Drawing on a unique, in-depth survey with more than 10,000 respondents from 25 countries, Thomas Eger and Marc Scheufen discuss their findings in the light of recent policy attempts which have been trying to foster OA, revealing considerable shortcomings and lack of knowledge on fundamental features of the academic publishing market.

Eyewitnessing Peter Burke,2006-01-27 Eyewitnessing evaluates the place of images among other kinds of historical evidence. By reviewing the many varieties of images by region, period and medium, and looking at the pragmatic uses of images (e.g. the Bayeux Tapestry, an engraving of a printing press, a reconstruction of a building), Peter Burke sheds light on our assumption that these practical uses are 'reflections' of specific historical meanings and influences. He also shows how this assumption can be problematic. Traditional art historians have depended on two types of analysis when dealing with visual imagery: iconography and iconology. Burke describes and evaluates these approaches, concluding that they are insufficient. Focusing instead on the medium as message and on the social contexts and uses of images, he discusses both religious images and political ones, also looking at images in advertising and as commodities. Ultimately, Burke's purpose is to show how iconographic and post-iconographic methods – psychoanalysis, semiotics, viewer response, deconstruction – are both useful and problematic to contemporary historians.

Centerbeam Massachusetts Institute of Technology. Center for Advanced Visual Studies,1980 Laser-projected images on moving steam screens, solar-tracked holograms, a 144-foot water prism and helium-lifted sky sculptures are some of the features of Centerbeam, a kinetic performing group work exhibited at documenta 6in Kessel, Germany (1977) and on the National Mall in Washington, D.C. (1978). Its production involved the participation of 22 artists at MIT's Center for Advanced Visual Studies—as well as science and engineering consultants. These illustrations, essays, and biographical profiles of the contributors provide a history of the work, documenting the unusual collaborative process that brought it into being.

The Art of Philosophy Peter Sloterdijk,2012-10-02 In his best-selling book You Must Change Your Life, Peter Sloterdijk argued exercise and practice were crucial to the human condition. In The Art of Philosophy, he extends this critique to academic science and scholarship, casting the training processes of academic study as key to the production of sophisticated thought. Infused with humor and provocative insight, The Art of Philosophy further integrates philosophy and human existence, richly detailing the foundations of this relationship and its transformative role in making the postmodern self. Sloterdijk begins with Plato's description of Socrates, whose internal monologues were so absorbing they often rooted the philosopher in place. The original academy, Sloterdijk argues, taught scholars to lose themselves in thought, and today's universities continue this tradition by offering scope for Plato's accommodations for absences. By training scholars to practice thinking as an occupation transcending daily time and space, universities create the environment in which thought makes wisdom possible. Traversing the history of asceticism, the concept of suspended animation, and the theory of the neutral observer, Sloterdijk traces the evolution of philosophical practice from ancient times to today, showing how scholars can remain true to the tradition of the examined life even when the temporal dimension no longer corresponds to the eternal. Building on the work of Husserl, Heidegger, Nietzsche, Arendt, and other practitioners of the life of theory, Sloterdijk launches a posthumanist defense of philosophical inquiry and its everyday, therapeutic value.

Understanding Law in Society Knut Papendorf,Stefan Machura,Kristian Andenæs,2011 The sociology of law has made impressive progress over the last decades. The present volume brings together scholars from Austria, Britain, Germany and Scandinavia to discuss major developments. The book starts with analyses of the sociology of law advanced by the most outstanding theorists in the field, Max Weber and Niklas Luhmann. Their legacy is assessed by Hubert Treiber, Frank Welz and Inger-Johanne Sand. Next, Hakan Hyden emphasizes the gain sociology of law could have from a stronger focus on norms. Armin Holand and Ole Hammerslev ask about the effects courts have. Klaus F. Rohl provides an international overview on alternatives of law, one of the main topics of socio-legal studies since the 1960s. The final article by Stefan Machura in this volume addresses the media's impact on the public's perception of the legal system.

Libraries and the Information Society in Germany Engelbert Plassmann, Hermann Rösch, Jürgen Seefeldt, 2014 Libraries and the Information Society in Germany presents, for the first time, the contemporary German library system not from a library insider's view, but rather from a comprehensively societal perspective. The roles and functions of libraries are analyzed and assessed from this vantage point. The authors - both researchers and practitioners - identify historical developments, describe current trends taking into account sociostructural contexts, and outline options for action. The changes that libraries and library science can embrace and have already embraced in part include, in addition to functional changes and systematic networking, possibly approaching other segments of the information sector or even merging with them. This edition represents a thorough update to the most recent German edition. Several chapters expanded in parts in order to address developments such as Library 2.0, the Semantic Web, Linked Open Data, or Electronic Resource Management.
