Bob Ross Scratch Artist Steve Behling,2022-04-05 Etch away with the included stylus to reveal and personalize 16 iconic Bob Ross paintings. Bob Ross believed that anyone could paint a picture. Now, with Bob Ross Scratch Artist, you can use the “scratch and reveal” technique to create 16 lovely landscapes abounding with happy little trees, clouds, critters, and more. Just beneath the surface of each scratch-off material are poster-quality Bob Ross paintings from his TV show The Joy of Painting. With the included stylus, scratch away as little or as much as you’d like to create your own details and designs and personalize your masterpiece. An introductory section describes how to etch for best results. Plus, explore each painting more deeply by reading the highlights of each painting's episode, the colors and techniques Bob used, and the impact he had—and continues to have—on fans and artists worldwide.

Learn to Program with Scratch Majed Marji, 2014-02-14 Scratch is a fun, free, beginner-friendly programming environment where you connect blocks of code to build programs. While most famously used to introduce kids to programming, Scratch can make computer science approachable for people of any age. Rather than type countless lines of code in a cryptic programming language, why not use colorful command blocks and cartoon sprites to create powerful scripts? In Learn to Program with Scratch, author Majed Marji uses Scratch to explain the concepts essential to solving real-world programming problems. The labeled, color-coded blocks plainly show each logical step in a given script, and with a single click, you can even test any part of your script to check your logic. You'll learn how to: –Harness the power of repeat loops and recursion –Use if/else statements and logical operators to make decisions –Store data in variables and lists to use later in your program –Read, store, and manipulate user input –Implement key computer science algorithms like a linear search and bubble sort Hands-on projects will challenge you to create an Ohm's law simulator, draw intricate patterns, program sprites to mimic line-following robots, create arcade-style games, and more! Each chapter is packed with detailed explanations, annotated illustrations, guided examples, lots of color, and plenty of exercises to help the lessons stick. Learn to Program with Scratch is the perfect place to start your computer science journey, painlessly. Uses Scratch 2

Scratch Manjula Martin, 2017-01-03 A collection of essays from today's most acclaimed authors—from Cheryl Strayed to Roxane Gay to Jennifer Weiner, Alexander Chee, Nick Hornby, and Jonathan Franzen—on the realities of making a living in the writing world. In the literary world, the debate around writing and commerce often begs us to take sides: either writers should be paid for everything they do or writers should just pay their dues and count themselves lucky to be published. You should never quit your day job, but your ultimate goal should be to quit your day job. It's an endless, confusing, and often controversial conversation that, despite our bare-it-all culture, still remains taboo. In *Scratch*, Manjula Martin has gathered interviews and essays from established and rising authors to confront the age-old question: how do creative people make money? As contributors including Jonathan Franzen, Cheryl Strayed, Roxane Gay, Nick Hornby, Susan Orlean, Alexander Chee, Daniel Jose Older, Jennifer Weiner, and Yiyun Li candidly and emotionally discuss money, MFA programs, teaching fellowships, finally getting published, and what success really means to them, *Scratch* honestly addresses the tensions between writing and money, work and life, literature and commerce. The result is an entertaining and inspiring book that helps readers and writers understand what it's really like to make art in a world that runs on money—and why it matters. Essential reading for

aspiring and experienced writers, and for anyone interested in the future of literature, Scratch is the perfect bookshelf companion to On Writing, Never Can Say Goodbye, and MFA vs. NYC.

Lifelong Kindergarten Mitchel Resnick,2018-08-28 How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In Lifelong Kindergarten, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must

learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and collaborating through remixing, crowdsourcing, and large-scale group projects (such as a Halloween-themed game called Night at Dreary Castle, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before.

Twilight Monk - Secrets of Kung Fulio (Illustrated) Chris Krubeck, Trent Kaniuga, 2020-10-28 Contains over 70 Illustrations and sketches by the Author. It is a desperate time in the land of Speria. Rumors of villages destroyed by Dark Creatures echo across the land. The downtrodden survivors turn to the remnants of Moonken warriors at Crescent Isle, but their pacifist ways do not allow them to intervene. Raziel Tenza and Rin Torra are likely the worst Moonken to ever train at the monastery on the mystical shores of Crescent Isle. But when an insurgent gang of miscreants (The Red Cobras) threaten to run them out of town, they decide to team up and stand their ground. The only problem is... they stink at kung fu! With no fighting ability whatsoever, (but a whole lot of gusto!) they embark on an epic martial arts adventure in search of a shortcut to the ultimate badass Kung Fulio power of their ancestors. In their desperate struggle, they accidentally unleash raging Darksprites, get wrapped up in a legendary mystical heist, and discover secret powerful artifacts that will shape their destiny, and determine the fate of the Monks of Twilight. This book is part 1 of a series of Kung Fu action-adventure fantasy novels.

Automate the Boring Stuff with Python, 2nd Edition Al Sweigart, 2019-11-12 Learn how to code while you write programs that effortlessly perform useful feats of automation! The second edition of this international fan favorite includes a brand-new chapter on input validation, Gmail and Google Sheets automations, tips for updating CSV files, and more. If you've ever spent hours renaming files or updating spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? Automate the Boring Stuff with Python, 2nd Edition teaches even the technically uninclined how to write programs that do in minutes what would take hours to do by hand—no prior coding experience required! This

new, fully revised edition of Al Sweigart's bestselling Pythonic classic, *Automate the Boring Stuff with Python*, covers all the basics of Python 3 while exploring its rich library of modules for performing specific tasks, like scraping data off the Web, filling out forms, renaming files, organizing folders, sending email responses, and merging, splitting, or encrypting PDFs. There's also a brand-new chapter on input validation, tutorials on automating Gmail and Google Sheets, tips on automatically updating CSV files, and other recent feats of automations that improve your efficiency. Detailed, step-by-step instructions walk you through each program, allowing you to create useful tools as you build out your programming skills, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Boring tasks no longer have to take to get through—and neither does learning Python!

Digital Content Creation in Schools Karen S. Ivers, Ann E. Barron, 2014-12-17 Discover how digital content creation supports 21st-century learning, providing new insights into organizing, synthesizing, and evaluating information. This practical guide will make it easy for you to engage your students through this powerful communications medium. Digital content creation supports the Common Core State Standards (CCSS) and 21st-century learning skills by helping students use their knowledge to analyze, create, solve problems, communicate, collaborate, and innovate. This update of the popular *Multimedia Projects in Education*, Fourth Edition emphasizes digital content creation and the use of the CCSS as benchmarks to help you create cutting-edge classroom instruction. The book begins by presenting research on student learning through multimedia and digital content creation. This introduction is followed by outlines of each stage of the practical, easy-to-use Decide, Design, Develop, and Evaluate (DDD-E) model, which is designed specifically for classroom use. Content also includes discussion of multiple intelligences, constructivist learning, and cooperative grouping; blackline masters to guide you and your students through the DDD-E process; and assessment and management strategies. In addition, you'll find sample activities using an array of development tools, information on mobile and web apps, and numerous other resources to support digital projects in your classroom. The book, which is most applicable to students in grades 4 through 12, will also serve as an ideal resource for media specialists who work with teachers and students.
