China Satellite Navigation Conference (CSNC) 2013 Proceedings Jiadong Sun,Wenhai Jiao,Haitao Wu,Chuang Shi,2014-07-08 China Satellite Navigation Conference (CSNC) 2013 Proceedings presents selected research papers from CSNC2013, held on 15-17 May in Wuhan, China. The theme of CSNC2013 is: BeiDou Application: Opportunities and Challenges. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS), and the latest progress made in the China BeiDou system especially. They are divided into 9 topics to match the corresponding sessions in CSNC2013, which broadly covered key topics in GNSS. Readers can learn about the BeiDou system and keep abreast of the latest advances in GNSS techniques and applications. SUN Jiadong is the Chief Designer of the Compass/BeiDou system, and the Academician of Chinese Academy of Sciences (CAS); JIAO Wenhai is a researcher at China Satellite Navigation Office; WU Haitao is a professor at Navigation Headquarters, CAS; SHI Chuang is a professor at Wuhan University.

Seamless 3D Navigation in Indoor and Outdoor Spaces Jinjin Yan,Sisi Zlatanova,2022-10-31 This book presents the current research on space-based navigation models and the contents of spaces used for seamless indoor and outdoor navigation. It elaborates on 3D spaces reconstructed automatically and how indoor, semi-indoor, semi-outdoor, and outdoor spaces can mimic the indoor environments and originate a network based on the 3D connectivity of spaces. Case studies help

readers understand theories, approaches, and models, including data preparation, space classification and reconstruction, space selection, unified space-based navigation model derivation, path planning, and comparison of results. Features: Provides novel models, theories, and approaches for seamless indoor and outdoor navigation path planning Includes real-life case studies demonstrating the most feasible approaches today Presents a generic space definition framework that can be used in research areas for spaces shaped by built structures Develops a unified 3D space-based navigation model that allows the inclusion of all types of spaces as 3D spaces and utilizes them for seamless navigation in a unified way Intended to motivate further research and developments, this book suits students, researchers, and practitioners in the field, and serves as a helpful introductory text for readers wanting to engage in seamless indoor/outdoor navigation research and teaching.

Compliance with Decisions of the Dispute Settlement Bodies of the UN Convention on the Law of the Sea Natalie Klein, Jack McNally, 2023-11-20
What happens after a judgment is delivered by a tribunal constituted under the UN Convention on the Law of the Sea? In this ground-breaking book, all the decisions issued by the International Tribunal for the Law of the Sea or Annex VII arbitral tribunals are examined to determine what results transpired following the judgment or order. The authors consider what compliance means and whether it has been achieved in UNCLOS dispute settlement. We suggest what other outcomes have

sometimes eventuated from UNCLoS dispute settlement and propose steps that may be taken to enhance judgment compliance.

The Soils of Argentina Gerardo Rubio, Raul S. Lavado, Fernando X. Pereyra, 2018-05-30 This is the first comprehensive book on Argentinian pedology. It discusses the main soil types of Argentina, their geographical distribution, classification, functions, agricultural use, ecological aspects, and the threats to which they have been subjected during centuries of intensive and extensive management. The description of the soils is accompanied by a complete set of data, pictures and maps, including benchmark profiles and an overview of the country's agricultural production. It also deals with future scenarios of the relationships between soil science and other disciplines and the main challenges that soil science will face in the future. Further, the book explores aspects of the main soil forming factors, such as climate, vegetation, geology and geomorphology, making use of new, unpublished data and elaborations, and presents a history of pedological research in Argentina.

Legal Aspects of Cruises Cecilia Fresnedo de Aguirre, 2022-01-19 This book presents a comparative study on various issues regarding legal aspects of cruises – mainly, the importance of the cruise business, the impact of cruise tourism, general and specific rules applicable to cruises, liability issues, cruise passengers as consumers, package travel, labor rules for cruise workers, relevant rules on ports (e.g. on taxes, costs and rates charged to cruises in different

ports), rules on the environmental impact of cruises, jurisdiction, arbitration, and choice of law in cruise contracts, and general conditions used by companies offering cruise services – in order to identify the current sources of law on these matters and determine whether or not they are appropriate and sufficient. Combining a general report with individual national reports, the book offers not only a general overview, but also the perspectives of selected jurisdictions in the Americas, Europe and Asia, namely: Argentina, Belgium, Bulgaria, Germany, Japan, Poland, Romania, Spain, Turkey, the United States, and Uruguay.

OECD Development Pathways Multi-dimensional Review of Paraguay Volume I. Initial Assessment

OECD, 2018-07-03 Paraguay has achieved strong and resilient growth and made progress across a range of development outcomes since it emerged from a prolonged period of economic and political instability in the early 2000s. In 2014, the country adopted its first National Development Plan, setting course towards ...

The Argentine Flying Fortress Santiago

Rivas, 2023-06-30 In the 1960's guerrillas were operating in almost all Latin American countries, as well as in Africa and Asia, and the need of specialized weapons to fight them arose. The Argentine Air Force, seeing this threat grow, asked the FMA factory to produce a counterinsurgency airplane to equip the force, but also to offer on the international market. After several proposals were analyzed, a final product emerged, called the IA-58 Pucará, a robust twin

turboprop aircraft with heavy internal weapons, planned to operate from unprepared airstrips on very hard conditions. The plane entered service with the Argentine Air Force in 1975 and more than 100 were produced over the years, with several versions being developed or proposed. It was purchased by Uruguay, Colombia and Sri Lanka, the type gained world notoriety when they took part on the 1982 South Atlantic war, but also had combat experience in Colombia and Sri Lanka, and was tested by the Royal Air Force. Now, with the original version already retired, the Argentine Air Force plans to convert them into the Pucará Fénix version, with new engines and avionics, with new missions too, like intelligence, surveillance and reconnaissance. While some aspects of its story were described in many publications, most of it has never been told until now, including many unknown proposed versions and details of its operational record, both in Argentina and in the other countries that operated the plane.

Total Survey Error in Practice Paul P. Biemer, Edith de Leeuw, Stephanie Eckman, Brad Edwards, Frauke Kreuter, Lars E. Lyberg, N. Clyde Tucker, Brady T. West, 2017-02-13 Featuring a timely presentation of total survey error (TSE), this edited volume introduces valuable tools for understanding and improving survey data quality in the context of evolving large-scale data sets This book provides an overview of the TSE framework and current TSE research as related to survey design, data collection, estimation, and analysis. It recognizes that survey data affects many public policy and business decisions and thus focuses on

the framework for understanding and improving survey data quality. The book also addresses issues with data quality in official statistics and in social, opinion, and market research as these fields continue to evolve, leading to larger and messier data sets. This perspective challenges survey organizations to find ways to collect and process data more efficiently without sacrificing quality. The volume consists of the most up-to-date research and reporting from over 70 contributors representing the best academics and researchers from a range of fields. The chapters are broken out into five main sections: The Concept of TSE and the TSE Paradigm, Implications for Survey Design, Data Collection and Data Processing Applications, Evaluation and Improvement, and Estimation and Analysis. Each chapter introduces and examines multiple error sources, such as sampling error, measurement error, and nonresponse error, which often offer the greatest risks to data quality, while also encouraging readers not to lose sight of the less commonly studied error sources, such as coverage error, processing error, and specification error. The book also notes the relationships between errors and the ways in which efforts to reduce one type can increase another, resulting in an estimate with larger total error. This book:

- Features various error sources, and the complex relationships between them, in 25 high-quality chapters on the most up-to-date research in the field of TSE
- Provides comprehensive reviews of the literature on error sources as well as data collection approaches and estimation methods to

reduce their effects • Presents examples of recent international events that demonstrate the effects of data error, the importance of survey data quality, and the real-world issues that arise from these errors • Spans the four pillars of the total survey error paradigm (design, data collection, evaluation and analysis) to address key data quality issues in official statistics and survey research Total Survey Error in Practice is a reference for survey researchers and data scientists in research areas that include social science, public opinion, public policy, and business. It can also be used as a textbook or supplementary material for a graduate-level course in survey research methods.

MEDINFO 2017: Precision Healthcare Through Informatics A.V. Gundlapalli,M.-C. Jaulent,D. Zhao,2018-01-31 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was Precision Healthcare through Informatics, and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social aspects;

knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics; quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.

Emotions and Migration in Argentina at the Turn of the 20th Century María Bjerg, 2021-10-07

Revealing the lives of migrant couples and transnational households, this book explores the dark side of the history of migration in Argentina during the late 19th and early 20th centuries. Using court records, censuses, personal correspondence and a series of case studies, María Bjerg offers a portrayal of the emotional dynamics of transnational marital bonds and intimate relationships stretched across continents. Using microhistories and case studies, this book shows how migration affected marital bonds with loneliness, betrayal, fear and frustration. Focusing primarily on the emotional lives of Italian and Spanish migrants, this book explores bigamy, infidelity, adultery, domestic violence and murder within official and unofficial unions. It reveals the complexities of obligation, financial hardship, sacrifice and distance that

came with migration, and explores how shame, jealousy, vengeance and disobedience led to the breaking of marital ties. Against a backdrop of changing cultural contexts Bjerg examines the emotional languages and practices used by adulterous women against their offended husbands, to justify domestic violence and as a defence against homicide. Demonstrating how migration was a powerful catalyst of change in emotional lives and in evolving social standards, *Emotions and Migration in Early Twentieth-century Argentina* reveals intimate and disordered lives at a time when female obedience and male honour were not only paramount, but exacerbated by distance and displacement.

GPS and GNSS Technology in Geosciences George P. Petropoulos, Prashant K. Srivastava, 2021-02-18 GPS and GNSS Technology in Geosciences offers an interdisciplinary approach to applying advances in GPS/GNSS technology for geoscience research and practice. As GPS/GNSS signals can be used to provide useful information about the Earth's surface characteristics and land surface composition, GPS equipment and services for commercial purposes continues to grow, thus resulting in new expectations and demands. This book provides case studies for a deeper understanding of the operation and principles of widely applied approaches and the benefits of the technology in everyday research and activities. Presents processing, methods and techniques of GPS/GNSS implementation that are utilized in in-situ data collection in design and systems analysis Offers an all-inclusive, critical

overview of the state-of-the-art in different algorithms and techniques in GPS/GNSS Addresses both theoretical and applied research contributions on the use of this technology in a variety of geoscience disciplines

The Rise and Fall of Harland and Wolff Tom McCluskie MBE MBE, 2013-03-01 Harland and Wolff, once acknowledged as the greatest and best-known shipbuilding company in the world, for many years enjoyed a mighty eminence before a gradual descent into near obscurity. This illustrated book, told from the unique perspective of someone who was there at the time, chronicles the history of the organisation from its creation to the present day, from its halcyon days to its present incarnation. Today, the company is no longer involved in shipbuilding, maintaining only a small ship repair and engineering facility and occupying a fraction of its previously vast complex. At its peak Harland and Wolff directly employed over 45,000 people, with even more in its subsidiary companies. Well-known Harland and Wolff former employee Tom McCluskie, who was a technical consultant to James Cameron on the movie Titanic, sheds light on many little-known facts about the business, delves into the human interest stories, and recounts both the mighty zenith and ignominious demise of this great enterprise.

The Un Convention on the Law of the Non-Navigational Uses of International Watercourses

Laurence Boisson de Chazournes, Makane Mbengue, Komlan Sangbana, Mara Tignino, 2019-02-13
The United Nations Convention on the Law of the Non-Navigational Uses of International Watercourses plays a crucial role in protecting and managing international watercourses and other sources of fresh water. Boisson de Chazournes, Mbengue, Tignino, and Sangbana head a team of experts in this Commentary, examining the travaux préparatoires leading to the Convention and the practice that has developed since the adoption of the Convention in 1997. Tackling the rationale and objectives of the provisions, they offer crucial insights to the Convention's impact on the development of a universal regime for shared water resources. Examining cross-cutting topics such as the core water principles, the prevention and settlement of water disputes, the relationship between the Convention and other legal instruments, as well as the role of the ICJ and other judicial means to solve water disputes, this book is crucial to all those who seek a deep understanding of water law.

The Right to Regulate in International Investment Law Catharine Titi, 2014-12-01 Since the inception of the international investment law system, investment promotion and protection have been the *raison d'être* of investment treaties and states have confined their policy space in order to attract foreign investment and protect their investors abroad. Languishing in relative obscurity until recently, the right to regulate has gradually come to the spotlight as a key component of negotiations on new generation investment agreements around the globe. States and regional organisations, including, notably, the European Union and the United States, have started to examine ways in which to safeguard their regulatory power and guide - and delimit - the interpretive power of arbitral tribunals, by reserving their right to pursue specific public policy objectives. The monograph explores the status quo of the right to regulate, in order to offer an appraisal and a reference tool for treaty-makers, thus contributing to a better understanding of the concept and the broader discourse on how to enhance the investment law system's legitimacy.
