**Inside Arabic Music** Johnny Farraj, Sami Abu Shumays, 2019-07-18 What makes hundreds of listeners cheer ecstatically at the same instant during a live concert by Egyptian diva Umm Kulthum? What is the unspoken language behind a taqsim (traditional instrumental improvisation) that performers and listeners implicitly know? How can Arabic music be so rich and diverse without resorting to harmony? Why is it so challenging to transcribe Arabic music from a recording? Inside Arabic Music answers these and many other questions from the perspective of two insiders to the practice of Arabic music, by documenting a performance culture and a know-how that is largely passed on orally. Arabic music has spread across the globe, influencing music from Greece all the way to India in the mid-20th century through radio and musical cinema, and global popular culture through Raqs Sharqi, known as Bellydance in the West. Yet despite its popularity and influence, Arabic music, and the maqam scale system at its heart, remain widely misunderstood. Inside Arabic Music de-mystifies maqam with an approach that draws theory directly from practice, and presents theoretical insights that will be useful to practitioners, from the beginner to the expert - as well as those interested in the related Persian, Central Asian, and Turkish makam traditions. Inside Arabic Music's discussion of maqam and improvisation widens general understanding of music as well, by bringing in ideas from Saussurean linguistics, network theory, and Lakoff and Johnson's theory of cognition as

metaphor, with an approach parallel to Gjerdingen's analysis of Galant-period music - offering a lens into the deeper relationships among music, culture, and human community.

*Aktuboo: Mastering the Arabic Script* Amy Michelle Mosier, 2015-09-11 Written from an American perspective, *Aktuboo: Mastering the Arabic Script* seeks to remove the anxiety of learning not only the Arabic language but its script too. It teaches Modern Standard Arabic, the most ubiquitous dialect in the Middle East. Besides gently guiding you into the Arabic language, it also contains a wealth of cultural information and so it's ideal for Egyptphiles, travelers and Christian missionaries. \* Use mnemonics to help you remember the Arabic alphabet. \* Practice reading Arabic by first reading English words written in Arabic. \* Transition easily from cognates to true Arabic words. \* Develop good grammar by examining generic sentences. \* Learn how to conjugate at least 50 common verbs. The assistance I had from many Arab people for the translation samples is uncredited.

*The Arabic Classroom* Mbaye Lo, 2019-04-12 The *Arabic Classroom* is a multicontributor work for trainee and in-service teachers of Arabic as a foreign language. Collected here is recent scholarly work, and also critical writing from Arabic instructors, Arabists and language experts, to examine the status of the teaching and learning of Arabic in the modern classroom. The book stresses the inseparability of the parameters of contexts, texts and learners in the effective

Arabic classroom and investigates their role in enhancing the experience of teaching and learning Arabic. The book also provides a regional perspective through global case studies and encourages Arabic experts to search for better models of instruction and best practices beyond the American experience.

**Handbook for Arabic Language Teaching  
Professionals in the 21st Century** Kassem

Wahba, Zeinab A. Taha, Liz England, 2014-06-03 This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders

in the field are organized around nine themes: \*Background of Arabic Language Teaching; \*Contexts of Arabic Language Teaching; \*Communicative Competence in Arabic; \*The Learners; \*Assessment; \*Technology Applications; \*Curriculum Development, Design, and Models; \*Arabic Language Program Administration and Management; and \*Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

Speed up your Arabic Sebastian Maisel, 2015-03-27 Pronunciation, spelling, the concept of roots and patterns and idiomatic phrases are just some of the areas that cause confusion for students of Arabic. Learning how to avoid the common errors that arise repeatedly in these areas is an essential step in successful language learning. Speed Up Your Arabic is a unique and innovative resource that identifies and explains the most commonly made errors, enabling students to learn from their mistakes and enhance their understanding of the Arabic language. Each of the nine chapters focuses on a grammatical category where English speakers

typically make mistakes in Arabic. Each chapter is divided into sections that classify the concepts and errors into subcategories. Full explanations are provided throughout with clear, comprehensive examples and exercises to help the learner gain an in-depth understanding of Arabic grammar and usage. Key features: Carefully selected grammar topics and examples based on the most commonly made errors Comprehensive explanations of the most difficult grammar points help learners gain an in-depth understanding of Arabic grammar and usage. Exercises throughout reinforce learning and link theory to practice A complete answer key making it ideal for self-study A glossary of grammatical terms, an Arabic-English glossary and a bibliography to aid learning Useful drills and listening samples available for free download at <http://www.routledge.com/books/details/9780415660556/> Suitable both for classroom use or self-study, Speed Up Your Arabic is the ideal resource for all intermediate learners of Arabic wishing to refine their language skills.

**Novel Text Entry and Mobile Interaction Techniques for Arabic Language Users** Karim Mohsen Mahmoud El Batran, 2015 Inspired by an observational study of Egyptian Agricultural Census counters, this research aims to improve mobile data entry through better form navigation and improved Arabic text entry. Four improvements were taken into consideration in sequence: (1) minimizing large forms to fit small mobile device screens and easing form navigation process, (2) optimizing Arabic keyboard layout to suit Arabic Language users, (3) introducing Gesture-based

Arabic Writing Pads (GBAWPs) that fit small mobile device screens and smart watch surfaces, and (4) enhancing a quantitative prediction model to overcome the defect in modeling interactions on mobile devices. This research shows an improvement of form navigation on mobile devices. The approach is based on computerizing forms and using Panning and Zooming as a navigation technique. In order to do so, an observational study was conducted on the Egyptian Agricultural Census (EAC). However, there were considerable challenges in reducing the size of the paper forms to fit mobile devices and introducing fast navigation technique. It was concluded after computerizing the forms that using the Panning and Zooming technique scored less completion task time and workload in comparison to the tabbed navigation technique. Moreover, this research presents a new design of an Arabic keyboard layout for effective text entry on touch screen mobile phones. The approach is based on Pareto front optimization using three metrics: minimizing finger travel distance in order to maximize speed, minimizing neighboring key error ambiguities in order to maximize the quality of spell correction, and maximizing familiarity for Arabic Language users through approximate alphabetic sorting. In user studies, the new layout showed an observed improvement in typing speed in comparison to a common Arabic layout. Currently, there is an opportunity to research new optimized keyboard designs with less usage experience than QWERTY as in mainstream Western European languages. Pareto optimization can produce high quality keyboards for alphabet based

languages that could be beneficial when there is less reluctance to change from QWERTY. Furthermore, this research also illustrates Gesture-based text entry as a method used for mobile devices. Its success and acceptance is critically dependent on the reliability of gesture recognition. The gesture recognition of the GBAWP is accomplished through a sequence of touched points or swipes on the screen. In order to maximize the text area field and minimize the number of keys displayed on the screen, a 12-key GBAWP interface was introduced appearing like a 12-key physical keypad phone. Considering the Arabic letters characteristics, structure, and maximizing speed, a 6-key GBAWP layout based on dot recognition was introduced. After conducting usability tests on both the 12-key and 6-key GBAWP, it was found that users could perform text entry on mobile devices using the 12-key GBAWP with an estimate of 2.9 words-per-minute on average. They also executed text entry tasks on a Sony SmartWatch 2 with an average of 3.2 words-per-minute. This could increase to an estimate of 4.5 words-per-minute on average, on the long term. While entry speeds were slow, users found it easy to use and it supports largely eyes free interaction. Gesture-based technique enables users to perform Arabic text entry on small display mobile devices and watches using both the 12-key and 6-key GBAWP. Finally, this research introduces an enhancement to KLM (Keystroke-Level Model), a quantitative prediction model predicting the user's behaviour in low-level tasks. This was accomplished by extending it with three new

operators describing interactions on mobile touchscreen devices and tablets. The approach is based on Fitts' Law to identify a performance measure estimate equation for each of the introduced interactions. Three prototypes were developed to serve as a test environment in validating Fitts equations and estimating the parameters for these interactions. Three-thousand and ninety observations took place with a total of 51 users. The studies confirmed that most interactions fitted well with Fitts' Law. On the other hand, it was noticed that Fitts' Law does not fit well on small mobile device screens when the Index of Difficulty exceeds 4 bits. These results enable developers of mobile device and tablet applications to describe tasks as a sequence of operators used and predict user interaction times prior to creating prototypes.

*A History of Arab Graphic Design* Bahia Shehab, Haytham Nawar, 2020-12-15 The first-ever book-length history of Arab graphic design PROSE AWARD WINNER, ART HISTORY & CRITICISM Arab graphic design emerged in the early twentieth century out of a need to influence, and give expression to, the far-reaching economic, social, and political changes that were taking place in the Arab world at the time. But graphic design as a formally recognized genre of visual art only came into its own in the region in the twenty-first century and, to date, there has been no published study on the subject to speak of. *A History of Arab Graphic Design* traces the people and events that were integral to the shaping of a field of graphic design in the Arab world. Examining the work of

over eighty key designers from Morocco to Iraq, and covering the period from pre-1900 to the end of the twentieth century, Bahia Shehab and Haytham Nawar chart the development of design in the region, beginning with Islamic art and Arabic calligraphy, and their impact on Arab visual culture, through to the digital revolution and the arrival of the Internet. They look at how cinema, economic prosperity, and political and cultural events gave birth to and shaped the founders of Arab graphic design. Highlighting the work of key designers and stunningly illustrated with over 600 color images, *A History of Arab Graphic Design* is an invaluable resource tool for graphic designers, one which, it is hoped, will place Arab visual culture and design on the map of a thriving international design discourse.

Introduction to Arabic Natural Language Processing Nizar Y. Habash, 2022-06-01 This book provides system developers and researchers in natural language processing and computational linguistics with the necessary background information for working with the Arabic language. The goal is to introduce Arabic linguistic phenomena and review the state-of-the-art in Arabic processing. The book discusses Arabic script, phonology, orthography, morphology, syntax and semantics, with a final chapter on machine translation issues. The chapter sizes correspond more or less to what is linguistically distinctive about Arabic, with morphology getting the lion's share, followed by Arabic script. No previous knowledge of Arabic is needed. This book is designed for computer scientists and linguists

alike. The focus of the book is on Modern Standard Arabic; however, notes on practical issues related to Arabic dialects and languages written in the Arabic script are presented in different chapters. **Text Entry Systems** I. Scott MacKenzie, Kumiko Tanaka-Ishii, 2010-07-28 Text Entry Systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry, in terms of design strategy, evaluation methodology, and requirements; a discussion of the history and current state of the art of entry systems; and specific guidelines for designing entry systems for a specific target, depending on devices, modalities, language, and different physical conditions of users. Text entry has never been so important as it is today. This is in large part due to the phenomenal, relatively recent success of mobile computing, text messaging on mobile phones, and the proliferation of small devices like the Blackberry and Palm Pilot. Compared with the recent past, when text entry was primarily through the standard qwerty keyboard, people today use a diverse array of devices with the number and variety of such devices ever increasing. The variety is not just in the devices, but also in the technologies used: entry modalities have become more varied and include speech recognition and synthesis, handwriting

recognition, and even eye-tracking using image processing on web-cams. Statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry – increasingly, the way people communicate. This book covers different aspects of text entry systems and offers prospective researchers and developers Global guidelines for conducting research on text entry, in terms of design strategy, evaluation methodology, and requirements History and current state of the art of entry systems, including coverage of recent research topics Specific guidelines for designing entry systems for a specific target, depending on devices, modalities, language, and different physical conditions of users

**The Diffusion of “Small” Western Technologies in the Middle East** Uri M. Kupferschmidt, 2023-10-04 In recent years we have become interested in the diffusion of “small” Western technologies in the countries of the Middle East during the 19th and 20th centuries, the era of Imperialism and first globalization. We postulated a contrast between

“small” and “big” technologies. Under the latter category we may understand railway systems, electricity grids, telegraph networks, and steam navigation, imposed by foreign powers or installed by connected local entrepreneurs. But many “small” Western technologies, such as sewing machines, typewriters, pianos, eyeglasses, and similar consumer goods, which had been developed and manufactured in Europe and America, were wanted, and willingly acquired by the agency of individual users elsewhere. In a few cases, however, the inventions had to be adapted, or were overstepped, and even delayed. Some were adopted as social markers or status symbols only by elites who could afford them. Processes of adoption and diffusion therefore differed according to cultural settings, preferences, and needs. Social and cultural historians, and social scientists, not only of the Middle East, will find in this collection of essays a new approach to the impact of Western technological inventions on the Middle East.
