Kirk Jeffrey

Machines in Our Hearts Kirk Jeffrey,2003-04-01 Today hundreds of thousands of Americans carry pacemakers and implantable cardioverter-defibrillators (ICDs) within their bodies. These battery-powered machines—small computers, in fact—deliver electricity to the heart to correct dangerous disorders of the heartbeat. But few doctors, patients, or scholars know the history of these devices or how heart-rhythm management evolved into a multi-billion-dollar manufacturing and service industry. *Machines in Our Hearts* tells the story of these two implantable medical devices. Kirk Jeffrey, a historian of science and technology, traces the development of knowledge about the human heartbeat and follows surgeons, cardiologists, and engineers as they invent and test a variety of electronic devices. Numerous small manufacturing firms jumped into pacemaker production but eventually fell by the wayside, leaving only three American companies in the business today. Jeffrey profiles pioneering heart surgeons, inventors from the realms of engineering and medical research, and business leaders who built heart-rhythm management into an industry with thousands of employees and annual revenues in the hundreds of millions. As Jeffrey shows, the pacemaker (first implanted in 1958) and the ICD (1980) embody a paradox of high-tech health care: these technologies are effective and reliable but add billions to the nation's medical bill because of the huge growth in the number of patients who depend on implanted devices to manage their heartbeats.

Cardiac Pacing for the Clinician Fred Kusumoto,Nora Goldschlager,2001-01-01 This practical and clinically oriented textbook is designed to teach the fundamentals of cardiac pacing and to guide those health care professionals who may not do pacing on a regular basis. The authors explain the principles, uses, and evaluation of all currently available pacing systems. An entire five-chapter section discusses all aspects of patient follow-up with pacing systems. More than 300 illustrations complement the text.

Comprehensive Healthcare Simulation: Operations, Technology, and Innovative Practice Scott B. Crawford,Lance W. Baily,Stormy M. Monks,2019-07-17 This practical guide provides a focus on the implementation of healthcare simulation operations, as well as the type of professional staff required for developing effective programs in this field. Though there is no single avenue in which a person pursues the career of a healthcare simulation technology specialist (HSTS), this book outlines the extensive knowledge and variety of skills one must cultivate to be effective in this role. This book begins with an introduction to healthcare simulation, including personnel, curriculum, and physical space. Subsequent chapters address eight knowledge/skill domains core to the essential aspects of an HSTS. To conclude, best practices and innovations are provided, and the benefits of developing a collaborative relationship with industry stakeholders are discussed. Expertly written text throughout the book is supplemented with dozens of high-quality color illustrations, photographs, and tables. Written and edited by leaders in the field, *Comprehensive Healthcare Simulation: Operations, Technology, and Innovative Practice* is optimized for a variety of learners, including healthcare educators, simulation directors, as well as those looking to pursue a career in simulation operations as healthcare simulation technology specialists.

The Sciences' Media Connection -Public Communication and its Repercussions Simone Rödder,Martina Franzen,Peter Weingart,2011-12-02 The Yearbook addresses the overriding question: what are the effects of the 'opening up' of science to the media? Theoretical considerations and a host of empirical studies covering different configurations provide an in-depth analysis of the sciences' media connection and its repercussions on science itself. They help to form a sound judgement on this recent development.

Commandant's Planning Guidance General David H. Berger,2020-10-08 The Commandant's Planning Guidance (CPG) provides the 38th Commandant's strategic direction for the Marine Corps and mirrors the function of the Secretary of Defense's Defense Planning Guidance (DPG). It serves as the authoritative document for Service-level planning and provides a common direction to the Marine Corps Total Force. It also serves as a road map describing where the Marine Corps is going and why; what the Marine Corps force development priorities are and are not; and, in some instances, how and when prescribed actions will be implemented. This CPG serves as my Commandant's Intent for the next four years. As Commandant Neller observed, The Marine Corps is not organized, trained, equipped, or postured to meet the demands of the rapidly evolving future operating environment. I concur with his diagnosis. Significant change is required to ensure we are aligned with the 2018 National Defense Strategy (NDS) and DPG, and further, prepared to meet the demands of the Naval Fleet in executing current and emerging operational naval concepts. Effecting that change will be my top priority as your 38th Commandant. This CPG outlines my five priority focus areas: force design, warfighting, education and training, core values, and command and leadership. I will use these focal areas as logical lines of effort to frame my thinking, planning, and decision-making at Headquarters Marine Corps (HQMC), as well as to communicate to our civilian leadership. This document explains how we will translate those focus areas into action with measurable outcomes. The institutional changes that follow this CPG will be based on a long-term view and singular focus on where we want the Marine Corps to be in the next 5-15 years, well beyond the tenure of any one Commandant, Presidential administration, or Congress. We cannot afford to retain outdated policies, doctrine, organizations, or force development strategies. The coming decade will be characterized by conflict, crisis, and rapid change - just as every decade preceding it. And despite our best efforts, history demonstrates that we will fail to accurately predict every conflict; will be surprised by an unforeseen crisis; and may be late to fully grasp the implications of rapid change around us. The Arab Spring, West African Ebola Outbreak, Scarborough Shoal standoff, Russian invasion of eastern Ukraine, and weaponization of social media are but a few recent examples illustrating the point. While we must accept an environment characterized by uncertainty, we cannot ignore strong signals of change nor be complacent when it comes to designing and preparing the force for the future. What is abundantly clear is that the future operating environment will place heavy demands on our Nation's Naval Services. Context and direction is clearly articulated in the NDS and DPG as well as testimony from our uniformed and civilian leadership. No further guidance is required; we are moving forward. The Marine Corps will be trained and equipped as a naval expeditionary force-in-readiness and prepared to operate inside actively contested maritime spaces in support of fleet operations. In crisis prevention and crisis response, the Fleet Marine Force - acting as an extension of the Fleet - will be first on the scene, first to help, first to contain a brewing crisis, and first to fight if required to do so. The Marine Corps will be the force of choice for the President, Secretary, and Combatant Commander - a certain force for an uncertain world as noted by Commandant Krulak. No matter what the crisis, our civilian leaders should always have one shared thought - Send in the Marines.

Inside Kevin O'Malley,2004 The year is 1961, the place, Ireland. Inside a monastery is Brendan O'Kane who, at thirteen years of age, has been recruited into the Irish Christian Brothers. Does he have a true vocation? The recurring doubt causes him sleepless nights. Furthermore, he is confused about his awakening sexuality, repressed totally as it is by the Catholic Church in Ireland of the sixties and by his vow of chastity. Years later, he is faced with a momentous decision: he must decide once and for all if the price he has paid has really been worth it . . . *INSIDE* will strike a chord with many who grew up in the fifties and sixties, who remember the smells of the classroom and dancehall in those pre-deodorant days, the taste of fried bread and the sounds of the hymns and popular songs of the era - not to mention the swish of the leather strap. *INSIDE* is a must for those who have had their own experience of the Brothers - or who may have heard about them in recent news stories worldwide - and who would like to know what made them tick, what made them so successful in their heyday, and what made some of them, at least, dysfunctional. Other works on a similar theme: *THE BOYS OF ST VINCENT'S* (Canadian tv docudrama), *THE DEVIL'S PLAYGROUND* (Australian film), *THE CHRISTIAN BROTHERS* (Australian one-man-play), and from Ireland, *STATES OF FEAR* (tv documentary), *GIVE UP YER AULD SINS* (animation), *THE MAGDALENE SISTERS* (film) and *SONG FOR A RAGGY BOY* (novel and film).

Uptime Elements Implementation Guide ,2022-11-11 Many public and private sector organizations around the world have initiated a reliability and asset management program to drive efficiencies, mitigate risks and manage the asset throughout the entire lifecycle. However, it's well known that more than seventy percent of those implementations fail to become a long-term sustainable solution, and some of them never get off the ground!The development and implementation of a reliability and asset management program most often focuses on the technical aspects of the journey and not the cultural journey itself. The journey is filled with

challenges, barriers, difficult decisions, successes and failures. How does one understand these items and how should they be approached in advance of the journey?The Uptime® Elements Implementation Virtual Special Interest Group (vSIG) was assembled to analyze the reliability and asset management program journey to glean and present the wisdom,advice and recommendations of those who have made the journey utilizing the five domains of the Uptime Elements. Contributors to this implementation guide have made the journey, and thus gained experience in developing, implementing and/or operating a reliability and asset management program. They've experienced the ups and downs, the successes and failures and the barriers and challenges, and have the change management experience required to create valuable and sustainable reliability and asset management solutions.The output of this vSIG has resulted in this Uptime Elements Implementation Guide. Second Edition. This guide is all about the cultural journey, not the technical details.

Homefront Dreams Darlene Franklin,2014-01-01 Clarinda Finch hates change As the newly elected mayor of Maple Notch, the war widow must lead her town through the dark days of World War II. But where she finds comfort in tradition, the town council insists on trying new ways of handling the homefront challenges. Her most untraditional opponent? Councilman Ralph Quincy. High school principal Ralph never expected to become a friend to Clarinda and her family. But as she spars with him over the war effort, the smart, spirited mayor is the most compelling woman he's ever known. Can they put aside their differences and fight for both their town and a future together?t

The Physiology of Exercise in Spinal Cord Injury J. Andrew Taylor,2016-12-20 Every year, around the world, between 250,000 and 500,000 people suffer a spinal cord injury (SCI). Those with an SCI are two to five times more likely to die prematurely than people without a spinal cord injury, with worse survival rates in low- and middle-income countries. Dynamic aerobic requires integrated physiologic responses across the musculoskeletal, cardiovascular, autonomic, pulmonary, thermoregulatory, and immunologic systems. Moreover, regular aerobic exercise beneficially impacts these same systems, reducing the risk for a range of diseases and maladies. This book will present comprehensive information on the unique physiologic effects of SCI and the potential role of exercise in treating and mitigating these effects. In addition, it will incorporate work from scientists across a number of disciplines and have contributors at multiple levels of investigation and across physiologic systems. Furthermore, SCI can be considered an accelerated form of aging due to the severely restricted physical inactivity imposed, usually at an early age. Therefore, the information presented may have a broader importance to the physiology of aging as it relates to inactivity. Lastly, the need for certain levels of regular aerobic exercise to engender adaptations beneficial to health is not altered by the burden of an SCI. Indeed, the amounts of exercise necessary may be even greater than the able-bodied due to ‘passive’ ambulation. This book will also address the potential health benefits for those with an SCI that can be realized if a sufficient exercise stimulus is provided.
