### **The Modern Arabic Literary Language** Jaroslav

Stetkevych, 2006 The Modern Arabic Literary Language is a thoughtful examination of the changes that the Arabic language has undergone in its transition from its roots in classical Arabic to a language able to meet the demands of twentieth-century life. In this volume a respected and masterful scholar of the Arabic language Jaroslav Stetkevych notes the ways that new words have been incorporated into the language, ranging from deriving new terms from existing roots (for example, the word for newspaper derives from the word meaning sheet to write on) to downright assimilation of foreign words. Also noting the changes in grammar and semantics, Stetkevych illustrates how literary Arabic has become a more flexible language. Originally published in 1970, this volume is a clear assessment of lexical and stylistic developments in Modern Literary Arabic. This classic book is an important resource for scholars and advanced students of Arabic language and linguistics who wish to study the complexities of language change and lexical expansion.

### **The Arabic Language** C. H. M. Versteegh, 1997 This

general introduction to the Arabic Language, now available in paperback, places special emphasis on

the history and variation of the language. Concentrating on the difference between the two types of Arabic - the Classical standard language and the dialects - Kees Versteegh charts the history and development of the Arabic language from the earliest beginnings to modern times. The reader is offered a solid grounding in the structure of the language, its historical context and its use in various literary and non-literary genres, as well as an understanding of the role of Arabic as a cultural, religious and political world language. Intended as an introductory guide for students of Arabic, it will also be a useful tool for discussions both from a historical linguistic and from a socio-linguistic perspective. Coverage includes all aspects of the history of Arabic, the Arabic linguistic tradition, Arabic dialects and Arabic as a world language. Links are made between linguistic history and cultural history, while the author emphasises the role of contacts between Arabic and other languages. This important book will be an ideal text for all those wishing to acquire an understanding or develop their knowledge of the Arabic language.

A War of Words Yasir Suleiman, 2004-06-10  
Suleiman's book considers national identity in relation to language, the way in which language can be manipulated to signal political, cultural or historical difference. As a language with a long-recorded heritage and one spoken by the majority of those in the Middle East in various dialects, Arabic is a particularly appropriate vehicle for such an investigation. It is also a

penetrating device for exploring the conflicts of the Middle East.'This is a well-crafted, well organized, and eloquent book. 'Karin Ryding, Georgetown University

**International Handbook of Accounting Education and Certification** Kwabena Anyane-Ntow,2014-06-28  
This is the first work of its kind. Original contributions from leading academicians, practitioners and accounting associations from around the world make this handbook a unique source of information on international accounting education and certification processes. A uniform format in most of the chapters allows for easy comparison between countries. This volume documents the development of accounting education and practice at country and global levels; studies the sensitivity of accounting education and practices to the unique socio-economic needs of its environment; and allows comparative studies at a time when attempts have begun to harmonize accounting education internationally. Most importantly, it shows how educational programmes around the world are preparing future accounting professionals to deal with the rapid technological and environmental changes of the 21st century.

*Arab Digital Journalism* Noha Mellor,2022-11-30  
Responding to urgent calls to de-westernise Media and Journalism Studies and shed light on local agencies, this book examines digital journalistic practices in the Arab region, exploring how Arab journalists understand their roles and how digital technologies in Arab newsrooms are used to

influence public opinion. Drawing on dozens of articles penned by Arab media professionals and scholars, supplemented with informal conversations with journalists, this book reviews the historical development of digital journalism in the region and individual journalists' perceptions of this development. While technology has provided a new platform for citizens and powerful agents to exchange views, this text examines how it has simultaneously allowed Arab states and authorities to conduct surveillance on journalists, curtail the rise of citizen journalism, and maintain offline hierarchical forms of political, economic, and cultural powers. Mellor also explores how digital technology serves to cement Western hegemony of the information world order, with Arab media organisations and audiences judged to be mere recipients, rather than producers, of such information. *Arab Digital Journalism* offers an important contribution to the emerging field of digital journalism in the Global South and is a valuable resource for students and researchers interested in media, journalism, communication, and development studies.

**The Oxford Handbook of Modern Egyptian History** Beth Baron, Jeffrey Culang, 2024 The essays in this Oxford Handbook rethink the modern history of one of the most important and influential countries in the Middle East--Egypt. For a country and region so often understood in terms of religion and violence, this work explores environmental, medical, legal, cultural, and political histories. It gives readers an excellent view of the current debates in Egyptian history.
