-class format and hybrid and online programs. Two new and refocused chapters address assessing financial health and nurse entrepreneurship and practice management, and new material illuminates recent research findings and statistics. Chapters feature worksheets such as business plan checklists and text boxes expanding on key chapter content. The book is distinguished by its provision of case examples based on nurse-run clinic and inpatient nursing unit financial issues. It provides multiple opportunities for experiential learning, such as writing business plans and health program grant proposals. It delivers cost-benefit and cost-effectiveness analyses, discusses budget preparation, offers strategies for controlling budget costs, and updates relevant health policies and statistics. The text's engaging format promotes the synthesis of economics and finance across the nursing curriculum through the use of end-of-chapter exercises, discussion questions, and games based on concepts within the text. Additionally, tips throughout the book alert students about the need to apply concepts from other aspects of their education to economic and financial situations. Also included are online supplemental materials for teachers and students, including Excel spreadsheets, grant proposals, a test bank, and PowerPoint slides. New to the Third Edition: Updates health reform,

health care spending, and other relevant policies and statistics Includes two new and refocused chapters that address assessing the financial health of a business and nurse entrepreneurship and practice management Highlights recent research findings and key concepts in text boxes Provides blank and completed worksheets, such as business plan checklists, so nurses can apply financial concepts in their clinical settings Fosters understanding of key concepts with enhanced explanations and samples of business plans and other reports Key Features: Aligned with AACN and AONE guidelines, the CNL certification exam, and QSEN competencies Serves as a primary financial management text for multiple nursing academic programs Facilitates experiential learning through end-of-chapter exercises, games, tips for synthesizing knowledge, worksheets, and case examples Designed for use in traditional classrooms and in hybrid and online learning programs Includes a chapter on measuring nursing care with indicators for capacity, staffing, patient acuity, performance, and patient flow NEW! a FREE Q&A App is available (see inside front cover)

Quantifying the Comprehensive Greenhouse Gas Co-benefits of Green Buildings
Edward A. Arens, 2014 This report quantifies, for the first time, the greenhouse gas (GHG) emissions co--benefits associated with water, waste and transportation usage in certified green commercial office buildings in California. The study compares the measured values of water, waste and transportation usage self--reported by a set of office buildings certified under the Leadership in Energy and Environmental Design rating system for Existing Building Operations and Maintenance (LEED--EBOM) to both baseline values of conventional California office buildings and predicted values based upon state standards for green buildings and GHG impact prediction methods. The green buildings in the LEED--EBOM dataset produced 50% less GHGs due to water consumption than baseline buildings, 48% less due to solid waste management, and 5% less due to transportation. If applied to the entire

California office building stock, performance typical of the certified green buildings would save 0.703 MMTCO₂e/yr from transportation, 0.084 MMTCO₂e/yr from water, and 0.044 MMTCO₂e/yr from waste, for a total potential savings of about 0.831 MMTCO₂e/yr relative to conventional construction. In addition, buildings earning additional credits for specified performance thresholds for water and waste in the LEED--EBOM code attained performance levels even higher than required by the code provisions, suggesting that such code provisions in other contexts may help incentivize larger GHG emissions reductions than anticipated.
