**Designs for Living** Randy M. Correll, Gary L. Brewer, Grant F. Marani, Roger H. Seifter, 2014-05-13 In *Designs for Living*, Roger H. Seifter, Randy M. Correll, Grant F. Marani, and Gary L. Brewer, who lead the residential practice at Robert A.M. Stern Architects, present fifteen houses the firm has completed over the past ten years. From contemporary interpretations of the shingle style to robust Mediterranean designs, the houses are stylistically diverse reflecting RAMSA's deep knowledge of history and precedent. Each partner provides insight into the design process and his individual approach to working with clients. Houses are located in dramatic settings from Napa and Sonoma to the spectacular coastline of the Hamptons and New England. Whether overlooking the ocean or nestled into the mountainside, these remarkable houses reveal the architects' emphasis on the importance of context and their dedication to exploring the nature of place and environment. Each house invokes the vernacular architectural heritage particular to its region while gracefully reflecting its natural surroundings. Connecting contemporary lifestyles to traditional American aesthetics, these residences are exceptional both for their timelessness and their ability to evoke a conversation with the past—a dialogue the RAMSA partners believe lies at the heart of architecture.

**Interior Design: Conceptual Basis** Anthony Sully, 2015-05-29 Maximizing reader insights into interior design as a conceptual way of thinking, which is about ideas and how they are formulated. The major themes of this book are the seven concepts of planning, circulation, 3D, construction, materials, colour and lighting, which covers the entire spectrum of a designer's activity. Analysing design concepts from the view of the range of possibilities that the designer can examine and eventually decide by choice and conclusive belief the appropriate course of action to take in forming that particular concept, the formation and implementation of these concepts is taken in this book to aid the designer in his/her professional task of completing a design proposal to the client. The purpose of this book is to prepare designers to focus on each concept independently as much as possible, whilst acknowledging relative connections without unwarranted influences unfairly dictating a conceptual bias, and is about that part of the design process called conceptual analysis. It is assumed that the site, location, building and orientation, as well as the client's brief of activities and needs have been digested and analysed to provide the data upon which the design process can begin. Designed as a highly visual illustrative book, as the interior design medium demands, the hands-on creative process of designing is detailed with original drawn illustrations. Concentrating on the conceptual process of designing interiors, and defining what these concepts are, this book will help the designer to organise his/her process of designing and to sharpen the links between the various skill bases necessary to do the job. This book will be stimulating for students and instructors alike and is aimed at any student who maybe majoring in interior design, interior architecture, architecture, design thinking or furniture design. It could also be a useful reference for students of design management and design leadership.
