Guerrilla Girls: The Art of Behaving Badly

Guerrilla Girls, 2020-10-06 Guerrilla Girls: The Art of Behaving Badly is the first book to catalog the entire career of the Guerrilla Girls from 1985 to present. The Guerrilla girls are a collective of political feminist artists who expose discrimination and corruption in art, film, politics, and pop culture all around the world. This book explores all their provocative street campaigns, unforgettable media appearances, and large-scale exhibitions. • Captions by the Guerrilla Girls themselves contextualize the visuals. • Explores their well-researched, intersectional takedown of the patriarchy In 1985, a group of masked feminist avengers—known as the Guerrilla Girls—papered downtown Manhattan with posters calling out the Museum of Modern Art for its lack of representation of female artists. They quickly became a global phenomenon, and the fearless activists have produced hundreds of posters, stickers, and billboards ever since. • More than a monograph, this book is a call to arms. • This career-spanning volume is published to coincide with their 35th anniversary. • Perfect for artists, art lovers, feminists, fans of the Guerrilla Girls, students, and activists • You'll love this book if you love books like Wall and Piece by Banksy, Why We March: Signs of Protest and Hope by Artisan, and Graffiti Women: Street Art from Five Continents by Nicholas Ganz

The Penguin on Design series includes the works of creative thinkers whose writings on art, design and the media have changed our vision forever. Bruno Munari was among the most inspirational designers of all time, described by Picasso as 'the new Leonardo'. Munari insisted that design be beautiful, functional and accessible, and this enlightening and highly entertaining book sets out his ideas about visual, graphic and industrial design and the role it plays in the objects we use everyday. Lamps, road signs, typography, posters, children's books, advertising, cars and chairs – these are just some of the subjects to which he turns his illuminating gaze.

Design and Art Alex Coles, 2007 Part of the acclaimed 'Documents of Contemporary Art' series of anthologies. This title comprehensively surveys and looks beyond the phenomenon of designart that has emerged since the Pop and Minimalist era: cutting edge, hybrid practices that blur traditional boundaries between art, architecture, graphics and product design. Key debates about form and function, the everyday, the collective and the utopian are contextualized historically and theoretically by leading practitioners and critics from both the art and the design worlds. Contributors include David Bourdon, Peter

Cook/Archigram, Douglas Coupland, Kees Dorst, Charles Eames, Experimental Jetset, Vilém Flusser, Hal Foster, Liam Gillick, Dan Graham, Clement Greenberg, Richard Hamilton, Donald Judd, Frederick Kiesler, Miwon Kwon, Maria Lind, M/M, N55, George Nelson, Lucy Orta, Jorge Pardo, Norman Potter, Rick Poynor, Paul Rand, Tobias Rehberger, Ed Ruscha, Joe Scanlan, Mary Anne Staniszewski, Superflex, Manfredo Tafuri, Rirkrit Tiravanija, Paul Virilio, Joep van Lieshout, Andy Warhol, Benjamin Weil, Mark Wigley and Andrea Zittel.

Undesign Gretchen Coombs, Andrew McNamara, Gavin Sade, 2018-10-04 Undesign brings together leading artists, designers and theorists working at the intersection of art and design. The text focuses on design practices, and conceptual approaches, which challenge the traditional notion that design should emphasise its utility over aesthetic or other non-functional considerations. This publication brings to light emerging practices that consider the social, political and aesthetic potential of undesigning our complex designed world. In documenting these new developments, the book highlights the overlaps with science, engineering, biotechnology and hacktivism, which operate at the intersection of art and design.

Art, Design and Visual Culture Malcolm Barnard, 1998-09-23 Most of our experience is visual. We obtain most of our information and knowledge through sight, whether from reading books and newspapers, from watching television or from quickly glimpsing road signs. Many of our judgements and decisions, concerning where we live, what we shall drive and sit on and what we wear, are based on what places, cars, furniture and clothes look like. Much of our entertainment and recreation is visual, whether we visit art galleries, cinemas or read comics. This book concerns that visual experience. Why do we have the visual experiences we have? Why do the buildings, cars, products and advertisements we see look the way they do? How are we to explain the existence of different styles of paintings, different types of cars and different genres of film? How are we to explain the existence of different visual cultures? This book begins to answer these questions by explaining visual

experience in terms of visual culture. The strengths and weaknesses of traditional means of analysing and explaining visual culture are examined and assessed. Using a wide range of historical and contemporary examples, it is argued that the groups which artists and designers form, the audiences and markets which they sell to, and the different social classes which are produced and reproduced by art and design are all part of the successful explanation and critical evaluation of visual culture.

Principles of Pattern Design Richard M. Proctor, 1990-01-01 Brief, nontechnical instructions describe and illustrate each network upon which repeat patterns can be arranged, while a rich array of 280 illustrations depict historical and contemporary examples of pattern, many adapted from such diverse sources as a ancient Peruvian stone amulet, 12th-century mosaics, 13th-century damask, Japanese stencil designs, and much more. Decorative samples appear in macrame and embroidery, mosaics, painting, collage, sculpture, on wrapping paper and in other decorative art forms. A brief Vocabulary includes basic terms used to describe patterns and a concluding chapter explores the visual range of one particular motif - the Romanesque arch form.--BOOK COVER.

Transacting As Art, Design and Architecture Marsha Bradfield, Cinzia Cremona, Amy McDonnell, Eva Sajovic, 2022-01-10 An interdisciplinary anthology exploring alternatives to the principles of commercial markets that dominate contemporary life. The essays in this volume apply an

experimental ethos to collaborative cultural production. Expanding the fields of art, design, and architectural research, contributors provide critical reflection on collaborative practice-based research. The volume builds on a pop-up market hosted by the London-based arts cluster Critical Practice that sought to creatively explore existing structures of evaluation and actively produce new ones. Assembled by lead editor Marsha Bradfield, the essays contextualize the event within London's long history of marketplaces, offer reflections from the stallholders, and celebrate its value system, particularly its critique of econometrics. A glossary rounds off the text and opens up the publication as a resource.

Japanese Art and Design Joe Earle, 2000

Originally published for the opening of the Toshiba Gallery of Japanese art at the Victoria & Albert Museum, this book celebrates and sets in context many of its greatest treasures. The Museum's superb Japanese holdings, acquired over a period of one hundred and fifty years, started with the international exhibitions of the second half of the nineteenth century and the great private collections formed in Britain at the beginning of the twentieth. More recently they have been extended by the purchase of major pieces including exciting contemporary works by leading artists. The result is an unrivalled panorama of

Japan's achievements in art and design from the earliest times, with particular emphasis on ceramics, lacquer, textiles, prints and metalwork of the last four centuries.

Art, Design and Technology: Collaboration and Implementation Rae Earnshaw, 2017-05-30 This book examines how digital technology is being used to assist the artists and designers. The computer is able to store data and reproduce designs, thus facilitating the speed-up of the iterative process towards a final design which meets the objectives of the designer and the requirements of the user. Collaborative design enables the sharing of information across digital networks to produce designed objects in virtual spaces. Augmented and virtual reality techniques can be used to preview designs before they are finalized and implemented. Art and design have shaped the values, social structures, communications, and the culture of communities and civilisations. The direct involvement of artists and designers with their creative works has left a legacy enabling subsequent generations to understand more about their skills, their motivations, and their relationship to the wider world, and to see it from a variety of perspectives. This in turn

causes the viewers of their works to reflect upon their meaning for today and the lasting value and implications of what has been created. Art installations are harnessing modern technology to process information and to display it. Such environments have also proved useful in engaging users and visitors with real-time images and interactive art.
