**To the Top** Jenna C. Fisher, 2023-03-14 The Next-Generation Women Leadership Playbook In *To the Top: How Women in Corporate Leadership Are Rewriting the Rules for Success*, accomplished leadership advisor Jenna Fisher reveals how the world faces a once-in-a-generation opportunity to close the gender gap at the top of organizations today. You'll discover how traits often held by women—including compassion, empathy, communication, mentorship, and collaboration—are now in high demand. And why, in this time of volatility and disruption, women are standing on the most solid foundation for success than ever before. Drawing on scientific research and the powerful stories of women business leaders who have already made it to the top, the book sets out how we can seize this opportunity in front of us. You'll learn: Why corporate progress for women has historically been stubbornly slow and strategies for breaking through systemic biases to take a seat at the top table Why women are particularly well-suited to lead companies through the complex challenges facing our world The specific leadership skills that are in high demand and how to develop a compassionate and commanding leadership presence The stories of women business leaders at the top of organizations today—their success, their missteps, and their lessons for success An essential and insightful treatment of women leadership in a world that desperately needs more of it, *To the Top* is the first book since *Lean In* that promises to energize and accelerate the potential of woman leaders everywhere.

Emerging Debates in the Construction Industry Ernest Kissi, Clinton Aigbavboa, Didibhuku Wellington Thwala, 2023-05-09 This book provides readers with an insightful understanding of the various emerging issues in the construction industry, especially in the area associated with United Nations developmental goals, 4th Industrial Revolution, Health and Safety, Sustainability, Skills and Capacity development. The need for all practitioner to understand growing issues surrounding the various evolving concepts or technologies in the construction industry remain critical to stakeholders if any meaningful gains are expected. This book explains the importance of inclusion, health and safety, skills development, collaboration, pandemics, the fourth industrial revolution, capacity building, and green finance, among others. Thus, it provides an in-depth understanding of the issues mentioned in developed and developing countries for construction professionals, researchers, educators, and other stakeholders. The book can be adopted as a research guide, framework, and reference on the emerging concepts in construction practices.

**Automotive Audits** D. H. Stamatis, 2021-03-17 This book addresses the essentials of an automotive audit which is required by all automotive suppliers world-wide. They are based on customer specific requirements, ISO standards, and Industry specifications. This book covers both the mandated documents and records that are necessary for compliance, with an extensive discussion on Layered Process Audits and distance auditing. The book addresses the six standards for certification in one volume. It explains “why” and “how” an effective audit should be carried out. It identifies the key indicators for a culture change with an audit, explains the “process audit” at length, discusses the rationale for Layered Process audits and summarizes all the mandatory documents and records for all standards and requirements. The book covers the issue of risk in auditing and emphasizes the role of a “checklist” in the preparation process. This book is for those that conduct audits, those that are interested in auditing, and those being audited. It specifically addresses automotive OEMs and their supplier base but is also of interest to anyone wanting information on auditing.

*How to Architect* Doug Patt, 2012-02-17 The basics of the profession and practice of architecture, presented in illustrated A-Z form. The word architect is a noun, but Doug Patt uses it as a verb—coining a term and making a point about using parts of speech and

parts of buildings in new ways. Changing the function of a word, or a room, can produce surprise and meaning. In *How to Architect*, Patt—an architect and the creator of a series of wildly popular online videos about architecture—presents the basics of architecture in A-Z form, starting with A is for Asymmetry (as seen in Chartres Cathedral and Frank Gehry), detouring through N is for Narrative, and ending with Z is for Zeal (a quality that successful architects tend to have, even in fiction—see *The Fountainhead*'s architect-hero Howard Roark.) *How to Architect* is a book to guide you on the road to architecture. If you are just starting on that journey or thinking about becoming an architect, it is a place to begin. If you are already an architect and want to remind yourself of what drew you to the profession, it is a book of affirmation. And if you are just curious about what goes into the design and construction of buildings, this book tells you how architects think. Patt introduces each entry with a hand-drawn letter, and accompanies the text with illustrations that illuminate the concept discussed: a fallen Humpty Dumpty illustrates the perils of fragile egos; photographs of an X-Acto knife and other hand tools remind us of architecture's nondigital origins. *How to Architect* offers encouragement to aspiring architects but also mounts a defense of architecture as a profession—by calling out a defiant verb: architect!

*In Your Creative Element* Claire Bridges, 2016-12-03 SHORTLISTED: CMI Management Book of the Year 2018 - Innovation and Entrepreneurship Category *In Your Creative Element* helps readers identify a personal creativity formula for success, and kick-starts the creative journey. It provides personalized insights so that readers can develop their knowledge and skills and their own formula to unlock creativity and apply it in any context. *In Your Creative Element* is an original work on one of the hottest topics in business written by a creative director who has made it her business to unpick how and why creative ideas are born, develop and survive or die. The author has identified 62 elements that affect creativity and has created a unique 'Periodic Table of Creative Elements'. This simple framework adds logic and science to the concept of creativity and can be explored by anyone to find which creative elements are most important to them and to transform their approach to creativity. Highly practical and packed with case studies and tips from creative experts and organizations including Google, Netflix, Pixar, the NHS, the United Nations and Twitter as well as some of the world's most successful advertising agencies, *In Your Creative Element* provides inspiration and practical advice for readers who recognize that creativity is essential for business success but who do not know where to begin to unlock their creative potential.

*101 Things I Learned in Architecture School* Matthew Frederick, 2007-08-31 Concise lessons in design, drawing, the creative process, and presentation, from the basics of “How to Draw a Line” to the complexities of color theory. This is a book that students of architecture will want to keep in the studio and in their backpacks. It is also a book they may want to keep out of view of their professors, for it expresses in clear and simple language things that tend to be murky and abstruse in the classroom. These 101 concise lessons in design, drawing, the creative process, and presentation—from the basics of How to Draw a Line to the complexities of color theory—provide a much-needed primer in architectural literacy, making concrete what too often is left nebulous or open-ended in the architecture curriculum. Each lesson utilizes a two-page format, with a brief explanation and an illustration that can range from diagrammatic to whimsical. The lesson on How to Draw a Line is illustrated by examples of good and bad lines; a lesson on the dangers of awkward floor level changes shows the television actor Dick Van Dyke in the midst of a pratfall; a discussion of the proportional differences between traditional and modern buildings features a drawing of a building split neatly in half between the two. Written by an architect and instructor who remembers well the fog of his own student days, *101 Things I Learned in Architecture School* provides valuable guideposts for

navigating the design studio and other classes in the architecture curriculum. Architecture graduates—from young designers to experienced practitioners—will turn to the book as well, for inspiration and a guide back to basics when solving a complex design problem.

**Socio-economic Systems: Paradigms for the Future** Elena G. Popkova, Victoria N. Ostrovskaya, Aleksei V. Bogoviz, 2021-03-05 This book is reflective of a science-based vision of the future development paradigm of economic and social systems. It deals with the digitization as the technological basis for the future development of economic and social systems and presents a review of groundbreaking technologies and prospects for their application. The specific character of the industry and prospects for the application of digital technologies in business are analyzed. A rationale is provided for future prospects for the sustainable development of economic and social systems in a digital economy. The authors determine the process of the formation and development of the information-oriented society, social and educational aspects of the digitization, as well as the institutional framework of the digital future of social and economic systems. The book combines the best works following the results of the 12th International Research-to-Practice Conference “Artificial Intelligence: Anthropogenic Nature vs. Social Origin” that was held by the Institute of Scientific Communications (ISC) in cooperation with the Siberian Federal University and the Krasnoyarsk Regional Fund of support of scientific and scientific-technical activities on 5–7 December 2019, in Krasnoyarsk, Russia, as well as following the results of the 3rd International Research-to-Practice Conference “Economic and Social Systems: Paradigms for the Future” that was held by the ISC in cooperation with the Pyatigorsk State University on 5–6 February 2020. The target audience of the book consists of representatives of the academic community concerned with the future prospects for the development of economic and social systems, as well as economic agents engaged in the digitization of business processes, and representatives of public agencies regulating the development of business systems for their progressivity, sustainability and competitiveness.

**Architect + Entrepreneur** Eric W. Reinholdt, 2015 Part narrative, part business book; Architect + Entrepreneur is filled with contemporary, relevant, fresh tips and advice, from a seasoned professional architect building a new business. The guide advocates novel strategies and tools that merge entrepreneurship with the practice of architecture and interior design. The Problem: Embarking on a new business venture is intimidating; you have questions. But many of the resources available to help entrepreneur architects and interior designers start their design business lack timeliness and relevance. Most are geared toward building colossal firms like SOM and Gensler using outdated methods and old business models. If you're an individual or small team contemplating starting a design business, this is your field guide; crafted to inspire action. The Solution: Using the lean startup methodology to create a minimum viable product, the handbook encourages successive small wins that support a broader vision enabling one to, think big, start small, and learn fast. It's a unique take on design practice viewed through the lens of entrepreneurship and is designed to answer the questions all new business owners face, from the rote to the existential. Questions about: - Startup costs - Business models (old and new) - Marriage of business and design - Mindset - Branding & naming (exercises and ideas) - Internet marketing strategies - Passive income ideas - Setting your fee - Taxes - Standard Operating Procedures (SOPs) - Securing the work - Client relations - Software - Billing rates - Contracts Building a business isn't a singular act; it's a series of small steps. Using the outline found in Architect + Entrepreneur you can start today. The chapters are organized to guide you from idea to action. Rather than write a business plan you'll be challenged to craft a brand and you'll sell it using new technologies. Follow the guide sequentially and you'll have both the tools and a profitable small business.

**Raimund Abraham [UN]BUILT** Brigitte Groihofer, 2016-12-05 The Austrian

architect Raimund Abraham, born 1933 in Tyrol, Austria, lived, worked and taught in the USA from 1964 to 2010. In March 2010 he died in a car-crash. The book is an updated edition and contains the complete work of the architect Raimund Abraham. It has a three-part structure: 1) imaginary architecture, 2) projects, 3) realizations. Texts are by Raimund Abraham, Kenneth Frampton, John Hejduk, Wieland Schmied and Lebbeus Woods. With an introductory essay by Norbert Miller. The drawing of architecture occupies a central position in the evolution of his work but challenges the predominant notion of built architecture. Drawing demands an autonomous reality, manifestation of his architectural concept. The book also contains his latest realized projects as there are his own house in Mexico and the House for Musicians at the Museumsinsel Hombroich (Germany), which will be completed in 2011.

ADVANCED GEOMETRY HARISH CHANDRA RAJPOOT,

**Construction Management Strategies** Milan Radosavljevic, John

Bennett, 2012-05-08 An authoritative textbook on construction management offering a clear model for understanding theoretical aspects. The construction industry has become a truly global network of interconnected stakeholders making demands which require the involvement of skilled workforces from all over the world. Construction Management Strategies sets the foundations for understanding and managing construction's inherent complexity and uniqueness. It establishes clear definitions of commonly accepted terms like built environment, construction, civil engineering, etc. which are often given confusing and conflicting interpretations. It cuts through the plethora of overlapping role titles currently used in the construction sector that make it difficult to establish how projects are actually managed. Construction Management Strategies: Offers a robust and consistent theoretical basis to explain the performance of the main approaches to construction management. Describes corporate and project management in construction as an integrated whole. Provides the basic toolkit a student needs to think through the practical situations they will later face. Helps bring the theory of construction management to international students who struggle to find a solid grounding in this complex and fragmented subject. Includes a companion website featuring a wealth of directly transferable examples for students, as well as PPT slides and topic discussion ideas for lecturers.

**Form Follows Nature** Rudolf Finsterwalder, 2015-08-31 Nature is in many different ways a pool for the productive human being, but also a counterpoint to his/her own work. This book offers a richly illustrated overview of the history of nature in architecture, civil engineering and art.

*Are Sketches* Lora Nicole Teagarden Aia, Lora Teagarden, 2017-01-07 The ARE Sketches(tm) were born out of my journey to become a licensed architect and the study process I used by turning written verbiage into sketches for visual understanding. They have been shared online with others testing for their license as well as with those who simply enjoy learning about architecture. This book is whatever you want it to be. A flipbook of cool sketches. A visual study guide. A way for you to learn more about architecture. Each sketch provides a nugget of information in bite-size form, perfect for reading at your own pace with your own breaks. Write in the margins. Sketch in the blank space (there's purposefully room for that). Sketch on top of my sketches. Share it with a friend. Most of all, enjoy this wonderful world of architecture. This is the second in what will be a six part series of visual study materials for the ARE (Architect Registration Exams), covering mainly Site Planning & Design - with overlap to other tests. I get a handful of emails each week from people just like you, working hard towards getting their license. I love hearing from them and I love being able to help. That is the root of where this book was born - because a young licensed architect empowered to make the world better is a positive in my book.

Semantics in Adaptive and Personalised Systems Pasquale Lops, Cataldo

Musto, Fedelucio Narducci, Giovanni Semeraro, 2019-09-18 This monograph gives a complete overview of the techniques and the methods for semantics-aware content representation and shows how to apply such techniques in various use cases, such as recommender systems, user profiling and social media analysis. Throughout the book, the authors provide an extensive analysis of the techniques currently proposed in the literature and cover all the available tools and libraries to implement and exploit such methodologies in real-world scenarios. The book first introduces the problem of information overload and the reasons why content-based information needs to be taken into account. Next, the basics of Natural Language Processing are provided, by describing operations such as tokenization, stopword removal, lemmatization, stemming, part-of-speech tagging, along with the main problems and issues. Finally, the book describes the different approaches for semantics-aware content representation: such approaches are split into 'exogenous' and 'endogenous' ones, depending on whether external knowledge sources as DBpedia or geometrical models and distributional semantics are used, respectively. To conclude, several successful use cases and an extensive list of available tools and resources to implement the approaches are shown. *Semantics in Adaptive and Personalised Systems* definitely fills the gap between the extensive literature on content-based recommender systems, natural language processing, and the different types of semantics-aware representations.

Aircraft Pavement Design Institution of Civil Engineers (Great Britain), 1971 With airport design and construction continuing to be a challenge to civil engineers, these proceedings contribute to the sharing of knowledge necessary for the development of technical improvements.
