*Military Inc.* Ayesha Siddiqi-Agha, 2007-05-09 Pakistan has emerged as a strategic ally of the United States in the war on terror. It is the third largest recipient of U.S. aid in the world. But how stable is Pakistan? Ayesha Siddiqi shows how the military has gradually gained control of Pakistan's political, social, and economic resources. This power has transformed Pakistani society, where the armed forces have become an independent class. The military is entrenched in the corporate sector and controls the country's largest companies and large tracts of real estate. So Pakistan's companies and its main assets are in the hands of a tiny minority of senior army officials. Siddiqi examines this military economy and the consequences of merging the military and corporate sectors. Does democracy have a future in the new Pakistan? Will the generals ever withdraw to the barracks. *Military Inc.* analyzes the internal and external dynamics of this gradual power-building and the impact that it is having on Pakistan's political and economic development.

*Military Inc.* Ayesha Siddiqi-Agha, 2017 Pakistan is a strategic ally of the US in the 'war on terror'. It is the third largest recipient of US aid in the world. Yet Pakistan is a state run by its army and intelligence service. Operating in the shadows, Pakistan's military industrial complex owns and controls swathes of the economic and political landscape of the country. *Military Inc.* dares to illuminate the military as an oppressive holding company possessing not just security-related businesses, but also hotels, shopping malls, insurance companies, banks, farms and even an airline. The result is a deeply undemocratic society, where money is funnelled towards the military's economic enterprises, leaving those in need of it impoverished and effectively disenfranchised. With an empirical richness, and a view to Pakistan's recent history, Ayesha Siddiqi offers a detailed and powerful case study of a global phenomenon: corruption, hollow economic growth and elitism. This new edition includes a chapter on the recent developments of the military's foray into the media, and a new preface.

*The Indian Wars and American Military Thought 1865-1890* U. S. Army War College, 2015-12-10 The period 1865-1890 represents the final years of Indian warfare conducted by the United States Army. The Army fought over 900 separate engagements during these years against foes who used

unconventional tactics. Although this was a significant period in its history, the Army did not develop or record a useful unconventional war doctrine. This book explores several significant reasons the Army continued its emphasis on a philosophy of total, conventional war. The increased isolation of the Army after the Civil War caused its leaders to realize that a new mission was required to insure its survival as an institution. Most importantly, this realization, combined with the transient and minor nature of the Indian threat and the emergence of a trend towards professionalism in society, led the Army to see its future as a force dedicated to modern, conventional war.

**Confederate Staff Work at Chickamauga** U. S. Army U.S. Army Command and Staff College, 2015-12-18 One of the critical variables in the successful completion of a military campaign is the functioning of an army's command and control system. In the American Civil War, a commander's primary command and control tool was his staff. Large Civil War armies like the Army of Tennessee required significant numbers of staff personnel. Staffs existed at each level of command from regiment through the army level. Staff officers had responsibility in three broad areas: personnel and logistical support to the army, military administration, and command and control. This book analyzes the roles, functional organization, and performance of the staff of the Army of Tennessee and its subordinate corps during the Chickamauga campaign, 16 August - 22 September 1863. Primary sources for staff personnel include the Official Records of the Union and Confederate Armies, and the Compiled Service Records of staff officers. Staff performance is evaluated in terms of doctrine and practices as embodied in regulations and military literature of the day. This book concludes that, while staff performance was adequate in administration and logistical support, the performance of the command and control system was inadequate. The staff's failure in this area had a significant negative impact on the performance of the army as a whole.

**Morale in the Army of the Cumberland During the Tullahoma and Chickamauga Campaigns** , 2015-12-25 This book examines insights into the state of morale of the Army of the Cumberland during the period of the Tullahoma and Chickamauga campaigns, covering the period from June through September 1863. The book focused on the organization and leadership of the Army of the Cumberland. It then examined morale as the whole of diverse factors, including national and individual factors. National and Individual factors were generally out of control of the army leadership. They included a soldiers' motivation for joining the army, his views toward southern sympathizers at home, the impact of John Morgan's Ohio Raid, soldier views on conscription, and effects of the progress of the war on morale. Individual factors comprised concerns for home, family, business, and religion. The book

then examined morale factors the army could control. It explored army life, attitude toward leadership, level of discipline, how the army leadership cared for soldiers, and the impact of mail on soldier morale. The book concludes that the Army of the Cumberland was a well lead organization. Consequently, the state of the morale of the army was high throughout the Tullahoma campaign and was not significantly diminished as a result of the defeat at Chickamauga. The work further concluded that soldier confidence in Major General William S. Rosecrans remained high throughout the period of the study. Confidence in many corps and some division level commanders did, however, suffer as a result of the Chickamauga.

*Returning to Army Leadership* United States United States Army War College, 2016-01-11 Great military leaders inspire their troops and lead them into battle. No senior officer in today's Army has risen to this level of greatness. Instead, we are led by a corps of general officers who are better described with superlatives like scholar, diplomat, and manager. This book examines what has changed in our leadership doctrine, selection process, training and philosophy of leadership that has resulted in this profound change. It makes recommendations regarding how we can return to our heritage and revise our leadership programs to develop the next generation of Generals to lead our Army.

**Major General William S. Rosecrans and the Transformation of the Staff Army of the Cumberland** U. S. Army U.S. Army War College, 2015-12-18 This book will discuss the transformation and creation of the staff of the Army of the Cumberland under the tenure of Major General William S. Rosecrans. The study will suggest that the staff transformation under MG Rosecrans created one of the first truly modern staffs. This book will serve as a case study, illustrating how one commander used his vision of the future to overcome obstacles present in his theater of operations. Additionally, the study will show that after the removal of William S. Rosecrans as Commander of the Army of the Cumberland, the staff infrastructure he envisioned later enabled Sherman to successfully conduct his famous Atlanta Campaign and the subsequent March to the Sea.

*Strategic Leadership Southern Style* , 2015-12-27 When Jefferson Davis accepted the position of Provisional President of the Confederacy in 1861, he would not go it alone. Just as his counterpart in Washington was surrounded by senior civilian statesmen and professional military officers, Davis too had his Cabinet. This inner circle had duties and responsibilities much like their counterparts today, including advising the President on diplomatic, informational, military and economic matters that could lead to the South's recognized independence. Of these cabinet officials, the most important for the embattled, wartime Confederacy was the Secretary of War. Six men, both civilian and military, held that crucial position, 1861-1865. This Strategy

Research Project (SRP) analyzes the relationship between those key senior secretaries and President Davis. Conversely the book also examines to what extent he acknowledged and accepted their recommendations. The book also explores the impact of President Davis's leadership style on the Confederate war effort. Lastly the SRP gleans insights into enduring civil-military relationships that are just as applicable today as they were during the Civil War.

Lee Builds an Army U S Army Command and General Staff Coll,2016-01-06 Robert E. Lee, in his first campaign as the new commander of the Army of Northern Virginia, stopped the Union offensive against Richmond in a series of engagements known as the Seven Days. Although eventually successful, Confederate operations were clumsy and erratic and often missed opportunities to secure greater success. At the end of the Seven Days, Lee reorganized his forces and began preparations for his next campaign. This new campaign, which resulted in the Battle of Second Manassas just two months later, is widely considered to be one of Lee's most brilliant operations. The purpose of this book is to identify the changes and improvements that occurred within Lee's army which enabled it to show this vast improvement in such a short time span. The book uses LTC James Dubik's model for campaign analysis which is a modification of the familiar ends, ways, and means characterization of campaign planning. It evaluates four components of a campaign: intellectual, cybernetic, psychological, physical, and harmonic as a methodology for comparative analysis. Despite his inexperience, Lee was able to learn from his first campaign. He could recognize what needed to be done and had the patience, intelligence, and courage to do it. Each of the adjustments and modifications he made were important but not decisive by themselves. It was the synergism of wise personnel and organization changes combined with improved operational planning which proved to be the secret in transforming Lee's troops into the legendary Army of Northern Virginia.

*Making a Rifleman from Mud* U. S. Army U.S. Army War College,2015-12-19 In the summer of 1899, Lieutenant Matthew Batson was commanding L Troop, 4th U.S. Cavalry, during operations in the Philippines. Already recognized as an energetic and courageous officer during the war in Cuba, Batson gained further notoriety after being awarded the Congressional Medal of Honor for actions in combat with his troop in July. At the request of his superiors, in late summer Batson submitted a formal proposal for raising a scout company for the First Division's Provisional Cavalry Brigade. The plan called for this company to be recruited from the Macabebes, an ethnic tribal group in Southern Luzon who had long opposed domination by the majority

Tagalogs. The Tagalogs formed the backbone and provided most of the leadership for the Army of the Philippine Republic, fighting against U.S. rule in the archipelago. The Macabebes' military usefulness had been previously recognized by the Spanish as they faced revolt and unrest prior to the war with the United States; large numbers of Macabebes had been recruited and served with the Spanish forces until their defeat and cession of the Philippines to the United States in 1898.

**Opportunities Lost** U S Army Command and General Staff Coll,2016-01-03 This book investigates the history of the Confederate Army of Tennessee from formation under command of Braxton Bragg through the eve of the Battle of Chickamauga. The specific question to be answered is whether the Army of Tennessee had opportunities to destroy the Union Army of the Cumberland before the battle of Chickamauga, and if so why they were not taken advantage of. Answering this question requires an examination of the history of the Army of Tennessee prior to September 1863, with emphasis on Bragg's personality and abilities. This book provides a basic overview of the actions of the Army of Tennessee prior to Chickamauga, discusses command problems that developed between Bragg and many of his important Generals, and assesses how those problems contributed to the battlefield results.

Manning the U.s. Army U. S. Army U.S. Army War College,2015-12-18 During 1989, the world witnessed the decline of the threat from the USSR and the apparent unraveling of the Warsaw Pact. The American public and Congress used these events to begin questioning the need for the current Department of Defense structure. The size of the Defense budget and the size of the national debt makes these actions predictable. As Defense cuts are being proposed and evaluated, it is the responsibility of those in Defense to ensure an eye is kept on future national security interests. The DOD and the services must remain viable forces during this period of change and restructure. This book examines the challenge of meeting the manpower requirements of a reducing Army; how to provide the flexibility for future expansion; the capability of current systems of recruiting and the draft to meet these needs; the potentials of the proposed national service corps, and concludes with recommendations.

*Braxton Bragg- Military Strategist* U. S. Army U.S. Army War College, 2016-01-03 Braxton Bragg progressed through a diverse and demanding career to become a military strategist and ultimately General-in- Chief of Confederate States of America (CSA) Armies. General Braxton Bragg devoted over four years, of his life to senior CSA Army leadership positions, mostly in command. He surpassed every general officer in the CSA and Union in holding such a wide range of senior officer responsibilities. Bragg observed closely and operated in and around the operational and strategic environment for the majority of his life. By virtue of his previous duties, assignments, and experiences, Bragg observed, participated in, and influenced hundreds of meetings and decisions that are best described as strategic art. He developed his strategic competencies through: civilian and military education; an honorable, diverse, demanding, and rare service and assignment history; and, life-threatening experiences that only a few would ever taste. Braxton Bragg strategized with the best experts of his day.

**Civilian Contractors on the Battlefield** U S Army War College, 2015-12-17 The U. S. Military is becoming increasingly dependent upon civilian commercial contractors to provide logistical support on the battlefield. Despite the current military philosophy on outsourcing, the increasing dependence of our war fighters on this support, the emphasis on partnership with the commercial industry, the Army and Joint Vision statements which stress Focused Logistics and On Time Delivery, and the demands for multinational and host nation logistics support, these concepts and the use of civilians on the Battlefield remain highly volatile issues.. Little definitive policy guidance and training are provided. Commanders' and war fighter's attitudes and training remain entrenched in the Iron Mountain paradigm. Contractor loyalty to the almighty dollar as opposed to support for/of the front-line soldier remains serious questions which will be difficult to test in a non-warfare environment. Budgetary constraints as well as technological advances will continue to drive policy in this direction and put pressure on the Logistics community to provide the necessary support. However, can we depend on paid contractors to meet the demands and face the stresses that our current military and non-contractor logicians face? Failure in this area is not an option. Our American fighting forces require, deserve, and must have the best support to defeat any prospective enemy on any battlefield. This book will endeavor to address these issues and proposed solutions for ensuring the support necessary to help our soldiers maintain, survive, and win on the modern battlefield.

**Clausewitz's Concept of the Culminating Point and Its Application in the Gettysburg Campaign** U. S. Army U.S. Army War College, 2015-12-11 With the publication of the 1982 edition of Field Manual 100-5, Operations, the U.S. Army presented a fighting doctrine rooted in classical military theory. Yet, doctrine, to be useful, must be accepted and understood in its own right by those who have to apply it. Clausewitz's idea of the culminating point is a good example. FM 100-5 cites the concept of the culminating point as central to understanding Air-Land Battle and operational art and, consequently, explains it to its readers. The Clausewitzian concept of the culminating point is even more important to officers who plan and conduct theater operations. This book offers a critical analysis of the theory of the culminating point in the well known Gettysburg Campaign conducted by General Robert E. Lee in 1863. This Civil War battle has been the subject of more study and extensive written works than any other battle of the war and the student of military history would think that it would be rich in examples of the application of military theory, in this case the concept of the culminating point. Was the Clausewitzian theory of the culminating point evident in the campaign? Did Lee consider the concept and apply it to his decisions regarding the Campaign? Did the campaign support the concept and add validity to it? In looking for these answers, the reader can better understand the application of the concept of the culminating point, and, thereby, become a better practitioner of turning scientific theory into artful tactics and operations. Lee's 1863 campaign into Pennsylvania is an excellent case study from which to investigate many of Clausewitz's theories about war. The concept of the culminating point is particularly well served by what happened in the campaign. FM 100-5 has reintroduced the culminating point to the U.S. Army and has contributed to the educational process to help soldiers detect the culminating point with the discriminative judgment Clausewitz said was necessary. Studying campaigns like Gettysburg can be very useful for a better appreciation of theoretical and doctrinal concepts. A better understanding of theory and its relationship to doctrine is important; understanding the key concept of the culminating point is one example.

**Defending America's Shores** U S Army Command and General Staff Coll, 2015-12-18 This study investigates the contributions of the U.S. Army's coastal fortification system to execute the coastal defense policy of the United States, in view of the tremendous technological advances and developmental shortfalls it had to contend with over the course of its existence. The concept presented is one showing the ultimate failure of the entire

fortification network to maintain its viability to defend critical harbors when individual fortifications underwent their baptisms of fire. Until the conclusion of World War II, the U.S. Army has traditionally been the instrument entrusted with executing the land-based element of American coastal defense policy. The overall challenge was to organize a coastal defense establishment properly resourced to meet any threat within the fiscal restraints imposed by the national leadership. The book explains the development of the coastal fortification system in relation to the Army's concept of organizing and equipping organizations to conduct operations in support of its mission and the technological impacts influencing coastal fortifications. This book will promote the lessons from the Army's failure to continually develop a system capable of adapting to technological changes and will serve as an example of the consequences of flawed policy decision making for future force developers.
