The Book of Archery George Agar Hansard, 1841 In the Paleolithic era, over 250,000 years ago, archery was invented. With bows and arrows made from wood (mostly pine), archery was presumably used only for hunting. As technology advanced, stone arrowheads were fashioned on the ends of arrows, making them more effective. Archery arrived in the Americas around 2,500 BC. While archery was mostly used for hunting, the tribes of the Southern United States created a game that involved shooting arrows into a moving hoop. The Indian tribes of the Great Plains were the first to become adept at archery on horseback. During the Iron Age, Babylonians and Assyrians used archery in warfare. Just as Native American tribes learned to perfect archery on horses, these peoples became skilled in archery on moving war chariots. Into the Middle Ages, European warfare relied heavily on both skilled and unskilled archers. Implementing mass archery tactics during the Crusades, the English invented their own bow, the English long bow, one of the most popular styles to this day. Today, archery is an Olympic sporting event, a skill used in recreational hunting, and somewhat of a lost art. Recently, archery has become a bit of a fad in America and the United Kingdom because of the rise in popular culture of archers like Robin Hood, Green Arrow and The Hunger Games' Katniss Everdeen.

The History of Archery Theodore R. Whitman, 2017-08-03 Learn all about the history, development and current state of History of Archery in this collection of articles by author/expert Theodore R. Whitman. From its beginnings in the Epipaleolithic period, progress through ancient history and the middle ages; and continuing through to the present day, this interesting book covers archery through many periods of human history. The bow & arrow are known to have been invented by the end of the Upper Paleolithic, and for at least 10,000 years archery was an important military & hunting skill, and is featured prominently in the mythologies of many cultures. Archers, whether on foot, in chariots and on horseback were a major part of most militaries until about 1500 when they began to be replaced by firearms, first in Europe, and then progressively elsewhere.

How to Shoot the Longbow Hugh D. H. Soar,2015 A Leading Expert on

Traditional Archery Offers Insight Into How the Longbow Was Drawn from Medieval Sources to Modern Recreations Soar's book [The Crooked Stick] is indispensable.--Bernard Cornwell, New York Times bestselling author Relying on more than fifty years' experience in archery, historian Hugh D. H. Soar reflects on how the longbow was drawn and shot across the centuries through examining the design of the bow and early literature about the bow, combined with his and his colleagues' applied knowledge using replica bows. No complete medieval longbow has survived, but those found aboard the Tudor warship Mary Rose provide the best archaeological evidence to the possible construction of the medieval bow. Contemporary treatises written about the proper manner of shooting the bow, together with the resurgence in interest and construction of replica bows beginning in the late sixteenth century that form part of the author's collection provide the basis for this work. How to Shoot the Longbow: A Guide from Historical and Applied Sources is a fascinating and practical look at the use of a legendary invention.
