**The Road to Arnhem** Donald R. Burgett,2001 In a daring plan to end the war, the Screaming Eagles of the 101st Airborne jumped into the heart of Nazi-held Europe -- and began a journey into hell.... In September 1944 -- sixteen weeks after the D-Day invasion -- British Field Marshal Montgomery unleashed a daring attack aimed at the heart of Nazi Germany. For the men of the Screaming Eagles of the 101st Airborne, including nineteen-year-old Donald Burgett, the plan meant parachuting in broad daylight into Holland, securing the road to the Rhine River, and helping the British cross into Germany. It was a mission that sent thousands of young men to their deaths. In this electrifying memoir, Donald Burgett takes us into seventy-two days of close-quarter combat in foxholes and towns against brutal Panzer counterattacks and into the face of the feared German 88mm artillery as the Screaming Eagles push straight into the might of the German Army. Capturing the horror and confusion of war, as ally and enemy move within yards of each other, Burgett tells the story of a legendary fighting unit's bloody victory -- in an epic battle for a bridge too far.

Dutch Girl Robert Matzen,2019-04-15 Twenty-five years after her passing, Audrey Hepburn remains the most beloved of all Hollywood stars, known as much for her role as UNICEF ambassador as for films like *Roman Holiday* and *Breakfast at Tiffany's*. Several biographies have chronicled her stardom, but none has covered her intense experiences through five years of Nazi occupation in the Netherlands. According to her son, Luca Dotti, The war made my mother who she was. Audrey Hepburn's war included participation in the Dutch Resistance, working as a doctor's assistant during the Bridge Too Far battle of Arnhem, the brutal execution of her uncle, and the ordeal of the Hunger Winter of 1944. She also had to contend with the fact that her father was a Nazi agent and her mother was pro-Nazi for the first two years of the occupation. But the war years also brought triumphs as Audrey became Arnhem's most famous young ballerina. Audrey's own reminiscences, new interviews with people who knew her in the war, wartime diaries, and research in classified Dutch archives shed light on the riveting, untold story of Audrey Hepburn under fire in World War II. Also included is a section of color and black-and-white photos. Many of these images are from Audrey's personal collection and are published here for the first time.

**Arnhem** Antony Beevor,2019-04-16 Operation Market Garden, the plan in 1944 to end the war by capturing the bridges leading to the Lower Rhine and beyond, was a bold concept- the Americans thought it unusually bold for Field Marshal Montgomery. It was the greatest demonstration of paratroop power ever seen - but the cost of failure was horrendous, above all for the Dutch who risked everything to help. German reprisals were cruel and lasted until the end of the war. The British fascination for heroic failure has clouded the story of Arnhem in myths, not least that victory was even possible. Antony Beevor, using many overlooked and new sources from Dutch, British, American, Polish and German archives, has reconstructed the terrible reality of this epic clash. Yet this book, written in Beevor's inimitable and gripping narrative style, is about much more than a single dramatic battle. It looks into the very heart of war.

**The Googlization of Everything** Siva Vaidhyanathan,2012-03-13 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission--To organize the world's information and make it universally accessible--and its much-quoted motto, Don't be evil. In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google--and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the evil it pledged to avoid.

The Measurement and Analysis of Housing Preference and Choice Sylvia J.T. Jansen,Henny C.C.H. Coolen,Roland W. Goetgeluk,2011-05-12 What are the current trends in housing? Is my planned project commercially viable? What should be my marketing and advertisement strategies? These are just some of the questions real estate agents, landlords and developers ask researchers to answer. But to find the answers, researchers are faced with a wide variety of methods that measure housing preferences and choices. To select and value a valid research method, one needs a well-structured overview of the methods that are used in housing preference and housing choice research. This comprehensive introduction to this field offers just such an overview. It discusses and compares numerous methods, detailing the potential limitation of each one, and it reaches beyond methodology, illustrating how thoughtful consideration of methods and techniques in research can help researchers and other professionals to deliver products and services that are more in line with residents' needs.

**Managing Ocean Environments in a Changing Climate** Kevin J. Noone,Ussif Rashid Sumaila,Robert J. Diaz,2013-06-29 Managing Ocean

Environments in a Changing Climate summarizes the current state of several threats to the global oceans. What distinguishes this book most from previous works is that this book begins with a holistic, global-scale focus for the first several chapters and then provides an example of how this approach can be applied on a regional scale, for the Pacific region. Previous works usually have compiled local studies, which are essentially impossible to properly integrate to the global scale. The editors have engaged leading scientists in a number of areas, such as fisheries and marine ecosystems, ocean chemistry, marine biogeochemical cycling, oceans and climate change, and economics, to examine the threats to the oceans both individually and collectively, provide gross estimates of the economic and societal impacts of these threats, and deliver high-level recommendations. Nominated for a Katerva Award in 2012 in the Economy category State of the science reviews by known marine experts provide a concise, readable presentation written at a level for managers and students Links environmental and economic aspects of ocean threats and provides an economic analysis of action versus inaction Provides recommendations for stakeholders to help stimulate the development of policies that would help move toward sustainable use of marine resources and services

**Arnhem** R. E. Urquhart,2011-02-17 An on-the-ground account of the 1st Airborne Division during Operation Market Garden from the British commander who led the “Bridge Too Far” battle. Major-General Urquhart commanded the 1st British Airborne Division in Operation Market Garden, the greatest airborne assault of World War II, the struggle to capture Arnhem and win control of the bridge across the lower Rhine. The story of the 1st Airborne Division at Arnhem involved not only an Airborne Corps of three Divisions but also the bulk of the British 2nd Army in Europe. Gen. Urquhart has told the story of those fateful nine days clearly, frankly and, despite the terrible circumstances, not without humor. It ranks as an important work, describing an operation which opened with such high hopes and left its name forever as a feat of the highest endurance and valor.

The Gene's-Eye View of Evolution J. Arvid Ågren,2021-07-21 To many evolutionary biologists, the central challenge of their discipline is to explain adaptation, the appearance of design in the living world. With the theory of evolution by natural selection, Charles Darwin elegantly showed how a purely mechanistic process can achieve this striking feature of nature. Since then, the way many biologists have thought about evolution and natural selection is as a theory about individual organisms. Over a century later, a subtle but radical shift in perspective emerged with the gene's-eye view of evolution in which natural selection was conceptualized as a struggle between genes for replication and transmission to the next generation. This viewpoint culminated with the publication of *The Selfish Gene* by Richard Dawkins (Oxford University Press, 1976) and is now commonly referred to as selfish gene thinking. The gene's-eye view has subsequently played a central role in evolutionary biology, although it continues to attract controversy. The central aim of this accessible book is to show how the gene's-eye view differs from the traditional organismal account of evolution, trace its historical origins, clarify typical misunderstandings and, by using examples from contemporary experimental work, show why so many evolutionary biologists still consider it an indispensable heuristic. The book concludes by discussing how selfish gene thinking fits into ongoing debates in evolutionary biology, and what they tell us about the future of the gene's-eye view of evolution.--

**Consilience** E. O. Wilson,2014-11-26 A dazzling journey across the sciences and humanities in search of deep laws to unite them. --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant jumping together), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.
