Journal of Interdisciplinary Science Topics, Volume 6 Cheryl Hurkett,2017-06-09 The Journal of Interdisciplinary Science Topics (JIST) forms part of the 'Interdisciplinary Research Journal' module in the third year of both the BSc and MSci Natural Science degrees. It is intended to provide students with hands-on experience of, and insight into, the academic publishing process. The activity models the entire process from paper writing and submission, refereeing other students' papers, sitting on the editorial board that makes final decisions on the papers, to finally publishing in an online journal. This book is a compilation of the papers written by undergraduate students that were published during the 2016/2017 academic year.

E-Learning in the 21st Century D. Randy Garrison,2011-03 The second edition of E-Learning in the 21st Century provides a coherent, comprehensive, and empirically-based framework for understanding e-learning in higher education. Garrison draws on his decades of experience and extensive research in the field to explore the technological, pedagogical, and organizational implications of e-learning. Most importantly, he provides practical models that educators can use to realize the full potential of e-learning. This book is unique in that it focuses less on the long list of ever-evolving technologies and more on the search for an understanding of these technologies from an educational perspective. The second edition has been fully revised and updated throughout and includes discussions of social media and mobile learning applications as well as other emerging technologies in today's classrooms. This book is an invaluable resource for courses on e-learning in higher education as well as for researchers, practitioners and senior administrators looking for guidance on how to successfully adopt e-learning in their institutions.

Edward I's Granddaughters Louise Wyatt,2023-06-30 Edward I and his offspring, especially Edward II, are not shrouded by the mists of time. Edward I's two sons and daughter by his second marriage are lesser known, especially the eldest, Thomas Plantagenet of Brotherton. He made no particular impression on history, despite being Earl of Norfolk and Earl Marshal, but Thomas did father three children. Of these, only one is usually remembered: Margaret of Norfolk. Indomitable, defiant, respected and fiercely intelligent, she defied her cousin Edward III more than once and outlived most of her family. Her brother Edward of Norfolk died young but her sister, Alice of Norfolk, survived childhood. But not for long. In 1338, by the time she was fourteen, Alice was

married to Sir Edward Montagu, younger brother of the famous earl of Salisbury, William Montagu and Bishop of Ely, Simon Montagu. Edward was a warrior knight at Crecy, involved in the wars with Scotland, loyal to his brother and his king. The marriage produced five children within a decade, but by 1350 Edward Montagu was showing his dark side and was part of the knightly criminal gangs that terrorized local areas. One day in June 1351, Alice of Norfolk paid the price. Despite being a Plantagenet, daughter of an earl, granddaughter, niece and cousin to kings, Alice of Norfolk has mostly been forgotten. Even looking at contemporary records, Alice hardly features apart from land and property dealings with her husband. A dusty reference to the unfortunate circumstances of her death marks the end of her life and one which will more than likely remain a mystery.

The Next Generation of Distance Education Leslie Moller,Jason B. Huett,2012-02-07 The world of education is being radically altered with the change being driven by technology, openness, and unprecedented access to knowledge. Older correspondence-style methods of instructional delivery are passé and "classroom adapted to the web" approaches to learning are often ineffective and do little to harness the transformational potential of technology. E-Learning scenarios, mobile technologies, communication and information access, and personal learning environments are becoming mainstream and, as a result, control of the learning process is shifting away from institutions and into the hands of learners. This volumes promotes a forward-thinking agenda for research and scholarship that highlights new ideas, deep insights, and novel approaches to "unconstrained" learning.

Thinking Collaboratively D. Randy Garrison,2015-06-05 Thinking Collaboratively is a theoretical and practical guide to thinking and learning in deep and meaningful ways within purposeful communities of inquiry. Critical thinking has long been recognized as an important

educational goal but, until now, has largely been conceived and operationalized as an individual attitude and ability. Increasingly, however, a more relevant and complete cognitive construct has been emerging: thinking collaboratively. Thinking collaboratively is the means to inquire, test, and apply new understandings, and to make sense of the information that bombards us continuously. In short, thinking collaboratively is required to flourish in our highly connected world and, in this book based on more than a decade of research, Garrison provides an essential introduction to this vital concept.

Transferring Language Learning and Teaching From Face-to-Face to Online Settings Giannikas, Christina Nicole,2022-02-18 Language teaching programs have to respond to the need for distance education, with teachers working to transfer their material onto online platforms and/or learning

management systems (LMS) even though their materials are not designed with distance learning in mind. COVID-19 has led to English language teaching programs extending their teaching online for the unforeseeable future and trying to adjust the material to deliver high-quality practice. The education emergency caused by the COVID-19 pandemic has revealed that the world needs an education system that favors flexibility and resilience to equip educators to face unpredictable emergencies that may arise. Transferring Language Learning and Teaching From Face-to-Face to Online Settings examines the phenomenon of emergency language education further and provides an avenue for language teachers and researchers to share their experience, thoughts, and suggestions about transferring their material and teaching approaches from face-to-face (f2f) to an online setting. The edited volume offers a platform for exploring how the field of language teaching is adapting to changes that have derived from the pandemic, with a strong focus on the challenges faced and ways to move forward.
