The Digital Double Bind Mohamed Zayani, Joe F. Khalil, 2024-01-16 The Middle East's digital turn has renewed hopes of socio-economic development and political change across the region, but it is also marked by stark contradictions and historical tensions. In this book, Mohamed Zayani and Joe F. Khalil contend that the region is caught in a digital double bind in which the same conditions that drive the state, market, and public immersion in the digital also inhibit change and perpetuate stasis.

The Digital Double Bind offers a path-breaking analysis of how the Middle East negotiates its relation to the digital and provides a roadmap for a critical engagement with technology and change in the Global South.

Handbook for Arabic Language Teaching Professionals in the 21st Century Kassem Wahba, Zeinab A. Taha, Liz England, 2014-06-03 This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: \*Background of Arabic Language Teaching; \*Contexts of Arabic Language Teaching; \*Communicative Competence in Arabic; \*The Learners; \*Assessment; \*Technology Applications; \*Curriculum Development, Design, and Models; \*Arabic Language Program Administration and Management; and \*Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around

the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

As a BlackBerry developer, you need an advanced skill set to successfully exploit the most compelling features of the platform. This book will help you develop that skill set and teach you how to create the most sophisticated BlackBerry programs possible. With Advanced BlackBerry Development, you'll learn you how to take advantage of BlackBerry media capabilities, including the camera and video playback. *Computers and Translation* Harold Somers, 2003-05-28 This volume is about computers and translation. It is not, however, a Computer Science book, nor does it have much to say about Translation Theory. Rather it is a book for translators and other professional linguists (technical writers, bilingual secretaries, language teachers even), which aims at clarifying, explaining and exemplifying the impact that computers have had and are having on their profession. It is about Machine Translation (MT), but it is also about Computer-Aided (or -Assisted) Translation (CAT), computer-based resources for translators, the past, present and future of translation and the computer. The editor and main contributor, Harold Somers, is Professor of Language Engineering at UMIST (Manchester). With over 25 years' experience in the field both as a researcher and educator, Somers is editor of one of the field's premier journals, and has written extensively on the subject, including the field's most widely quoted textbook on MT, now out of print and somewhat out of date. The current volume aims to provide an accessible yet not overwhelmingly technical book aimed primarily at translators and other users of CAT

software.

*Music and Media in the Arab World* Michael

Frishkopf, 2010-09-01 Since the turn of the twentieth century the dramatic rise of mass media has profoundly transformed music practices in the Arab world. Music has adapted to successive forms of media dissemination from phonograph cylinders to MP3, each subjected to the political and economic forces of its particular era and region. Carried by mass media, the broader culture of Arab music has been thoroughly transformed as well. Simultaneously, mass mediated music has become a powerful social force. While parallel processes have unfolded worldwide, their implications in the Arabic-speaking world have thus far received little scholarly attention. This provocative volume features sixteen new essays examining these issues, especially televised music and the controversial new genre of the music video. Perceptive voices both emerging and established represent a wide variety of academic disciplines. Incisive essays by Egyptian critics display the textures of public Arabic discourse to an English readership. Authors address the key issues of contemporary Arab society: gender and sexuality, Islam, class, economy, power, and nation as refracted through the culture of mediated music. Interconnected by a web of recurrent concepts, this collection transcends music to become an important resource for the study of contemporary Arab society and culture. Contributors: Wael Abdel Fattah, Yasser Abdel-Latif, Moataz Abdel Aziz, Tamim Al-Barghouti, Mounir Al Wassimi, Walter Armbrust, Elisabeth Cestor, Hani Darwish, Walid El Khachab, Abdel-Wahab Elmessiri, James Grippo, Patricia Kubala, Katherine Meizel, Zein Nassar, Ibrahim Saleh, Laith Ulaby.

**Networked Publics and Digital Contention** Mohamed

Zayani, 2015-08-03 How is the adoption of digital media in the Arab world affecting the relationship between the state and its

subjects? What new forms of online engagement and strategies of resistance have emerged from the aspirations of digitally empowered citizens in the Middle East and North Africa?

*Networked Publics and Digital Contention* narrates the story of the co-evolution of technology and society in Tunisia, the birthplace of the Arab uprisings. It explores the emergence of a digital culture of contention that helped networked publics negotiate their lived reality, reconfigure power relations, and ultimately redefine the locus of politics. It broadens the focus from narrow debates about the role that social media played in the Arab uprisings toward a fresh understanding of how changes in media affect the state-society relationship over time. Based on extensive fieldwork, in-depth interviews with Internet activists, and immersive analyses of online communication, this book draws our attention away from the tools of political communication and refocuses it on the politics of communication. An original contribution to the political sociology of media, *Networked Publics and Digital Contention* provides a unique perspective on how networked Arab publics reimagine citizenship, reinvent politics, and produce change.

**Proceedings 2003 Symposium on Document Image Understanding Technology** David Doermann, 2003

Combating Terrorism William C. Banks, Renée de Nevers, Mitchel B. Wallerstein, 2008 Countering terrorism tops the list of America's devilish set of problems. Americans deal with terrorism and the threat of terrorism through enhanced investigative tools in hopes of interdicting terrorism before it strikes; as a law enforcement issue; as a matter for international cooperation and diplomacy; and as a species of war best fought by the military. These approaches are not mutually exclusive, nor are they exhaustive. Nor have they, or will they, be successful all of the time. But as a central focus of U.S. national security strategy, the stakes couldn't be higher. In ten comprehensive chapters, *Combating Terrorism* discusses tools and tactics for dealing with this ever-changing challenge, with a focus on how they operate in

the real world. Additionally readers are encouraged to explore why terrorists might strike and what might be done to ameliorate root causes. The authors also discuss the dynamics of homeland security planning and recovery, with an examination of the crucial role of the media and our government's public affairs function in crisis situations. Each chapter features a series of case studies designed to give students a quick study of actual terrorist actions and the counter strategies at work, offering further insight into the complexities of combating terrorism.
