Yoga Mircea Eliade,1958 In this landmark book the renowned scholar of religion Mircea Eliade lays the groundwork for a Western understanding of Yoga, exploring how its guiding principle, that of freedom, involves remaining in the world without letting oneself be exhausted by such conditionings as time and history. Drawing on years of study and experience in India, Eliade provides a comprehensive survey of Yoga in theory and practice from its earliest foreshadowings in the Vedas through the twentieth century. The subjects discussed include Patañjali, author of the Yoga-sutras; yogic techniques, such as concentration on a Single Point, postures, and respiratory discipline; and Yoga in relation to Brahmanism, Buddhism, Tantrism, Oriental alchemy, mystical erotism, and shamanism.

Cognitive Semantics Jens S. Allwood,Peter Gärdenfors,1999 Toward the end of the 20th century, there is both a dissatisfaction with existing formal semantic theories and a wish to preserve insights from other semantic traditions. Cognitive semantics, the latest of the major trends which

have dominated the century, attempts to do this by focusing on meaning as a cognitive phenomenon. This book provides different perspectives on meaning as a cognitive phenomenon. Jens Allwood presents an approach where meaning is analyzed in terms of context sensitive cognitive operations. Peter Gärdenfors examines the relationship between cognitive semantics and standard formal extensional and intensional semantics. Peter Harder discusses the relation between functionalism and cognitive semantics. Sören Sjöström and +ke Viberg extend a cognitive semantic approach to new empirical domains like vision and physical contact. Elisabeth Engberg Pedersen extends the use of cognitive semantics even further in order to analyze deaf sign language and, finally, Kenneth Holmqvist and Jordan Zlatev discuss two different possibilities of implementing a cognitive semantic approach using computer programs. The variety of perspectives on cognitive semantics make this book suitable as course material.

Ancient Egyptian Coffins John H. Taylor, Marie Vandenberg, 2018 This volume contains the proceedings of the twenty-third Annual Egyptological Colloquium, held at the British Museum in 2014, augmented by additional papers. The twenty-three contributions investigate functionality, iconography and manufacture of ancient Egyptian coffins from the First Intermediate Period to the eighth century AD. The authors explore the conceptual aspects which lay behind the production of coffins through the study of iconography and texts, examining the functional role of these complex objects as 'structured compositions' which were designed to play an important part in transforming the deceased occupants and perpetuating their existence beyond death. Reinstating coffins in their archaeological and societal contexts, the papers reflect on the circumstances in which they were made, considering workshop practices and regional variability, and studying coffins not only individually but also as components of larger conceptual entities in which the mummy, the burial chamber and the tomb itself all had specific meanings. Several contributions focus on areas of current interest, such as the post-burial adaptation and reuse of coffins, considering how these issues relate to the economic environment in which they were made and to changing attitudes towards the immutability of burial arrangements.

Towards Realization of the Higher Intentions of Islamic Law Gamal Eldin Attia, 2007-01-01 This book takes an important step towards the realization of the higher intentions of the Islamic law. First, it opens the door towards the integration of contemporary values and worldview into the maqasid terminology. This is carried out via the sections on the role of reason and experience in identifying maqasid. Secondly, the book gives answers to the complex theoretical questions on the role of maqasid in ijihad, juristic theorization (usul), and the Islamization of the human, social, and physical sciences. Last, but not least, the book highlights the role and the necessity of a 'maqasid-informed' mindset on the intellectual and communal levels, and takes a pioneering futuristic look into this very important branch of Islamic knowledge. Maqasid al-Shariah (Higher Intentions of the Islamic Law) is the most promising tool for the 'contemporization' of Islamic law and its philosophical foundations. It is also - as this book reveals - a promising tool for the realization of Islamic values and principles in the realms of judiciary, society, and even science.

Cigarette Girl Ratih Kumala, 2017-01-30 Savour the familiar scent of clove and tobacco ... for this is the aroma of Indonesia's history. Soeraja is dying. On his deathbed he calls for Jeng Yah, a woman who is not his wife. His three sons, Lebas, Karim and Tegar - heirs to Kretek Djagad Raja, Indonesia's largest clove cigarette empire - are shocked, and their mother is consumed by jealousy. So begins the brothers' search into the deepest recesses of Java for Jeng Yah, to fulfil their father's dying wish and to learn the truth about the family business and its secrets. Cigarette Girl is more than just a love story and the soul-searching journey of three brothers. Set on the island of Java the story follows the evolution of a family's kretek, or clove cigarette, business from its birth in the Dutch East Indies of the early 1940s, and it takes readers through three generations of Indonesian history, from the Dutch colonial era to the Japanese occupation, the struggle for independence and the bloody coup of 1965 in which half a million Indonesians were hunted down and killed. Rich in detail, with characters who struggle to right the wrongs of past generations, their relationships

torn apart by the viciousness of revolution and politics, Cigarette Girl introduces readers to the history of Indonesia through clove cigarettes and unrequited love.

It contains certain additions and corrections to the first systematic and detailed history of a Modern Indo-Aryan Language written by an Indian, and incidentally, as it is comparative in its treatment, taking into consideration facts in other Indo-Aryan speeches, it is an invaluable contribution to the scientific study of the Modern Indo-Aryan languages as a whole. Children's Drawings Georges Henri Luquet, 2001 Interest in children's drawings is contemporary with the birth of modern psychology but as yet there is no psychological theory that successfully accounts for the nature of children's drawing. The two main theories, visual realism and intellectual realism, fall short. The work of Georges-Henri Luquet is important because it goes beyond both theories. Luquet's work, though important and of interest to developmental psychologists, remains untranslated to date and so is often inaccurately cited. This translation of *Le Dessin Enfantin* makes Luquet's ideas available to a wider readership for the first time.

Fate of Pharmaceuticals in the Environment and in Water Treatment Systems Diana S. Aga, 2007-12-26 The detection of pharmaceutical residues remained elusive until instruments such as liquid chromatography and mass spectrometry became commonplace in environmental laboratories. The documentation of the occurrence of pharmaceutical residues and endocrine disrupting chemicals in water resources has raised questions about their long-term effects in the ecosystem and their potential effects on human health. *Fate of Pharmaceuticals in the Environment and in Water Treatment Systems* covers critical issues regarding the occurrence, persistence, treatment, and transformations of pharmaceuticals in the environment and in drinking water and wastewater treatment systems. A compilation of the recent literature, the book reviews advances in instrumentation and sample preparation techniques and includes an example of how risk assessment is conducted to investigate the fate and effects of pharmaceutical contaminants. Several chapters explore the behavior of pharmaceuticals in soil and the potential side effects of antibiotics on plants after uptake. Experts in drinking water and wastewater treatment systems present new findings on the effectiveness of current treatment practices to reduce the concentrations of pharmaceuticals at the source, providing new insights on how to better mitigate future problems brought about by emerging environmental contaminants. Contributing authors from academia, government, and industry provide a well-balanced multi-disciplinary perspective on the issues, discussing topics ranging from field studies documenting the occurrence of pharmaceuticals in environmental compartments, to laboratory studies determining the degradation kinetics and formation of by-products during treatment. The text discusses the

factors that affect the environmental fate of pharmaceuticals in soil and water, facilitate the development of best management practices, and optimize treatment systems for removal of these compounds from the environment.
