**Bark Canoes and Skin Boats of North America** Edwin Tappan Adney,Howard I. Chapelle,2007-10-17 The bark canoes of the North American Indians, particularly those of birchbark, were among the most highly developed manually propelled primitive watercraft. Built with Stone Age tools from available materials, their design, size, and appearance were varied to suit the many requirements of their users. Even today, canoes are based on these ancient designs, and this fascinating guide combines historical background with instructions for constructing one. Author Edwin Tappan Adney, born in 1868, devoted his life to studying canoes and was practically the sole scholar in his field. His papers and research have been assembled by a curator at the Smithsonian Institution.

*Renaissance Fun* Philip Steadman,2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects; in gardens and fountains; and in the automata and self-playing musical instruments that were installed in garden grottoes. How did the machines behind these shows work? How exactly were chariots filled with singers let down onto the stage? How were flaming dragons made to fly across the sky? How were seas created on stage? How did mechanical birds imitate real birdsong? What was 'artificial music', three centuries before Edison and the phonograph? How could pipe organs be driven and made to play themselves by waterpower alone? And who were the architects, engineers, and craftsmen who created these wonders? All these questions are answered. At the end of the book we visit the lost 'garden of marvels' at Pratolino with its many grottoes, automata and water jokes; and we attend the performance of Mercury and Mars in Parma in 1628, with its spectacular stage effects and its music by Claudio Monteverdi – one of the places where opera was born. Renaissance Fun is offered as an entertainment in itself. But behind the show is a more serious scholarly argument, centred on the enormous influence of two ancient writers on these subjects, Vitruvius and Hero. Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers. Hero of Alexandria wrote the Pneumatics, a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata. A second book by Hero On Automata-Making – much less well known, then and now – describes two miniature theatres that presented plays without human intervention. One of these, it is argued, provided the model for the type of proscenium theatre introduced from the mid-sixteenth century, the generic design which is still built today. As the influence of Vitruvius waned, the influence of Hero grew.

**Playthings in Early Modernity** Allison Levy, 2017-02-22 An innovative volume of fifteen interdisciplinary essays at the nexus of material culture, performance studies, and game theory, *Playthings in Early Modernity* emphasizes the rules of the game(s) as well as the breaking of those rules. Thus, the titular plaything is understood as both an object and a person, and play, in the early modern world, is treated not merely as a pastime, a leisurely pursuit, but as a pivotal part of daily life, a strategic psychosocial endeavor.

**Mechanics: The Science of Machinery** A. Russell Bond, 2021-05-19 The book is written not just for a mechanical engineer but also for the layman who would learn of the mechanical contrivances that contribute to his material welfare. The author has avoided the use of technical terms, as far as possible, and where inescapable, the technical words have been explained and defined. The book covers topics from Tool Making Animals to Engines of Destruction. Through this work, the author has aimed to give a detailed and thorough view of the whole story of human progress in all things mechanical. It's the entire story of machinery, from primitive man's first tries to expand his physical powers with mechanical aids down to that era of early 1900s where massive, steel-muscled machinery and marvelously complex mechanisms, is the story of human advancement.

*Addiction by Design* Natasha Dow Schüll, 2014-05-11 Recent decades have seen a dramatic shift away from social forms of gambling played around roulette wheels and card tables to solitary gambling at electronic terminals. Slot machines, revamped by ever more compelling digital and video technology, have unseated traditional casino games as the gambling industry's revenue mainstay. *Addiction by Design* takes readers into the intriguing world of machine gambling, an increasingly popular and absorbing form of play that blurs the line between human and machine, compulsion and control, risk and reward. Drawing on fifteen years of field research in Las Vegas, anthropologist Natasha Dow Schüll shows how the mechanical rhythm of electronic gambling pulls players into a trancelike state they call the machine zone, in which daily worries, social demands, and even bodily awareness fade away. Once in the zone, gambling addicts play not to win but simply to keep playing, for as long as possible—even at the cost of physical and economic exhaustion. In continuous machine play, gamblers seek to lose themselves while the gambling industry seeks profit. Schüll describes the strategic calculations behind game algorithms and machine ergonomics, casino architecture and ambience management, player tracking and cash access systems—all designed to meet the market's desire for maximum time on device. Her account moves from casino floors into gamblers' everyday lives, from gambling industry conventions and Gamblers Anonymous meetings to regulatory debates over whether addiction to gambling machines stems from the consumer, the product, or the interplay between the two. *Addiction by Design* is a compelling inquiry into the intensifying traffic between people and machines of chance, offering clues to some of the broader anxieties and predicaments of contemporary life. At stake in Schüll's account of the intensifying traffic between people and machines of chance is a blurring of the line between design and experience, profit and loss, control and compulsion.

*The Curse of the Maze* Lorraine Hellier, 2013-12-01 Serendipity Island is in another dimension, accessed through a Grandfather Clock. It has been cursed by Morinder, a descendent of an evil sorcerer. She wants revenge on Phineas and the inhabitants of Serendipity. 'I know that your most prized possessions are not gold and precious gems but your children. I'll take them all, unless you can find any other children brave enough to save yours.' It's up to Matthew, Alex, Zoe and Ellen – who form the Amazateers – to save the islander's children. They face the cursed maze and a beast that the islanders and animals call the Guardian. 'A huge hedge has grown around the island and the sun can't shine through. The problem is, it's spread into the island and now it forms a maze and we can't find the way to the centre.' Each of the Amazateers has a part to play in breaking the curse. Will they complete their mission and save the children of Serendipity Island? *The Curse of the Maze* is the fifth book in Lorraine Hellier's Serendipity series but can be read as a standalone novel. It will appeal to 7-11 year old children who enjoy fantasy fiction, and fans of Enid Blyton, C. S. Lewis and Michael Morpugo.

The author sets out to deal comprehensively with all important aspects of the work; in particular, proper attention is paid for the first time to the poet's constant manipulation of the two Homeric epics; many thorny problems of text and interpretation are examined afresh; and a wealth of hitherto unadduced illustrative material drawn from Greek and Roman poetry of various genres and periods is used to shed light on a number of issues. The volume closes with a series of detailed digressive indexes dealing with diction, models and imitations, language and style, metre, transmission, mythology, religion, geography, ethnography and aetiology.
