Henry LEE (Naturalist of the Brighton Aquarium.)

The Ocean at Home Bernd Brunner,2005-05-12 The mysterious world beneath the ocean's surface has captivated man for centuries—the Egyptians, Greeks, Romans, and ancient Chinese all kept fish in their homes for purposes other than the culinary. But it was not until the nineteenth-century invention of the aquarium that the deep was truly domesticated, offering the curiously inclined a chance to invent their very own exotic sea world within their own walls. In this fascinating history of the aquarium, Bernd Brunner traces the development of this most wonderful invention, giving insight into the cultural and social circumstances that accompanied its swift rise in popularity. Brunner tells a compelling story of obsession, beauty, discovery, and delight, from the aquarium's humble origins as a tool for scientific observation to the Victorian era's elaborately decorated containers of oceanic curiosity, to the great public aquaria of the twentieth century.

The Dragon Behind the Glass Emily Voigt,2016-05-24 WINNER OF THE 2017 NASW SCIENCE IN SOCIETY JOURNALISM AWARD A FINALIST FOR THE 2017 PEN/E. O. WILSON LITERARY SCIENCE WRITING AWARD LONGLISTED FOR THE ANDREW CARNEGIE MEDAL FOR EXCELLENCE A LIBRARY JOURNAL BEST SCIENCE BOOK OF THE YEAR “[A] curiously edifying book.” —The New York Times Book Review “With the taut suspense of a spy novel, Voigt paints a vivid world of murder, black market deals, and habitat destruction surrounding a fish that's considered, ironically, to be a good-luck charm.” —Discover “[An] immensely satisfying story, full of surprises and suspense....Things get weird fast.” —The Wall Street Journal An intrepid journalist's quest to find a wild Asian arowana—the world's most expensive aquarium fish—takes her on a global tour in this “engaging tale of obsession and perseverance...and an enthralling look at the intersection of science, commercialism, and conservationism” (Publishers Weekly, starred review). A young man is murdered for his pet fish. An Asian tycoon buys a single specimen for \$150,000. Meanwhile, a pet detective chases smugglers through the streets of New York. With “the taut suspense of a spy novel” (Discover) *The Dragon Behind the Glass* tells the story of a fish like none other. Treasured as a status symbol believed to bring good luck, the Asian arowana, or “dragon fish,” is a dramatic example of a modern paradox: the mass-produced endangered species. While hundreds of thousands are bred in captivity, the wild fish has become a near-mythical creature. From the South Bronx to Borneo and beyond, journalist Emily Voigt follows the trail of the arowana to learn its fate in nature. “A fresh, lively look at an obsessive desire to own a piece of the wild” (Kirkus Reviews), *The Dragon Behind the Glass* traces our fascination with aquarium fish back to the era of exploration when naturalists stood on the cutting edge of modern science. In an age when freshwater fish now comprise one of the most rapidly vanishing groups of animals, Voigt unearths a surprising truth behind the arowana's rise to fame—one that calls into question how we protect the world's rarest species. “Not since Candace Millard published *The River of Doubt* has the world of the Amazon, Borneo, Myanmar, and other exotic locations been so colorfully portrayed as it is now in Emily Voigt's *The Dragon Behind the Glass*...a must-read” (Library Journal, starred review).

What If? Mariana Souto-Manning is Associate Professor of Education in the Department of Curriculum and Teaching at Teachers College, Columbia University. “A profound, rich, and rewarding meditation and deep conversation with teachers fully engaging young children with culture, social history, and learning for the future. This wide-ranging book escapes temporal, spatial, and disciplinary boundaries. Read it and reflect on how you can take it into your own life of learning.” —Shirley Brice Heath, Professor Emerita, Stanford University “Early childhood educators will experience this unique book as a warm and detailed invitation to engage in multicultural education. The emphasis throughout is on “multi”—multiple pedagogical approaches, from culture circles to podcasts to story acting, and multiple cultural heritages embodied by active children and teachers. From a critical perspective and alongside creative teachers who aspire to be transformative, Souto-Manning links accessible theory with rich and thoughtful practices.” —Celia Genishi, Professor of Education, Teachers College, Columbia University “Mariana Souto-Manning’s *Multicultural Teaching in the Early Childhood Classroom* rightly places the use of deficit thinking and ineffective teaching strategies in the wasteland of classroom instruction. The author superbly documents and explains ways of teaching multiculturally that will richly benefit the learning of all students and make teaching become the fun that teachers dreamed it would be when they first said, ‘I want to teach because I love kids.’” —Carl A. Grant, Hoefs-Bascom Professor, University of Wisconsin-Madison “*Multicultural Teaching in the Early Childhood Classroom* encourages teachers to honor, affirm, and challenge even our very youngest children to think inclusively, critically, and democratically—a necessity if we are to help develop knowledgeable, caring, and empowered learners.” —Sonia Nieto, Professor Emerita, University of Massachusetts, Amherst

Inventing the cave man Andrew Horrall, 2017-05-26 Fred Flintstone lived in a sunny Stone Age American suburb, but his ancestors were respectable, middle-class Victorians. They were very amused to think that prehistory was an archaic version of their own world because it suggested that British ideals were eternal. In the 1850s, our prehistoric ancestors were portrayed in satirical cartoons, songs, sketches and plays as ape-like, reflecting the threat posed by evolutionary ideas. By the end of the century, recognisably human cave men inhabited a Stone Age version of late-imperial Britain, sending-up its ideals and institutions. Cave men appeared constantly in parades, civic pageants and costume parties. In the early 1900s American cartoonists and early Hollywood stars like Charlie Chaplin and Buster Keaton adopted and reimagined this very British character, cementing it in global popular culture. Cave men are an appealing way to explore and understand Victorian and Edwardian Britain.

A Fascination for Fish David C. Powell, 2001-03-27 This engaging memoir presents one man's lifelong love of the ocean and gives a highly personal, behind-the-scenes look at California's magnificent and innovative aquariums. David Powell, for many years curator of the world-renowned Monterey Bay Aquarium, tells the story of his life as a pioneering aquarist. From handling great white sharks to transporting delicate fish on bumpy airplanes to night diving for fish in the Indian Ocean, *A Fascination for Fish* describes many of the mind-boggling challenges that make modern aquariums possible and offers an intriguing glimpse beneath the ocean's surface. Powell's career in diving and aquarium development goes back to the beginning of modern methods in both areas. From the early techniques he devised to get fish into aquariums alive and healthy to his later exploratory dive to a depth of eleven hundred feet in a two-person submarine, Powell's action-packed narrative inspires laughter, wonder, and philosophical reflection. *A Fascination for Fish* also includes many stories about Powell's diving adventures on the California coast, in the Sea of Cortez, and in many remote and exotic locations around the world.

Fish Behavior in the Aquarium and in the Wild Stephan Reeb, 2018-08-06 A home aquarium seems a peaceful place. Gazing at its inhabitants as they swim slowly through their small universe is a soothing, even hypnotic, experience. But this seeming tranquillity is only surface deep. Like their wild counterparts, these tiny, glittering beings exhibit a wide array of fascinating behaviors. Stéphan Reeb provides a delightfully entertaining, yet scientifically grounded, look at what fishes do and how they do it. From defending their young, to seeking out the perfect sexual partner, to telling time, fishes display a variety of behaviors that may not be readily apparent to the casual observer. Reeb not only describes the behaviors, but also outlines simple experiments that can be performed by observers wishing to learn for themselves just how resourceful—and bizarre—these creatures can be. *How Fish Behave* introduces us to damselfishes that sing like birds, elephantfishes that communicate electrically, and sticklebacks that deceive other fish into believing they have found food. Drawing on the experimental evidence behind such intrinsically interesting responses, Reeb demonstrates how science

is conducted in the field of animal behavior.

Beastly London Hannah Velten, 2013-08-15 Horse-drawn cabs rattling down muddy roads, cattle herded through the streets to the Smithfield meat market for slaughter, roosters crowing at the break of dawn—London was once filled with a cacophony of animal noises (and smells). But over the last thirty years, the city seems to have banished animals from its streets. In *Beastly London*, Hannah Velten uses a wide range of primary sources to explore the complex and changing relationship between Londoners of all classes and their animal neighbors. Velten travels back in history to describe a time when Londoners shared their homes with pets and livestock—along with a variety of other pests, vermin, and bedbugs; Londoners imported beasts from all corners of the globe for display in their homes, zoos, and parks; and ponies flying in hot air balloons and dancing fleas were considered entertainment. As she shows, London transformed from a city with a mainly exploitative relationship with animals to the birthplace of animal welfare societies and animal rights' campaigns. Packed with over one hundred illustrations, *Beastly London* is a revealing look at how animals have been central to the city's success.

Zoo and Aquarium History Vernon N. Kisling, Jr, 2022-07-11 Wild animals have been housed in zoos and aquariums for 5,000 years, fascinating people living in virtually every society. Today, these institutions are at a new milestone in their history. This second edition of *Zoo and Aquarium History* takes the reader on a journey through the transition of private collections to menageries, to zoos, then zoological gardens, and more recently conservation centers and sanctuaries. Under the direction of Vernon N. Kisling, an expert in zoo history, an international team of authors has thoroughly updated the only comprehensive, global history of animal collections, menageries, zoos, and aquariums. The resulting book documents the continuum of efforts in maintaining wild animal collections from ancient civilizations through today, explaining how modern zoos have developed their mission statements around the core aims of conservation, education, research and recreation. This new edition pulls together regional information, including new chapters on zoological gardens of Canada, Latin America, China, Israel, the Middle East, and New Zealand, along with the cultural aspects of each region to provide a foundation upon which further research can be based. It presents a chronological listing of the world's zoos and aquariums and features many never-before published photographs. Sidebars present supplementary information on pertinent personalities, events, and wildlife conservation issues. The original Appendix has been expanded to include over 1,200 zoos and aquariums, providing an invaluable resource. This is an extensive, chronological introduction to the subject, highlighting the published and archival resources for those who want to know more.

Animal Edutainment in a Neoliberal Era Teresa Lloro, 2021-04-12 *Animal Edutainment in a Neoliberal Era* is a rich and beautifully written multispecies ethnographic monograph that explores pedagogy and practice at a Southern California aquarium housing and displaying over 10,000 animals. Drawing on extensive interviews with aquarium staff and visitors, as well as fieldwork interacting with and observing human-animal interactions, the book demonstrates the complex ways in which aquarium animals are politically deployed in teaching and learning processes. Weaving together insights from anthropology, critical geography, environmental education, and political ecology, Teresa Lloro crafts a three-pronged political ecology of education lens, illuminating how neoliberal ideologies interact at various scales (local, regional, national, and global) to deeply shape aquarium decision-making and practice. Acknowledging that neoliberalism enrolls humans and other animals in teaching and learning in new and often poorly understood ways, this study challenges the anthropocentrism of contemporary informal educational approaches, suggesting that imaginative ways forward will

require a paradigm shift in regarding the role of animals in education.
