The ART of BAREBOW Shooting Martin L Godio,2020-10-02 There are many books about shooting Compound and Recurve bows but no book deals with the specific problems of the BAREBOW archer, as this book does. It presents a systematic, biomechanically efficient BAREBOW technique. A starting point to help you decide how you shoot and settle on your own shooting style, it will still serve as your guide for many years of competitive and enjoyable archery. Archery is a performance sport, no matter how good your aim if you fail in the shot execution, you miss. The shooting process is what makes you accurate and a biomechanically efficient BAREBOW technique will make this easier. The techniques described in this book are relevant to any barebow or traditional archer, not just Stringwalkers. Correct use of muscles, joints, and bones is needed to ensure energy is not wasted. This requires good alignment, proper use of archer's back muscles, and the transfer of the archer's effort into the back before allowing expansion to happen naturally. This book explains how to achieve

this and details training methods and tools, including some notes for those participating in 3D and Field Archery. Target Panic is the most overlooked problem of BAREBOW archery. It is vital to know how to prevent it. The essential mental control is integrated throughout the description of the shooting process. Once you already have it, you have only two options: to conquer it or to suffer from it for the rest of your archery life. Consequently, Target Panic is addressed in depth. The module devoted to the mental side of BAREBOW archery includes an explanation of Target Panic and presents methods to reassert control and overcome it. The mental systems used to learn how to prepare yourself for competition and then perform under pressure are also explained. NOTE: This book does not set out to teach the very basics of how to shoot a bow. It is advisable to learn the early steps of shooting a bow under the supervision of a competent coach.

The Book of Archery George Agar Hansard, 1841 In the Paleolithic era, over 250,000 years ago, archery was invented. With bows and arrows made from wood (mostly pine), archery was presumably used only for hunting. As technology advanced, stone arrowheads were fashioned on the ends of arrows, making them more effective. Archery arrived in the Americas around 2,500 BC. While archery was mostly used for hunting, the tribes of the Southern United States created a game that involved shooting arrows into a moving hoop. The Indian tribes of the Great Plains were the first to become adept at archery on horseback. During the Iron Age, Babylonians and Assyrians used archery in warfare. Just as Native American tribes learned to perfect archery on horses, these peoples became skilled in archery on moving war chariots. Into the Middle Ages, European warfare relied heavily on both skilled and unskilled archers. Implementing mass archery tactics during the Crusades, the English invented their own bow, the English long bow, one of the most popular styles to this day. Today, archery is an Olympic sporting event, a skill used in recreational hunting, and somewhat of a lost art. Recently, archery has become a bit of a fad in America and the United Kingdom because of the rise in popular culture of archers like Robin Hood, Green Arrow and The Hunger Games' Katniss Everdeen.
