Rent, Resources, Technologies Alberto Quadrio
Curzio, Fausta Pellizzari, 2013-03-09 Rent,
resources, and technologies are three crucial
issues to the understanding of history and
economics. The scarcity of resources, its
interplay with technology, and the role of rent in
explaining both economic growth and income
distribution are investigated by adopting a multi-
sectoral and non-proportional model, where scarce
resources impose several scale constraints that
may slow growth, but may contribute to further
development of new technologies. In this dynamic
framework the category of rent acquires new
dimensions with far-reaching implications for both
the system of prices and the distribution of
income. The analytical and formal-theoretical
perspective of this book could be used as a basis
for future historical and quantitative studies.

Great Minds in Regional Science, Vol. 2 Peter Batey, David Plane, 2023-01-01 This book is the second volume in a new series on 'Great Minds in Regional Science,' which seeks to present a contemporary view on the scientific relevance of the work done by great thinkers in regional science. This volume presents, among others, Adam Smith, Johann Heinrich von Thünen, and Alan Wilson. Each chapter combines factual biographical information about the 'Great Mind,' a description of their major contributions, and a discussion of the broader context of their work, as well as an assessment of its current relevance, scientific recognition, and policy impact. The book attempts to fill a gap in our knowledge and to respond to the growing interest in the formation and development of the field of regional science and its key influential figures.

Modern Methods of Valuation David Mackmin,Gary Sams,2012-11-27 The new and improved eleventh edition of this essential valuation textbook reflects the changes in the property market since 2009, whilst presenting the tried and tested study of the principles governing the valuation of land, houses and buildings of the previous editions. The eleventh edition is fully up-to-date with latest guidelines, statutes and case law, including the implications of the latest RICS Red Book and the Localism Act. Its comprehensive coverage of the legal, economic and technical aspects of valuation make this book a core text for most University and College Real Estate Programmes and to provide trainees (APC Candidates) and practitioners with current and relevant guidance on the preparation of valuations for statutory purposes. Over the twenty eight chapters, the author team of experienced valuation experts present detailed accounts of the application of these principles to the everyday problems met in practice. This new

edition continues to be of excellent value to both students and practitioners alike as it provides the reader with a clear understanding of the methods and techniques of valuation.
