Aquaculture, Resource Use, and the Environment Claude Boyd,Aaron McNevin,2014-12-19 Aquaculture, Resource Use, and the Environment places aquaculture within the larger context of global population growth, increased demand for sustainable, reliable sources of food, and the responsible use of natural resources. Aquaculture production has grown rapidly in recent decades as over-exploitation and environmental degradation have drastically reduced wild fish stocks. As fish production has increased, questions have persisted about the environmental sustainability of current aquaculture practices. Aquaculture, Resource Use, and the Environment is a timely synthesis and analysis of critical issues facing the continued growth and acceptance of aquaculture practices and products. Chapters look at the past, present, and future demands for food, aquaculture production, and tackle key issues ranging from environmental impacts of aquaculture to practical best management practices in aquaculture production. Providing broad coverage of issues that are essential to the continued development of aquaculture production, Aquaculture, Resource Use, and the Environment will be vital resource for anyone involved in the field of aquaculture.

Ars memoriae and scriptura interna Sara Tagliatela,2022-06-13 This study is concerned with Giordano Bruno's ars memoriae and the relation between his works on mnemonics and philosophy in the first phase of his reflection (1582–1585). The hermeneutic hypothesis that will be explored is that it is Giordano Bruno's De umbris idearum that first reveals his new elaboration of the notion of order, which will then be further unfolded in the philosophical works published in London, especially in the notions of nature, language, and praxis developed therein. The research statement is explored into more detail on a methodological level, through a discussion of Hans Blumenberg's interpretation of Giordano Bruno, and on an analytical level, through a metaphorological interpretation of the inward writing and the shadow metaphors in the De umbris idearum.

Form as Revolt Sebastian Zeidler,2016-01-22 The German writer and art critic Carl Einstein (1885–1940) has long been acknowledged as an important figure in the history of modern art, and yet he is often sidelined as an enigma. In *Form as Revolt* Sebastian Zeidler recovers Einstein's multifaceted career, offering the first comprehensive intellectual biography of Einstein in English. Einstein first emerged as a writer of experimental prose through his involvement with the anarchist journal *Die Aktion*. After a few limited forays into art criticism, he burst onto the art scene in 1915 with his book *Negro Sculpture*, at once a formalist intervention into the contemporary theory and practice of European sculpture and a manifesto for the sophistication of African art. Einstein would go on to publish seminal texts on the cubist paintings of Georges Braque and Pablo Picasso. His contributions to the surrealist magazine *Documents* (which Einstein cofounded with Georges Bataille), including writings on Picasso and Paul Klee, remain unsurpassed in their depth and complexity. In a series of close visual analyses—illustrated with major works by Braque, Picasso, and Klee—Zeidler retrieves the theoretical resources that Einstein brought to bear on their art. *Form as Revolt* shows us that to rediscover Einstein's art criticism is to see the work of great modernist artists anew through the eyes of one of the most gifted left-wing formalists of the twentieth century.

Roman Imperial Portrait Practice in the Second Century AD Christian Niederhuber,2022-07-18 It has long been thought that imperial portrait types were officially commissioned to commemorate specific historical moments and that they were made available to both the mint and the marble workshops in Rome, assuming a close correspondence between portraits on coins and in the round. All of this, however, has never been clearly proven, nor has it been disproven by a close systematic examination of the evidence on a broad material basis by those scholars who have questioned it. Through systematic case studies of Faustina the Younger's and Marcus Aurelius' portraits on coins and in sculpture, this book provides new insights into the functioning of the imperial image in Rome in the second century AD that move a difficult, much-discussed subject forward decisively. The new evidence presented here has made it necessary to adjust the established model; more flexibility is needed to describe the processes and practices behind the phenomenon of 'repeated' imperial portraits and how the imperial portrait worked in the mint of Rome and in the metropolitan marble workshops.
