**Lake Trasimene 217 BC** Nic Fields,2017-01-26 Following Hannibal's crushing victory at the battle of the Trebbia, the reeling Roman Republic sent a new army under the over-confident consul Caius Flaminius to destroy the Carthaginian invaders – unbeknownst to him they were ready and waiting. The destruction of the Roman force at Lake Trasimene firmly established Hannibal as one of the Ancient World's greatest commanders thanks to his use of innovative tactics, including the first recorded use of a turning movement. The Romans would not send another major army to confront him until the battle of Cannae in 216 BC. This new study, based on recent archaeological work on the battlefield itself, tells the full story of one of Hannibal's greatest victories with the help of maps, full-colour illustrations, and detailed sections on the make-up of the armies and their commanders.

**Leo and His Circle** Annie Cohen-Solal,2010-05-18 Leo Castelli reigned for decades as America's most influential art dealer. Now Annie Cohen-Solal, author of the hugely acclaimed *Sartre: A Life* ("an intimate portrait of the man that possesses all the detail and resonance of fiction"—Michiko Kakutani, *The New York Times*), recounts his incalculably influential and astonishing life in *Leo and His Circle*. After emigrating to New York in 1941, Castelli would not open a gallery for sixteen years, when he had reached the age of fifty. But as the first to exhibit the then-unknown Jasper Johns, Castelli emerged as a tastemaker overnight and fast came to champion a virtual Who's Who of twentieth-century masters: Rauschenberg, Lichtenstein, Warhol, and Twombly, to name a few. The secret of Leo's success? Personal devotion to the artists, his "heroes": by putting young talents on stipend and seeking placement in the ideal collection rather than with the top bidder, he transformed the way business was done, multiplying the capital, both cultural and financial, of those he represented. His enterprise, which by 1980 had expanded to an impressive network of satellite galleries in Europe and three locations in New York, thus became the unrivaled commercial institution in American art, producing a generation of acolytes, among them Mary Boone, Jeffrey Deitch, Larry Gagosian, and Tony Shafrazi. *Leo and His Circle* brilliantly narrates the course of one man's power and influence. But Castelli had another secret, too: his life as an Italian Jew. Annie Cohen-Solal traces a family whose fortunes rose and fell for centuries before the Castellis fled European fascism. Never hidden but also never discussed, this experience would form the core of a guarded but magnetic character possessed of unfailing old-world charm and a refusal to look backward—traits that ensured Castelli's visionary precedence in every major new movement from Pop to Conceptual and by which he fostered the worldwide enthusiasm for American contemporary art that is his greatest legacy. Drawing on her friendship with the subject, as well as an uncanny knack for archival excavation, Annie Cohen-Solal gives us in full the elegant, shrewd, irresistible, and enigmatic figure at the very center of postwar American art, bringing an utterly new understanding of its evolution.

**Learning from Leonardo** Fritjof Capra,2013-11-19 Leonardo da Vinci was a brilliant artist, scientist, engineer, mathematician, architect, inventor, and even musician—the archetypal Renaissance man. But he was also a profoundly modern man. Not only did Leonardo invent the empirical scientific method over a century before Galileo and Francis Bacon, but Capra's decade-long study of Leonardo's fabled notebooks reveals that he was a systems thinker centuries before the term was coined. At the very core of Leonardo's science, Capra argues, lies his persistent quest for understanding the nature of life. His science is a science of living forms, of qualities and patterns, radically different from the mechanistic science that emerged 200 years later. Because he saw the world as an integrated whole, Leonardo always applied concepts from one area to illuminate problems in another. His studies of the movement of water informed his ideas about how landscapes are shaped, how sap rises in plants, how air moves over a bird's wing, and how blood flows in the human body. His observations of nature enhanced his art, his drawings were integral to his scientific studies, and he brought art, science, and technology together in his beautiful and elegant mechanical and architectural designs. Capra describes seven defining characteristics of Leonardo da Vinci's genius and includes a list of over forty discoveries he made that weren't rediscovered until centuries later. Capra follows the organizational scheme Leonardo himself intended to use if he ever published his notebooks. So in a sense, this is Leonardo's science as he himself would have presented it. Obviously, we can't all be geniuses on the scale of Leonardo da Vinci. But his persistent endeavor to put life at the very center of his art, science, and design and his recognition that all natural phenomena are fundamentally interconnected and interdependent are important lessons we can learn from. By exploring the mind of the preeminent Renaissance genius, we can gain profound insights into how to address the complex challenges of the 21st century.
