Introduction to Architectural Science Steven V. Szokolay, 2014-04-11 Now in its third edition, this book provides the ideal and only reference to the physical basis of architectural design. Fully updated and expanded throughout, the book provides the data required for architects to design buildings that will maintain the users comfort in a variety of conditions, with minimal reliance on energy intensive methods like air conditioning. This is not a 'how to' book but answers the question why. It equips the reader with the tools to realize the full potential of the good intentions of sustainable, bioclimatic design. All sections have been revised and updated for this third edition including all the most relevant developments affecting heat, light and sound controls. The book responds to the need of understanding beyond 'rules of thumb'.

Environmental Design Randall Thomas, 1999 Written and edited by a team of specialists at Max Fordhams, one of the leading UK environmental engineering consultancies, Environmental Design is the result of their extensive experience in designing environmentally friendly buildings. The principles of their approach, which they have taught in numerous schools of architecture and engineering, are clearly presented here. This book is essential reading for architects, engineers, planners and students of these disciplines and for all those who are concerned with our built environment.

Principles of Architectural Detailing Stephen Emmitt, John Olie, Peter Schmid, 2009-02-12 Why are buildings detailed the way they are? Why do architects and engineers seem to come to the same kind of solutions to their detailing problems? Are we satisfied with such a situation? With environmental concerns so high on designers' agendas, the answer to this third question has to be 'no'. Collectively architects, engineers and specifiers need to revisit how they detail the built environment, and address the most important and potentially difficult area of the joint between materials and components. In Principles of Architectural Detailing the authors question the way in which buildings are detailed and in particular challenge familiar joint solutions. They offer practical guidance and a number of tools to help the student of architectural detailing in the decision-making process. The emphasis throughout is on using knowledge of construction in a creative and productive way to contribute towards a built environment that enhances our well-being and which is also sustainable.

Haute Couture Architecture Anneke van Waesberghe, 2022-02-14 Haute Couture Architecture: The Art of Living Without Walls by Anneke van Waesberghe is so much more than a book about tented green building architecture. The book is part design manifesto, part personal diary, and part manual for future sustainable living. One in which rampant consumerism has been replaced by a more thoughtful design from the excesses of modern times to a new state of being for living sustainably and in harmony with the rhythms of the planet. It is the tale of one woman's odyssey living alone in the jungle finding true meaning in life and manifesting its beauty into a way of sustainable living that may set a blueprint for our future existence on Earth. The author leads readers to encounter a new paradigm by showing the luxury of simplicity and the beauty of small things. With our consumer way of living and doing things and how the world is evolving, the pace we follow as consumers rather than humans has become outdated and is not the way to go forward. We cannot solve new problems that follow our destructive actions; we have to shift our thinking from Me to We. Haute Couture architecture respects artisans, hand-made goods, self-sufficiency, and caring for nature. Being close to nature is a lifestyle of forward-thinking outside the box and is a natural means to discovering ourselves. Ultimately Haute Couture Architecture: The Art of Living Without Walls bridges the gap between nature and architecture.

Fundamentals of Architectural Lighting Samuel Mills, 2018-04-17 The theme of this book is that light is an inseparable part of architectural design, and is intended to provide students of architecture and interior design with a graphic guideline to the fundamental role lighting plays in this process. While simple light sources may be enough to satisfy practical needs, the design process must expand beyond basic illumination. The challenge for architects and designers is the creation of luminous environments offering visual interest and a sense of well-being, while also meeting basic seeing needs. Technological advances provide opportunities for the lighting designer's creative introduction of light, and the visual and psychological perceptions of the illuminated architectural environment. Fundamentals of Architectural Lighting offers a complete comprehensive guide to the basics of lighting design, equipping students and practitioners with the tools and ideas they need to master a variety of lighting techniques. The book is extensively illustrated with over 250 illustrations to demonstrate basic principles and procedures. It is an excellent resource for anyone interested in the fundamentals of integrated lighting for architectural interior spaces.

Design Innovation for the Built Environment Michael Hensel, 2012 Annotation Bringing together a range of leading architects, architectural theorists, and designers, this book outlines the developments in current practice in design innovation or the built environment from leading individuals based in the USA, UK, Australia, Japan and Europe.

Edra 1 Taylor & Francis Group, 2022-09-30 Originally published in 1970, EDRA 1 is a record of the conference proceedings of the 1st annual Environmental Design Research Association conference. The papers featured in this volume represent the proceedings of the conference and are concerned mainly with contributions of scientific disciplines towards the creation of improved methods of problem-solving environmental design, as well as understanding the nature of human responses to the environment. The papers included in this volume focus on developing models and methods towards a framework of coherence and definable structure of environmental

design, with the ultimate objective of achieving an optimum environment for man. This volume will be of great interest to planners, architects and academics of urbanisation alike. Although published over 40 years ago, the book's content is still as relevant and interesting today as it was at the time of publication.

Eileen Gray and the Design of Sapphic Modernity Jasmine Rault, 2017-07-05 The first book-length feminist analysis of Eileen Gray's work, *Eileen Gray and the Design of Sapphic Modernity: Staying In* argues that Gray's unusual architecture and design - as well as its history of abuse and neglect - emerged from her involvement with cultures of sapphic modernism. Bringing together a range of theoretical and historical sources, from architecture and design, communication and media, to gender and sexuality studies, Jasmine Rault shows that Gray shared with many of her female contemporaries a commitment to designing spaces for sexually dissident modernity. This volume examines Gray's early lacquer work and Romaine Brooks' earliest nude paintings; Gray's first built house, E.1027, in relation to Radclyffe Hall and her novel *The Well of Loneliness*; and Gray's private house, Tempe ?nbsp; Pailla, with Djuna Barnes' *Nightwood*. While both female sexual dissidence and modernist architecture were reduced to rigid identities through mass media, women such as Gray, Brooks, Hall and Barnes resisted the clarity of such identities with opaque, non-communicative aesthetics. Rault demonstrates that by defying the modern imperative to publicity, clarity and identity, Gray helped design a sapphic modernity that cultivated the dynamism of uncertain bodies and unfixed pleasures, which depended on staying in rather than coming out.
