Animals Habitats: Armenian Nathalie Beullens,2016-01-01

Biodiversity of Armenia George Fayvush,2023-09-08 Armenia is a small landlocked mountainous country located in the Southern Caucasus. It is a typical mountainous country, having its lowest point of 375m above sea level and culminating at 4095m with an average altitude of 1850m, where the landscapes and ecosystems form a complex multi-functional system. In general, the ecosystems of Armenia are characterized by a number of peculiarities, which all together contribute to formation of rich and unique biodiversity. On the small territory of Armenia (less than 30 thousand km²) there are about 3800 species of vascular plants (about a half of the whole Caucasian flora), 428 species of soil and water algae, 399 species of mosses, 4207 species of fungi, 464 species of lichens, 549 species of vertebrates and about 17200 species of invertebrates. The biodiversity of Armenia is notable for high endemism: about 500 species of fauna (about 3% of the fauna) and 147 species of flora (3.8% of total flora) are considered endemics. Such a high level of endemism is typical only for some of the large islands. Due to the huge variety of climates (from dry subtropics to cold alpine) and soil conditions all the main Caucasian ecosystems (besides humid subtropics) are represented in Armenia – deserts and semi-deserts, steppes, meadow-steppes, forests and

open woodlands, sub-alpine and alpine vegetation as well as intrazonal ecosystems. Therefore Armenia is a biodiversity hotspot both within the Caucasian ecoregion and around the globe. This book compiles, summarizes and analyzes data on flora, fauna and mycobiota of Armenia, with a special focus on the impact of forecasted climate change on biodiversity and ecosystems of the region.

Perspectives on Armenian Prospects Z.S. Andrew Demirdjian, Ph.D., 2015-11-03
The young Republic of Armenia is transitioning from adolescence into maturity. The country's growing pains are many, but manageable due to our committed government officials and the ever helpful hand of the vast Armenian Diaspora. As always, the Diaspora has been the shock absorbers of Armenia and Artsakh. Unfortunately, all are experiencing the loss of population through either debilitating immigration from Armenia or through the irreversible trend of assimilation in the Diaspora. *Perspectives on Armenian Prospects* treats both subjects in depth. Additionally, the book tackles other important

problems and prospects such as the unity of the Armenians, the Genocide, the economy, the looming conflict with Azerbaijan, and ways to improve the twin republics to mention a few. This book is full of energy, enthusiasm and innovative ideas and practical strategies to suggest ways to strengthen Armenia and Artsakh in the face of being landlocked and blockaded. Introduction to Armenia Gilad James, PhD, Armenia is a landlocked country located in the South Caucasus region of Eurasia. It has a population of approximately 3 million people and covers an area of 29,743 square kilometers. Armenia is bordered by Turkey to the west, Georgia to the north, Azerbaijan to the east, and Iran to the south. The history of Armenia dates back to 4000 BC and has been marked by numerous conflicts and invasions. In the early 20th century, Armenia was part of the Russian Empire, which was dissolved following the Russian Revolution. In 1918, Armenia declared independence, but it was short-lived as the country was occupied by the Soviet Union in 1920. Armenia regained independence in 1991 following the collapse of the Soviet Union. Today, Armenia is a rapidly developing country with a diverse economy and a rich cultural heritage.

Animal City Andrew A. Robichaud,2019 American urbanites once lived alongside livestock and beasts of burden. But as cities grew, human-animal relationships changed. The city became a place for pets, not slaughterhouses or working animals. Andrew Robichaud traces the far-reaching consequences of this shift--for urban landscapes, animal- and child-welfare laws, and environmental justice.

Armenian Golgotha Grigoris Balakian,2010-03-09 On April 24, 1915, Grigoris Balakian was arrested along with some 250 other leaders of Constantinople's Armenian community. It was the beginning of the Ottoman Empire's systematic attempt to eliminate the Armenian people from Turkey—a campaign that continued through World War I and the fall of the empire. Over the next four years, Balakian would bear witness to a seemingly endless caravan of blood, surviving to recount his miraculous escape and expose the atrocities that led to over a million deaths. **Armenian Golgotha** is Balakian's devastating eyewitness account—a haunting reminder of the first modern genocide and a controversial historical document that is destined to become a classic of survivor literature.
