Dave Stockton,Matthew Rudy

*The Elements of Scoring* Raymond Floyd, Fred Couples, 2000-04-27 One of golf's all-time greatest players shares his secrets for learning the skill most golfers take for granted--how to play a hole in the fewest strokes possible.

*The Art of Scoring* Stan Uley, Matthew Rudy, 2009-09-17 ?The hottest instructor in golf?(Sports Illustrated) presents a revolutionary guide for lowering your score with a powerful new approach to strategizing, decision-making, and management for every part of your short game. Stan Uley?s breakthrough short game and putting techniques have made him one of the most sought-after golf instructors in America. Now he offers a breakthrough approach for golfers of all skill levels, with a course- management approach designed to help golfers at the crucial stages of a round of golf. The Art of Scoring shows readers how to understand the way their short game handicap and overall skill level should dictate strategy. Breaking down pitching, chipping, bunker play, and putting into three proficiency categories, Uley presents customized techniques for saving shots simply by making better decisions. He leads us through a round with three amateurs?two 10-handicappers and a 20-handicapper?to show how improved strategy and execution can transform a player?s game. With behind- the-scenes pro teaching sessions, crash courses on the three hardest greenside shots, and one hundred black-and-white and color photographs, The Art of Scoring is like getting a brand-new set of state-of-the-art clubs, customized by one of the game?s premier teachers.

**Scoring the Screen** Andy Hill,2017-07-01 SCORING THE SCREEN: THE SECRET LANGUAGE OF FILM MUSIC Today, musical composition for films is more popular than ever. In professional and academic spheres, media music study and practice are growing; undergraduate and postgraduate programs in media scoring are offered by dozens of major colleges and universities. And increasingly, pop and contemporary classical composers are expanding their reach into cinema and other forms of screen entertainment. Yet a search on Amazon reveals at least 50 titles under the category of film music, and, remarkably, only a meager few actually allow readers to see the music itself, while none of them examine landmark scores like *Vertigo*, *To Kill a Mockingbird*, *Patton*, *The Untouchables*, or *The Matrix* in the detail provided by *Scoring the Screen: The Secret Language of Film Music*. This is the first book since Roy M. Prendergast's 1977 benchmark, *Film Music: A Neglected Art*, to treat music for motion pictures as a compositional style worthy of serious study. Through extensive and unprecedented analyses of the original concert scores, it is the first to offer both aspiring composers and music educators with a view from the inside of the actual process of scoring-to-picture. The core thesis of *Scoring the Screen* is that music for motion pictures is indeed a language, developed by the masters of the craft out of a dramatic and commercial necessity to communicate ideas and emotions instantaneously to an audience. Like all languages, it exists primarily to convey meaning. To quote renowned orchestrator Conrad Pope (who has worked with John Williams, Howard Shore, and Alexandre Desplat, among others): "If you have any interest in what music 'means' in film, get this book. Andy Hill is among the handful of penetrating minds and ears engaged in film music today."

**Automated Essay Scoring** Mark D. Shermis,Jill C. Burstein,2003-01-30 This new volume is the first to focus entirely on automated essay scoring and evaluation. It is intended to provide a comprehensive overview of the evolution and state-of-the-art of automated essay scoring and evaluation technology across several disciplines, including education, testing and measurement, cognitive science, computer science, and computational linguistics. The development of this technology has led to many questions and concerns. Automated Essay Scoring attempts to address some of these questions including: \*How can automated scoring and evaluation supplement classroom instruction? \*How does the technology actually work? \*Can it improve students' writing? \*How reliable is the technology? \*How can these computing methods be used to develop evaluation tools? \*What are the state-of-the-art essay evaluation technologies and automated scoring systems? Divided into four parts, the first part reviews the teaching of writing and how computers can contribute to it. Part II analyzes actual automated essay scorers including e-rater<sup>TM</sup>, Intellimetric, and the Intelligent Essay Assessor. The third part analyzes related psychometric issues, and the final part reviews innovations in the field. This book is ideal for researchers

and advanced students interested in automated essay scoring from the fields of testing and measurement, education, cognitive science, language, and computational linguistics.

*Every Shot Counts* Mark Broadie, 2014-03-06 Columbia Business School professor Mark Broadie's paradigm-shifting approach that uses statistics and golf analytics to transform the game. Mark Broadie is at the forefront of a revolutionary new approach to the game of golf. What does it take to drop ten strokes from your golf score? What part of Tiger Woods' game makes him a winner? Traditional golf stats can't answer these questions. Broadie, a professor at Columbia Business School, helped the PGA Tour develop its cutting-edge strokes gained putting stat. In this eye-opening new book, Broadie uses analytics from the financial world to uncover the secrets of the game of golf. He crunches mountains of data to show both professional and amateur golfers how to make better decisions on the course. This eagerly awaited resource is for any player who wants to understand the pros, improve golf skills, and make every shot count.

A Handbook of Clinical Scoring Systems for Thematic Apperceptive Techniques Sharon Rae Jenkins, 2007-08-30 This comprehensive volume brings together the best available clinical scoring systems for thematic apperceptive techniques (TATs), presented in research summaries along with practice stories and available scoring manuals. A Handbook of Clinical Scoring Systems for Thematic Apperceptive Techniques raises awareness about the availability and usefulness of TAT scoring systems for research, training, and clinical practice; provides the materials needed for learning and using the most useful available clinical systems; and facilitates their use by making independent learning and systematic research easier. This book should be in the library of every faculty member and clinical supervisor who is responsible for teaching courses in psychological assessment or supervising assessment students in clinical, counseling, school, or forensic psychology, whether in academic or practice settings, practicum sites, or internships.

Automated Essay Scoring Beata Beigman Klebanov, Nitin Madnani, 2022-05-31 This book discusses the state of the art of automated essay scoring, its challenges and its potential. One of the earliest applications of artificial intelligence to language data (along with machine translation and speech recognition), automated essay scoring has evolved to become both a revenue-generating industry and a vast field of research, with many subfields and connections to other NLP tasks. In this book, we review the developments in this field against the backdrop of Elias Page's seminal 1966 paper titled *The Imminence of Grading Essays by Computer*. Part 1 establishes what automated essay scoring is about, why it exists, where the technology stands, and what are some of the main issues. In Part 2, the book presents guided exercises to illustrate how one would go about building and evaluating a simple automated scoring system, while Part 3 offers readers a survey of the literature on different types of scoring models, the aspects of essay quality studied in prior research, and the implementation and evaluation of a scoring engine. Part 4 offers a broader view of the field inclusive of some neighboring areas, and Part \ref{part5} closes with summary and discussion. This book grew out of a week-long course on automated evaluation of language production at the North American Summer School for Logic, Language, and Information (NASSLLI), attended by advanced undergraduates and early-stage graduate students from a variety of disciplines. Teachers of natural language processing, in particular, will find that the book offers a useful foundation for a supplemental module on automated scoring. Professionals and students in linguistics, applied linguistics, educational technology, and other related disciplines will also find the material here useful.

*Guerrilla Film Scoring* Jeremy Borum,2015-04-09 As the movie and music industries have changed, film scoring has become an overwhelmingly independent process. Film composers have more responsibilities than ever before, and they must fulfill them with smaller budgets and shorter schedules. As a result, composers are increasingly becoming armies of one. In *Guerrilla Film Scoring: Practical Advice from Hollywood Composers*, Jeremy Borum provides valuable guidance on how to make a good film score both quickly and inexpensively. This handbook encompasses the entire film scoring process including education, preparation, writing and recording a score, editing, mixing and mastering, finding work, career development, and sample contracts. Offering strategic tools and techniques, this insider's guide draws on the expertise from a number of prominent composers in movies, television, and video gaming, including Stewart Copeland, Bruce Broughton, and Jack Wall. A straightforward do-it-yourself manual, this book will help composers at all levels create the best-sounding scores quickly and cost effectively—without jeopardizing their art. With access to rare and extremely useful input from the best in the business, *Guerrilla Film Scoring* will benefit not only students but also professionals looking to update their game.
