Naming New York Sanna Feirstein, 2001-04 New York Historical Society docent Feirstein has written a historically rich guide to New York City that will entertain both New Yorkers and tourists as they walk through the Big Apple. The histories of the city's major neighborhoods, as well as the history of their names divide the book into sections, the remainder of which contains the names of streets, parks, plazas, corners, alleys, and avenues in that neighborhood and the history of each name. The guide is illustrated with bandw photos of New York's illustrious folk. c. Book News Inc.

To Heaven After the Storm Ari Hallmark, Lisa Reburn, 2016-09-30 To heaven after the storm is Ari Hallmark's account of her encounter with the heavens. During the April 2011 tornadoes in Arab, Alabama, Ari's parents', grandparents' and cousin's lives were taken, and Ari was knocked unconscious. While her physical body was unconscious, her spirit was invited by angels to go on a journey to the heavens. This book, transcribed by grief counselor Lisa Reburn, is about Ari's journey to and from heaven. Her story is profound and beautiful and continues to awe and inspire those around her.

Physics of Solar and Stellar Coronae: G.S. Vaiana Memorial Symposium Jeffrey L. Linsky, Salvatore Serio, 2012-12-06 The original plans for a meeting to celebrate the second centenary of the Astronomical Observatory of Palermo were for a celebration with a double character. The gathering was to have both a historical character, appropriate for a bicentennial, and a technical character, to note and chronicle the new phase of the history of the Observatory, which has prospered in parallel with the development of this fairly recent topic in astronomical research, the physics of stellar and solar coronae. After the untimely death of the Observatory's Director, Giuseppe S. Vaiana (Pippo to his many friends), a number of colleagues and friends insisted that the celebration should nevertheless be held and should be dedicated to this farsighted scientist who stimulated the development of coronal physics from the early x-ray observations of the solar corona to the recognition of coronae as an observable feature of nearly all stars. This memorial dedication did not change the character of the meeting, which was held in Palermo from 22 to 26 June 1992; as his contributions are very alive in the papers presented at the meeting and collected here, Pippo Vaiana has certainly achieved his place in the history of

Astronomy.

The Next 500 Years Christopher E. Mason, 2021-04-20 An argument that we have a moral duty to explore other planets and solar systems--because human life on Earth has an expiration date. Inevitably, life on Earth will come to an end, whether by climate disaster, cataclysmic war, or the death of the sun in a few billion years. To avoid extinction, we will have to find a new home planet, perhaps even a new solar system, to inhabit. In this provocative and fascinating book, Christopher Mason argues that we have a moral duty to do just that. As the only species aware that life on Earth has an expiration date, we have a responsibility to act as the shepherd of life-forms--not only for our species but for all species on which we depend and for those still to come (by accidental or designed evolution). Mason argues that the same capacity for ingenuity that has enabled us to build rockets and land on other planets can be applied to redesigning biology so that we can sustainably inhabit those planets. And he lays out a 500-year plan for undertaking the massively ambitious project of reengineering human genetics for life on other worlds. As they are today, our frail human bodies could never survive travel to another habitable planet. Mason describes the toll that long-term space travel took on astronaut Scott Kelly, who returned from a year on the International Space Station with changes to his blood, bones, and genes. Mason proposes a ten-phase, 500-year program that would engineer the genome so that humans can tolerate the extreme environments of outer space--with the ultimate goal of achieving human settlement of new solar systems. He lays out a roadmap of which solar systems to visit first, and merges biotechnology, philosophy, and genetics to offer an unparalleled vision of the universe to come.

The Deviant's War Eric Cervini, 2020-06-02 FINALIST FOR THE 2021 PULITZER PRIZE IN HISTORY. INSTANT NEW YORK TIMES BEST SELLER. New York Times Book Review Editors' Choice. Winner of the 2021 Randy Shilts Award for Gay Nonfiction. One of The Washington Post's Top 50 Nonfiction Books of 2020. From a young Harvard- and Cambridge-trained historian, and the Creator and Executive Producer of *The Book of Queer* (coming June 2022 to Discovery+), the secret history of the fight for gay rights that began a generation before Stonewall. In 1957, Frank Kameny, a

rising astronomer working for the U.S. Defense Department in Hawaii, received a summons to report immediately to Washington, D.C. The Pentagon had reason to believe he was a homosexual, and after a series of humiliating interviews, Kameny, like countless gay men and women before him, was promptly dismissed from his government job. Unlike many others, though, Kameny fought back. Based on firsthand accounts, recently declassified FBI records, and forty thousand personal documents, Eric Cervini's *The Deviant's War* unfolds over the course of the 1960s, as the Mattachine Society of Washington, the group Kameny founded, became the first organization to protest the systematic persecution of gay federal employees. It traces the forgotten ties that bound gay rights to the Black Freedom Movement, the New Left, lesbian activism, and trans resistance. Above all, it is a story of America (and Washington) at a cultural and sexual crossroads; of shocking, byzantine public battles with Congress; of FBI informants; murder; betrayal; sex; love; and ultimately victory.
