The Behavior of Fish and Other Aquatic Animals David Mostofsky,2012-12-02 The Behavior of Fish and Other Aquatic Animals provides a comprehensive discussion of the behavior of fish and other aquatic animals. It aims to fulfill the need for published materials that can responsibly depict the status quo of existing knowledge, and that can serve to educate the scientist seeking an organized presentation focused on biobehavioral issues and techniques. The book begins by exploring symbiotic relationships in fishes that range from broad multispecific types that have little or no intimacy between symbionts to intimate mutualistic relationships. It then presents studies on the feasibility of using teleost fish as subjects in behavioral toxicology experiments; the visual behavior of fishes; the role of the teleost telencephalon in behavior; and the auditory systems of fishes. The remaining chapters cover the behavior of turtles in land, sea, and fresh waters; visually guided behavior in turtles; the gas bubble disease of fish; and the advantages and limitations of acoustic telemetry, which has been used to obtain data from animals ranging in size from hatchling sea turtles to large tuna and sharks.

Clear the Track Phillip J. Reyburn,2012-08-23 With the air filled with the missiles of death, the bluecoats sought the shelter of mother earth and lay flat hugging the wet ground. The men were caught in an exposed position, and here occurred an incident, that would haunt William R. Hartpence of the Fifty-first Indiana as long as he lived. He observed First Lieutenant Peter G. Tait of the Eighty-ninth Illinois standing a little in advance of his regiment, which had intermingled with the Fifty-first during the assault. With his eyes fixed on the young officer, Hartpence watched as Tait was stuck by a cannon ball near the center of his body, tearing a great hole in the left side. As he fell, he threw his right arm around to his side, when his heart and left lung dropped out into it. The heart continued to throb for twenty minutes, its pulsations being distinctly seen by his agonized comrades, who stood there and saw the noble life fade out in heroic self-sacrifice. Battle of Nashville, December 16, 1864. In answer to Lincoln's call for more men to put down the rebellion, the several trunk railroads centered in Chicago oversaw the organization of a regiment composed principally of railroad employees. Numbered the Eighty-ninth Illinois Volunteer Infantry, it was better known by the sobriquet, the Railroad Regiment. Considered one of the 300 hundred fighting regiments of the Union army, the Railroaders had 133 men killed in action or later died from wounds. Another 66 succumbed in rebel prisons. At the final muster, Colonel Charles T. Hotchkiss said it best: Our history is written on the head-boards of rudely-made graves. . . . Such a record we feel proud of. And indeed, it was. PHILIP J. REYBURN is a retired field representative for the Social Security Administration. With Terry L. Wilson, he edited Jottings from Dixie: The Civil War Dispatches of Sergeant Major Stephen F. Fleharty, U.S.A.

Gesture and Sign Language in Human-Computer Interaction Ipke Wachsmuth,Martin Fröhlich,1998-04-15 This book presents the thoroughly refereed post-workshop proceedings of an International Workshop on Gesture and Sign Language in Human-Computer Interaction held in Bielefeld, Germany, in 1997. The book presents 25 revised papers together with two invited lectures. Recently, gesture and sign language have become key issues for advanced interface design in the humanization of computer interaction: AI, neural networks, pattern recognition, and agent techniques are having a significant impact on this area of research and development. The papers are organized in sections on semiotics for gesture movement, hidden Markov models, motion analysis and synthesis, multimodal interfaces, neural network methods, and applications.

Shadows on the Track Jan McLeod,2019-01-05 At Templeton's Crossing in October 1942, Private Nick Kennedy paused to write in his diary: 'One wonders why all this strife should be ... these men in the prime of their life cut down like flowers'. As a young nursing orderly serving with the 2/4th Australian Field Ambulance, Kennedy was unenviably well-placed to reflect on the futility of war. The Australian Army was woefully unprepared to fight a medical war in Papua and the soldiers paid the price. Almost 30,000 soldiers suffered from illness and tropical diseases, and an estimated 6000 were killed or wounded during the six-month campaign. These statistics have traditionally been represented as unavoidable consequences of fighting a war in a place such as Papua. This book disputes that narrative. Death and disease were inevitable outcomes, but the scale of the suffering was not. The medical challenges presented in Papua were extreme – they were not insurmountable. Shadows on the Track considers a wide range of issues that impacted on the health of the Australian soldiers before, during and after the Papuan campaign was fought and won. The strengths, successes, shortcomings and failures of the medical campaign are identified, analysed and evaluated. The focus on the front-line medical personnel – the men of the field ambulance units – brings a new perspective to the battles of the Kokoda Track, Milne Bay and the Beachheads. Shining a light on these Australians who tended the sick, mended the wounded and buried the dead in Papua makes stepping out of the shadows a little easier.

The Bootleg Caper Jack Benlow,2005-12 1929. Wall Street has crashed and the Great Depression dawns. Across America the attempt to keep the nation dry is failing. Illegal booze is king. Organised crime fights for bootleg territory on the streets. The Mob is at war. Into this cauldron steps a naive young Englishman, Jacob Wattworth. He dreams of movie stardom in Hollywood, but within days of stepping ashore in New York he becomes entangled with a rag-tag crew of raffish but lovable bootleggers led by chameleonic superwoman, Eleanor Macnamara. Murder, romance and comedy follow him from New York's mean streets to the frozen wilderness of Quebec's goldfields. Along the way, he engages with malevolent mobsters and colourful characters such as blind Colonel Selwyn Good and the flamboyant movie producer, Argus D. Lasalle. Always in love, but rarely in luck. Jacob is the plaything of events beyond his control. Even though his mentors, his girl, his friends, desert him or die, his optimism always sustains him.

Life by Algorithms Catherine Besteman,Hugh Gusterson,2019-05-23 Essays on the downsides, dysfunctions, and dangers of automated decision-making: “An excellent survey of the algorithmically managed life.” —Choice The phone systems that businesses use to screen calls. The link between student standardized test scores and public schools' access to resources. The algorithms that regulate patient diagnoses and reimbursements to doctors. The impenetrable corporate bureaucracy that can drive customers in need of help up the wall—or drive them to suicide. The storage, sorting, and analysis of massive amounts of information have enabled the automation of decision-making at an unprecedented level. Meanwhile, computers have offered a model of cognition that increasingly shapes our approach to the world. The proliferation of “roboprocesses” is the result, as editors Catherine Besteman and Hugh Gusterson observe in this rich and wide-ranging volume, which features contributions from a distinguished cast of scholars in anthropology, communications, international studies, and political science. Though automatic processes are designed to be engines of rational systems, the stories in Life by Algorithms reveal how they can in fact produce absurd, inflexible, or even dangerous outcomes. Joining the call for “algorithmic transparency,” the contributors bring exceptional sensitivity to everyday sociality into their critique to better understand how the perils of modern technology affect finance, medicine, education, housing, the workplace, food production, public space, and emotions—not as separate problems but as linked manifestations of a deeper defect in the fundamental ordering

of our society. “‘The Machine Stops,’ E. M. Forster’s 1909 science fiction story, tells the tale of a human society collapsing when the technology upon which it has become dependent fails. Think of [this] volume as ‘The Machine Starts,’ a collection of unsettling ethnographic accounts of the rise of algorithmic governance . . . A necessary and sobering call to arms.” —Stefan Helmreich, Massachusetts Institute of Technology Contributors include: Catherine Besteman * Alex Blanchette * Robert W. Gehl * Hugh Gusterson * Catherine Lutz * Ann Lutz Fernandez * Joseph Masco * Sally Engle Merry * Keesha M. Middlemass * Noelle Stout * Susan J. Terrio

The Realization of Star Trek Technologies Mark E. Lasbury, 2016-08-24 As Star Trek celebrates its 50th anniversary, the futuristic tools of Kirk, Spock, Scott, and McCoy continue to come to life. This book merges Star Trek scientific lore—how the science of the time informed the implementation of technology in the series—and the science as it is playing out today. Scientists and engineers have made and continue to develop replicators, teletransporters, tractor beams, and vision restoring visors. This book combines the vision of 1966 science fiction with the latest research in physics, biotechnology, and engineering.

Case-Based Reasoning Research and Development David W. Aha, Ian Watson, 2003-05-15 The 2001 International Conference on Case-Based Reasoning (ICCBR 2001, www.iccbr.org/iccbr01), the fourth in the biennial ICCBR series (1995 in Sesimbra, Portugal; 1997 in Providence, Rhode Island (USA); 1999 in Seeon, Germany), was held during 30 July – 2 August 2001 in Vancouver, Canada. ICCBR is the premier international forum for researchers and practitioners of case based reasoning (CBR). The objectives of this meeting were to nurture significant, relevant advances made in this field (both in research and application), communicate them among all attendees, inspire future advances, and continue to support the vision that CBR is a valuable process in many research disciplines, both computational and otherwise. ICCBR 2001 was the first ICCBR meeting held on the Pacific coast, and we used the setting of beautiful Vancouver as an opportunity to enhance participation from the Pacific Rim communities, which contributed 28% of the submissions. During this meeting, we were fortunate to host invited talks by Ralph Bergmann, Ken Forbus, Jaiwei Han, Ramon López de Mántaras, and Manuela Veloso. Their contributions ensured a stimulating meeting; we thank them all.

Marine Disease Ecology Donald C. Behringer, Brian R. Silliman, Kevin D. Lafferty, 2020-01-30 Whether through loss of habitat or cascading community effects, diseases can shape the very nature of the marine environment. Despite their significant impacts, studies of marine diseases have tended to lag behind their terrestrial equivalents, particularly with regards to their ecological effects. However, in recent decades global research focused on marine disease ecology has expanded at an accelerating rate. This is due in part to increases in disease emergence across many taxa, but can also be attributed to a broader realization that the parasites responsible for disease are themselves important members of marine communities. Understanding their ecological relationships with the environment and their hosts is critical to understanding, conserving, and managing natural and exploited populations, communities, and ecosystems. Courses on marine disease ecology are now starting to emerge and this first textbook in the field will be ideally placed to serve them. Marine Disease Ecology is suitable for graduate students and researchers in the fields of marine disease ecology, aquaculture, fisheries, veterinary science, evolution and conservation. It will also be of relevance and use to a broader interdisciplinary audience of government agencies, NGOs, and marine resource managers.

Amateurs, to Arms! John R. Elting, 1991-09-01 Begun in ignorance of the military reality, the War of 1812 was our most unmilitary war, fought catch-as-catch-can with raw troops, incompetent officers, and appallingly inadequate logistics. American soil was invaded along three frontiers, the nation's capital was occupied and burned, and the secession of the New England states loomed as a possibility. In *Amateurs, to Arms!* distinguished military historian Colonel John R. Elting shows how the young republic fought and almost lost its Second War for Independence, and how it was saved by the handful of amateur soldiers and sailors who survived, masters their deadly new professions, and somehow battled Great Britain to a standstill along our wilderness borders and on the high seas.
