## **American-Japanese Security Agreements, Past and Present** Thomas A.

Drohan, 2015-01-28 What led two mortal enemies to become allies nine years after the end of World War II? When the Allies began their occupation of defeated Axis countries, many people favored a program of harsh reparation and demilitarization. For the United States, this was tempered with a desire not only to prevent such a war from happening again but to help the occupied countries rebuild their economic and political infrastructure. This aspiration, coupled with the rise of communist China and its perceived threat not only to Southeast Asia but the world, formed the catalyst for a U.S.-Japanese alliance. The alliance between the United States and Japan persists in spite of changing political world views. The changes which have affected world politics have often resulted in corresponding adjustments to the U.S.-Japan security agreement. From 1954 to the present day, this volume takes an in-depth look at the fundamental nature of the relationship. The book addresses the historical origins of security relations in both countries and the ways in which these formed the basis for their postwar security cooperation and examines the negotiated set of shared military, economic and political agreements and expectations which have shaped their relationship. The work's main focus, however, is the way in which this alliance has evolved. Four cases of significant policy change—in 1960, 1981, 1987 and 1997—are analyzed along with a discussion of the relevant strategic and tactical realities of the time. The reactions of the United States and Japan

to recent events such as Iraq's Kuwait invasion and the 2001 terrorist attacks on America are also discussed. Numerous tables are included.

**US-China-EU Relations** Robert Ross, Øystein Tunsjø, Zhang Tuosheng, 2010-02-08  
This volume brings together a group of leading international scholars to discuss how US-China-EU relations will shape the future of international politics. Arguing that these three powers will play a key role in establishing and managing a new world order, the contributors examine how a future global order is developed by the interaction of these leading actors in the international system. The authors also address how the US, China and the EU promote cooperation and manage conflict of interests on a wide spectrum of issues including new security challenges. By linking the management of international affairs to specific policy issues, the book shows that the US-China-EU triangular configuration is a pivotal relationship for understanding contemporary international relations. This book offers a comprehensive assessment of US-China-EU interactions and will be of great interest to students of Asian politics, US foreign policy, EU politics and security studies and IR in general. Robert S. Ross is Professor of Political Science at Boston College, Associate, John King Fairbank Center for East Asian Research, Harvard University, Associated Professor at the Norwegian Institute for Defence Studies, Senior Advisor, Security Studies Program, Massachusetts Institute of Technology and a member of the Council on Foreign Relations. Øystein Tunsjø is Senior Research Fellow at the Norwegian

Institute for Defence Studies. Zhang Tuosheng is director of the research department and senior fellow at the China Foundation for International and Strategic Studies.

**The Grand Chessboard** Zbigniew Brzezinski, 2016-12-06 Bestselling author and eminent foreign policy scholar Zbigniew Brzezinski's classic book on American's strategic mission in the modern world. In *The Grand Chessboard*, renowned geostrategist Zbigniew Brzezinski delivers a brutally honest and provocative vision for American preeminence in the twenty-first century. The task facing the United States, he argues, is to become the sole political arbiter in Eurasian lands and to prevent the emergence of any rival power threatening our material and diplomatic interests. The Eurasian landmass, home to the greatest part of the globe's population, natural resources, and economic activity, is the grand chessboard on which America's supremacy will be ratified and challenged in the years to come. In this landmark work of public policy and political science, Brzezinski outlines a groundbreaking and powerful blueprint for America's vital interests in the modern world. In this revised edition, Brzezinski addresses recent global developments including the war in Ukraine, the re-emergence of Russia, and the rise of China.

Collective Myopia in Japanese Organizations Nobuyuki Chikudate, 2015-10-07 Drawing on European philosophies, this book examines collective myopia and its role in global business through various case studies of Japanese organizations, including the Tokyo Electric Power Company.

*Configurations of Family in Contemporary Japan* Tomoko Aoyama, Laura Dales, Romit Dasgupta, 2014-09-15 The middle-class nuclear family model has long dominated discourses on family in Japan. Yet there have always been multiple configurations of family and kinship, which, in the context of significant socio-economic and demographic shifts since the 1990s, have become increasingly visible in public discourse. This book explores the meanings and practices of family in Japan, and brings together research by scholars of literature, gender studies, media and cultural studies, sociology and anthropology. While the primary focus is the Japanese family, it also examines the experience and practice of family beyond the borders of Japan, in such settings as Brazil, Australia, and Bali. The chapters explore key issues such as ageing, single households, non-heterosexual living arrangements and parenting. Moreover, many of the issues addressed, such as the growing diversity of family, the increase in single-person households, and the implications of an ageing society, are applicable to other mature, late-industrial societies. Employing both multi- and inter-disciplinary approaches, this book combines textual analysis of contemporary television, film, literature, manga, anime and other media with empirical and ethnographic studies of families in Japan and in transnational spaces. As such, it will be of great interest to students and scholars working across a number of fields including Japanese culture and society, sociology of family, gender studies, film and media studies, literature and cultural studies, and

gerontology.
