*The Impossible Bow* Nicholas Tomihama, 2011-09 Archery is almost as old as mankind itself, manifesting in almost every culture and on almost every continent. It is in many ways our link to the past and the stepping stone into another age. It is one of the few ancient pastimes that are still relevant today. Yet nowadays, getting into the ancient sport of archery can be daunting for the average person with no experience or previous exposure to the subject. For many, the hefty price tags on modern bows or the seemingly impossible task of building a bow can be a surefire deterrent. Many do not want to pay the price of a decent bow to try their hand at the bow and arrow, simply to see if they enjoy it or not. If only there was a way to make a bow good enough for a beginner without expending or gambling an immense amount of time or money on it. What if you were told that there was such a bow? That hidden in the ground, in the heart of buildings, on the shelves of most hardware stores, and perhaps even in your home, there was a material that made it all possible? Would you believe it? Well it is true, and that material is PVC pipe, the white or gray plastic pipe that can be found virtually everywhere. It is possible with only a minimal investment and an hour of labor to make a fine bow for target archery that performs just as well as bows worth more than ten times as much. A bow that, if given a little more time and effort, can be made into an efficient hunting tool or serious target shooter. The Impossible Bow shows you how to construct your own PVC pipe bow, with bows ranging from the incredibly simple to the incredibly complex. Learn to build simple bows that require a minimum of tools and little time, more complex bows that can be modified to fit the target archer as well as the experienced hunter looking for more of a challenge, and finally a bow that accurately replicates the weapons of war of the steppe nomads. The best part is that even the most complex bow should cost no more than 10 dollars and be completed in a day, yet can hold up to the rigors of daily use. Don't let anything hold you back from enjoying one of man's oldest and most noble of sports. Join the backyard archery revolution with your very own bow that will defy everything you know and will baffle anyone who sees it. Join me in building an impossible bow. Author's Notes: The bows in this book are great for kids of all ages, from the young to the young at heart. Because of the ability of these bows to mimic many historical bow designs, this book is great for re-enactment archery as well as for the target archer. If made well, one design in particular works well for hunting, and can be modified to work just as well as many primitive hunting bows. This book covers how to make the generic PVC pipe bow that has been the mainstay of do-it-yourself archery for some time now, as well as a couple designs which bring out the hidden performance of PVC as a bow material. These bows also work well for survival situations and can be made small and can be kept virtually anywhere out of the sun. In the trunk of a car, in a boat, in a hunting cabin, your basement, your attic, the list goes on and on. This book goes over how to make smooth shooting bows from 30 to 70 pounds of pull that can perform well if taken care of. While they aren't top performing bows, they can certainly be used for hunting, fishing, and target archery.

**Archery** Dawson Albert, 2019-05-29 How To Hit A Bull's Eye In A Day With The Royal Discipline Of Archery "An archer cannot hit the bullseye if he doesn't know where the target is." Did you ever wish you could shoot arrows like Robin Hood, Hawkeye or Katniss Everdeen? Whenever you watch the Lord of the Rings, you imagine how powerful it must be to step in the shoes of Legolas... ...face your target ...draw back your bow ....and just shoot. Yet, you push the thought into the corner of stupid childhood dreams, knowing archery is just for entertaining movie scenes. You are wrong. The medieval way of hunting turned into a royal discipline for everyone who wants to improve their confidence and become quicker than the fastest animal in the world. Yes, your laser-sharp focus could even help you catch a cheetah. Yet, archery is much more than just a safari hunt. Archery was one of the first disciplines in the Olympic games and the latest gold medal winner Ku-Bon-Chan proves why it is a tough sport that needs practice and the right strategy. Becoming the next Legolas requires much more than randomly picking an arrow from your quiver. And even if you just want to rediscover your inner child, it is much more fun to shoot arrows in the woods if you know how to hit your target. No one wants to miss their goal. Good thing, if you follow this simple but effective plan to get to the next level, you can improve your skill set within just one practice. How many times have you started on something and given up within a week because you got frustrated? A lot of people share this story. They start a new thing without any knowledge and expect themselves to be perfect within the first couple of shots. Perfection might never be possible in the golden sports of archery. Yet, you can instantly succeed and hit your first target if you know how. In "Archery", you'll discover:

- How to start your Legolas journey and bring Lord of the Rings into reality
- What are the Dos and Don'ts to build a strong foundation in archery
- How to make sure your arrow doesn't hit your neighbor's dog
- Where to look for the bullseye
- How to practice without even touching your bow and arrow
- 9 common mistakes to avoid and take the shortcut to success
- Which bow will turn archery into a piece of cake
- How to maintain your golden instrument
- Tournaments for everyone from absolute beginner to Olympic star
- How much pocket money you need to become an archer

And much more. No matter if you want to go at your own pace and enjoy some exercise or if you want to become an Olympian. If you want to increase confidence, focus and quick response time, archery is your sport. Even if you are the most uncoordinated person in the world, the given strategies will help you to catch your perfect meal next time you are lost in the woods. Give it a shot, draw your bow and know how to shoot. Every childhood dream starts with the first action. Stop dreaming and start doing!
