Brendan Jackson

Tattooed Skin and Health J. Serup,N. Kluger,W.

Bäumler,2015-03-26 With about 10–20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

Using striking visuals, *Art on Skin* showcases the beauty of the art of tattooing and aids in the choosing of a style, with detailed descriptions of the many different styles of tattoos, including fine art, cartoon characters, wildlife, and many more. The full-color photographs within these pages will leave you with dreams of your own pieces, and stories from others who have lived the tattoo experience will keep you from stumbling upon unwelcome surprises. Customizing the Body Clinton Sanders,1989 Tattoos continue to be a mark of alienation from the mainstream, but they also have an affiliative effect, identifying one as a member of a select group. This book discusses tattooing as a highly social act as a manipulation of self-image, as a symbolically meaningful form of body alteration in contemporary society.

Dermatologic Complications with Body Art Christa De Cuyper,Maria Luisa Pérez-Cotapos S,2018-06-27 Originally published in 2010, this book has since become one of the seminal works in the rapidly evolving field of body piercings, tattoos, and permanent make-up. Authorities, body art professionals, and the general public have become increasingly aware of the risks associated with these practices and the need for better regulation. This second, extensively revised edition includes an update on the literature and focuses more on the epidemiology and classification of adverse reactions. In particular, it addresses recent findings on tattoo inks, their potential side effects and the initiatives being launched by regulating authorities to reduce the

risks related to body art. *Dermatologic Complications with Body Art* details tattooing procedures in line with the coming European Standards on hygiene (CEN 435 in preparation-release 2018-2019) with extra attention to aftercare. The book features step-by-step video illustrations of different body-art procedures (tattooing, medical tattooing, piercing, and laser tattoo removal). Innovations including medical applications of tattooing are presented. Possible complications, including infections, granulomatous reactions, and allergies are discussed, while new insights on the pathogenesis of allergic reactions are illustrated with the help of recent research data. The book also presents the latest techniques and devices for tattoo removal, together with their risks and benefits. Richly illustrated with videos and pictures, it offers an indispensable guide for dermatologists, physicians and practitioners dealing with body art.
