Subpar Parks Amber Share,2021-07-13 **A New York Times Bestseller!**
Based on the wildly popular Instagram account, Subpar Parks features both the greatest hits and brand-new content, all celebrating the incredible beauty and variety of America's national parks juxtaposed with the clueless and hilarious one-star reviews posted by visitors. Subpar Parks, both on the popular Instagram page and in this humorous, informative, and collectible book, combines two things that seem like they might not work together yet somehow harmonize perfectly: beautiful illustrations and informative, amusing text celebrating each national park paired with the one-star reviews disappointed tourists have left online. Millions of visitors each year enjoy Glacier National Park, but for one visitor, it was simply Too cold for me! Another saw the mind-boggling vistas of Bryce Canyon as Too spiky! Never mind the person who visited the thermal pools at

Yellowstone National Park and left thinking, "Save yourself some money, boil some water at home." Featuring more than 50 percent new material, the book will include more depth and insight into the most popular parks, such as Yosemite, Yellowstone, the Grand Canyon, and Acadia National Parks; anecdotes and tips from rangers; and much more about author Amber Share's personal love and connection to the outdoors. Equal parts humor and love for the national parks and the great outdoors, it's the perfect gift for anyone who loves to spend time outside as well as have a good read (and laugh) once they come indoors.

Extremely Loud & Incredibly Close Jonathan Safran Foer, 2005
Jonathan Safran Foer emerged as one of the most original writers of his generation with his best-selling debut novel, *Everything Is Illuminated*. Now, with humor, tenderness, and awe, he confronts the traumas of our recent history. What he discovers is solace in that most human quality, imagination. Meet Oskar Schell, an inventor, Francophile, tambourine player, Shakespearean actor, jeweler, pacifist, correspondent with Stephen Hawking and Ringo Starr. He is nine years old. And he is on an urgent, secret search through the five boroughs of New York. His mission is to find the lock that fits a mysterious key belonging to his father, who died in the World Trade Center on 9/11. An inspired innocent, Oskar is alternately endearing, exasperating, and hilarious as he careens from Central Park to Coney Island to Harlem on his search. Along the way he is always dreaming up inventions to keep those he loves safe from harm. What about a birdseed shirt to let you fly away? What if you could actually hear everyone's heartbeat? His goal is hopeful, but the past speaks a loud warning in stories of those who've lost loved ones before. As Oskar roams New York, he encounters a motley assortment of humanity

who are all survivors in their own way. He befriends a 103-year-old war reporter, a tour guide who never leaves the Empire State Building, and lovers enraptured or scorned. Ultimately, Oskar ends his journey where it began, at his father's grave. But now he is accompanied by the silent stranger who has been renting the spare room of his grandmother's apartment. They are there to dig up his father's empty coffin.

The Leopard Giuseppe Di Lampedusa, 2007-11-06 Set in the 1860s, *The Leopard* tells the spellbinding story of a decadent, dying Sicilian aristocracy threatened by the approaching forces of democracy and revolution. The dramatic sweep and richness of observation, the seamless intertwining of public and private worlds, and the grasp of human frailty imbue *The Leopard* with its particular melancholy beauty and power, and place it among the greatest historical novels of our time. Although Giuseppe di Lampedusa had long had the book in

mind, he began writing it only in his late fifties; he died at age sixty, soon after the manuscript was rejected as unpublishable. In his introduction, Gioacchino Lanza Tomasi, Lampedusa's nephew, gives us a detailed history of the initial publication and the various editions that followed. And he includes passages Lampedusa wrote for the book that were omitted by the original Italian editors. Here, finally, is the definitive edition of this brilliant and timeless novel. (Translated from the Italian by Archibald Colquhoun.)

The House in Paris Elizabeth Bowen,2019-06-05 One of Elizabeth Bowen's most artful and psychologically acute novels, *The House in Paris* is a timeless masterpiece of nuance and atmosphere, and represents the very best of Bowen's celebrated oeuvre. When eleven-year-old Henrietta arrives at the Fishers' well-appointed house in Paris, she is prepared to spend her day between trains looked after by an old friend of her grandmother's. Henrietta longs to see a few sights in the foreign city; little does she know what fascinating secrets the Fisher house itself contains. For Henrietta finds that her visit coincides with that of Leopold, an intense child who has come to Paris to be introduced to the mother he has never known. In the course of a single day, the relations between Leopold, Henrietta's agitated hostess Naomi Fisher, Leopold's mysterious mother, his dead father, and the dying matriarch in bed upstairs, come to light slowly and tantalizingly. And when Henrietta leaves the house that evening, it is in possession of the kind of grave knowledge usually reserved only for adults.

Statistical Mechanics James Sethna, 2006-04-07 In each generation, scientists must redefine their fields: abstracting, simplifying and distilling the previous standard topics to make room for new advances and methods. Sethna's book takes this step for statistical mechanics - a

field rooted in physics and chemistry whose ideas and methods are now central to information theory, complexity, and modern biology. Aimed at advanced undergraduates and early graduate students in all of these fields, Sethna limits his main presentation to the topics that future mathematicians and biologists, as well as physicists and chemists, will find fascinating and central to their work. The amazing breadth of the field is reflected in the author's large supply of carefully crafted exercises, each an introduction to a whole field of study: everything from chaos through information theory to life at the end of the universe.

Rewriting Dialectal Arabic Prehistory Alexander Borg, 2021-11-15

This study is the first attempt to reconstruct the prehistory of Arabic by examining lexical evidence of its symbiotic relationship with Ancient Egyptian already apparent from the Pyramid Texts (c. 2613–2181 BC).
