Octopus, Squid, and Cuttlefish Roger Hanlon,Mike Vecchione,Louise Allcock,2018-10-31 Cephalopods are often misunderstood creatures. Three biologists set the record straight.—Science News Largely shell-less relatives of clams and snails, the marine mollusks in the class Cephalopoda—Greek for “head-foot”—are colorful creatures of many-armed dexterity, often inky self-defense, and highly evolved cognition. They are capable of learning, of retaining information—and of rapid decision-making to avoid predators and find prey. They have eyes and senses rivaling those of vertebrates like birds and fishes, they morph texture and body shape, and they change color faster than a chameleon. In short, they captivate us. From the long-armed mimic octopus—able to imitate the appearance of swimming flounders and soles—to the aptly named flamboyant cuttlefish, whose undulating waves of color rival the graphic displays of any LCD screen, there are more than seven hundred species of cephalopod. Featuring a selection of species profiles, Octopus, Squid, and Cuttlefish reveals the evolution, anatomy, life history, behaviors, and relationships of these spellbinding animals. Their existence proves that intelligence can develop in very different ways: not only are cephalopods unusually large-brained invertebrates, they also carry two-thirds of their neurons in their arms. A treasure trove of scientific fact and visual explanation, this worldwide illustrated guide to cephalopods offers a comprehensive review of these fascinating and mysterious underwater invertebrates—from the lone hunting of the octopus, to the social squid, and the prismatic skin signaling of the cuttlefish.

Effects of Trawling and Dredging on Seafloor Habitat National Research Council,Division on Earth and Life Studies,Ocean Studies Board,Committee on Ecosystem Effects of Fishing: Phase 1â–“Effects of Bottom Trawling on Seafloor Habitats,2002-08-09 Concerns over the potential ecological effects of fishing have increased with the expansion of fisheries throughout the marine waters of the United States. Effects of Trawling and Dredging on Seafloor Habitat describes how assessment of fishing impacts depends on gear type, number and location of bottom tows, and the physical and biological characteristics of seafloor habitats. Many experimental studies have documented acute, gear-specific effects of trawling and dredging on various types of habitat. These studies indicate that low mobility, long-lived species are more vulnerable to towed fishing gear than short-lived species in areas where the seabed is often disturbed by natural phenomena. Trawling and dredging may also change the composition and productivity of fish communities dependent on seafloor habitats for food and refuge. The scale of these impacts depends on the level of fishing effort. This volume presents color maps of fishing effort for all regions with significant bottom trawl or dredge fisheries-the first time that such data has been assembled and analyzed for the entire nation.

This Is Water Kenyon College,2014-05-22 Only once did David Foster Wallace give a public talk on his views on life, during a commencement address given in 2005 at Kenyon College. The speech is reprinted for the first time in book form in THIS IS WATER. How does one keep from going through their comfortable, prosperous adult life unconsciously' How do we get ourselves out of the foreground of our thoughts and achieve compassion' The speech captures Wallace's electric intellect as well as his grace in attention to others. After his death, it became a treasured piece of writing reprinted in The Wall Street Journal and the London Times, commented on endlessly in blogs, and emailed from friend to friend. Writing with his one-of-a-kind blend of causal humor, exacting intellect, and practical philosophy, David Foster Wallace probes the challenges of daily living and offers advice that renews us with every reading.

Voyage of the Turtle Carl Safina,2007-04-01 The story of an ancient sea turtle and what its survival says about our future, from the award-winning writer and naturalist Though nature is indifferent to the struggles of her creatures, the human effect on them is often premeditated. The distressing decline of sea turtles in Pacific waters and their surprising recovery in the Atlantic illuminate what can go both wrong and right from our interventions, and teach us the lessons that can be applied to restore health to the world's oceans and its creatures. As Voyage of the Turtle, Carl Safina's compelling natural history adventure makes clear, the fate of the astonishing leatherback turtle, whose ancestry can be traced back 125 million years, is in our hands. Writing with verve and color, Safina describes how he and his colleagues track giant pelagic turtles across the world's oceans and onto remote beaches of every continent. As scientists apply lessons learned in the Atlantic and Caribbean to other endangered seas, Safina follows leatherback migrations, including a thrilling journey from Monterey, California, to nesting grounds on the most remote beaches of Papua, New Guinea. The only surviving species of its genus, family, and suborder, the leatherback is an evolutionary marvel: a reptile that behaves like a warm-blooded dinosaur, an ocean animal able to withstand colder water than most fishes and dive deeper than any whale. In his peerless prose, Safina captures the delicate interaction between these gentle giants and the humans who are finally playing a significant role in their survival. Magnificent . . . A joyful, hopeful book. Safina gives us ample reasons to be enthralled by this astonishing ancient animal—and ample reasons to care. -- The Los Angeles Times

The Man Who Sold Air in the Holy Land Omer Friedlander,2023-06-27 From “a marvelous new voice” (Rebecca Makkai), these “extraordinarily imaginative” (Sigrid Nunez), “revelatory” (Nicole Krauss), “superb” (Kiran Desai) stories transcend borders as they render the intimate lives of people striving for connection. WINNER OF THE AJL JEWISH FICTION AWARD • FINALIST FOR THE WINGATE PRIZE The Man Who Sold Air in the Holy Land announces the arrival of a natural-born storyteller of immense talent. Warm, poignant, delightfully whimsical, Omer Friedlander’s gorgeously immersive and imaginative stories take you to the narrow limestone alleyways of Jerusalem, the desolate beauty of the Negev Desert, and the sprawling orange groves of Jaffa, with characters that spring to vivid life. A divorced con artist and his daughter sell empty bottles of “holy air” to credulous tourists; a Lebanese Scheherazade enchants three young soldiers in a bombed-out Beirut radio station; a boy daringly “rooftops” at night, climbing steel cranes in scuffed sneakers even as he reimagines the bravery of a Polish-Jewish dancer during the Holocaust; an Israeli volunteer at a West Bank checkpoint mourns the death of her son, a soldier killed in Gaza. These stories render the intimate lives of people striving for connection. They are fairy tales turned on their head by the stakes of real life, where moments of fragile intimacy mix with comedy and notes of the absurd. Told in prose of astonishing vividness that also demonstrates remarkable control and restraint, they have a universal appeal to the heart.

Conserving Sea Turtles Nicholas Mrosovsky,1983 Turtles are big; A brief life history; The tagging reflex; Head-starting: the heart has its reasons; Operation green turtle; The styrofoam box story; Kemp's ridley in a technological fix; The anathema of farming; Four thousand unwanted turtles; Dangerous categories; The alarmist strategy; Problem resolving; Splitting: strategy or science?; An egg-laying machine.

Consider the Lobster David Foster Wallace,2007 Do lobsters feel pain? Did Franz Kafka have a sick sense of humour? What is John Updike's deal anyway? And who won the Adult Video News' Female Performer of the Year Award the same year Gwyneth Paltrow won her Oscar? David Foster Wallace answers these questions and more in his new book of hilarious non-fiction. For this collection, David Foster Wallace immerses himself in the three-ring circus that is the presidential race in order to document one of the most vicious campaigns in recent history. Later he strolls from booth to booth at a lobster festival in Maine and risks life and limb to get to the bottom of the lobster question. Then he wheedles his way into an L.A. radio studio, armed with tubs of chicken, to get the behind-the-scenes view of a conservative talkshow featuring a host with an unnatural penchant for clothing that only looks good on the radio. In what is sure to be a much-talked-about exploration of distinctly modern subjects, one of the sharpest minds of our time delves into some of life's most delicious topics.
