Stealing the Gila David H. DeJong,2016-09-15 By 1850 the Pima Indians of central Arizona had developed a strong and sustainable agricultural economy based on irrigation. As David H. DeJong demonstrates, the Pima were an economic force in the mid-nineteenth century middle Gila River valley, producing food and fiber crops for western military expeditions and immigrants. Moreover, crops from their fields provided an additional source of food for the Mexican military presidio in Tucson, as well as the U.S. mining districts centered near Prescott. For a brief period of about three decades, the Pima were on an equal economic footing with their non-Indian neighbors. This economic vitality did not last, however. As immigrants settled upstream from the Pima villages, they deprived the Indians of the water they needed to sustain their economy. DeJong traces federal, territorial, and state policies that ignored Pima water rights even though some policies appeared to encourage Indian agriculture. This is a particularly egregious example of a common story in the West: the flagrant local rejection of Supreme Court rulings that protected Indian water rights. With plentiful maps, tables, and illustrations, DeJong demonstrates that maintaining the spreading farms and growing towns of the increasingly white population led Congress and other government agencies to willfully deny Pimas their water rights. Had their rights been protected, DeJong argues, Pimas would have had an economy rivaling the local and national economies of the time. Instead of succeeding, the Pima were reduced to cycles of poverty, their lives destroyed by greed and disrespect for the law, as well as legal decisions made for personal gain.

The Sonoran Desert: Its Geography, Economy, and People Roger Dunbier,1968 Although possessing a common physical heritage, the Sonoran Desert has taken on highly contrasting forms in its American and Mexican portions. This work does not, therefore, attempt a regional study in the usual sense of the term, but is rather an examination of disparate economic development, much influenced by contrasting technological achievements as well as the accidents of history. Although the significance of geographic regionalism is implicit throughout this study, no attempt is made to show any overriding unity at work, geographical or otherwise, welding together a desert region. Instead the desert acts as a stage for social drama in which drought and extreme heat provide the essential backcloth. The scarcity of water and man's inability to grow crops without irrigation have not, indeed, changed with time, and only constant reference to this immutable factor can give meaning to the evolution of human activities within the desert.

The Federal Landscape Gerald D. Nash,1999-08 The vastness of the American West is apparent to anyone who travels through it, but what may not be immediately obvious is the extent to which the landscape has been shaped by the U.S. government. Water development projects, military bases, and Indian reservations may interrupt the wilderness vistas, but these are only an indication of the extent to which the West has become a federal landscape. Historian Gerald Nash has written the first account of the epic growth of the economy of the American West during the twentieth century, showing how national interests shaped the West over the course of the past hundred years. In a book written for a broad readership, he tells the story of how America's hinterland became the most dynamic and rapidly growing part of the country. The Federal Landscape relates how in the nineteenth century the West was largely developed by individual enterprise but how in the twentieth Washington, D.C., became the central player in shaping the region. Nash traces the development of this process during the Progressive Era, World War I, the New Deal, World War II, the affluent postwar years, and the cold-war economy of the 1950s. He analyzes the growth of western cities and the emergence of environmental issues in the 1960s, the growth of a vibrant Mexican-U.S. border economy, and the impact of large-scale immigration from Latin America and Asia at century's end. Although specialists have studied many particular facets of western growth, Nash has written the only book to provide a much-needed overview of the subject. By addressing subjects as diverse as public policy, economic development, environmental and urban issues, and questions of race, class, and gender, he puts the entire federal landscape in perspective and shows how the West was really won. It was the federal government that determined the pattern of farms in the humid regions, built the major roads and highways, and fostered the growth of the principle cities in the West. The federal government built the large dams and diverted important river systems throughout the West, determined the shape of the large military reservations and their environs, and forced Native Americans to occupy the reservations on which they can be found today. The government is largely responsible for the aerospace complexes and scientific research centers that became so important in the West during the second half of the twentieth century. In short, the federal government created a federal landscape in the West. --Gerald D. Nash
