China-us Trade Frictions Shaping New Equilibriums With The Eu And The Us: Towards A New Multilateralism Or Tripolarism Xugang Yu, Mario Tettamanti, Cristiano Rizzi, 2021-01-05 This book shows the impact of the recent trade tensions between China and the US on the world trade order, and how parties have reached a deal (so called 'phase one', January 2020), which could lead to a more comprehensive agreement, and the consequences of these 'adjustments' in shaping new equilibriums. After 40 years, China has transformed into an economic superpower, which could now rival the US. This has evoked some concerns, and put the US in an uncomfortable position, as the US views the rise of China as a threat to its predominance and interests. However, China's development and its increasing economic power, which is a direct consequence of the ongoing reform process, is unstoppable. The confrontation between China and the US will favor Chinese expansion into the EU not only because the EU offers a more receptive environment for Chinese Foreign Direct Investment, but also because the EU and China have more in common if we consider the Belt And Road Initiative and the new bilateral investment agreement which is under negotiation. The EU, not only represents the final destination of the BRI, but also a more logical and convenient trade partner for China. The shift of Chinese attention toward the EU will also change the equilibrium between China, the EU and the US, bring forth the negotiation of new trade agreements, and move the entire international community towards a new world trade order and a new multilateralism which might evolve into a tripolarism.

The Many Faces of Public Management Reform in the Asia-Pacific Region Clay Wescott, Bidhya Bowornwathana, L.R. Jones, 2009-12-09 During the past decade, globalization and democratization have been the major forces that helped transform the structures, functions, and processes of Asian public sectors. These issues were explored at a conference July 7-9, 2008 in Bangkok, Thailand. This book presents some of the works contributed by participating scholars at the conference.

Global Trends 2040 National Intelligence Council, 2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics- by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Innovative ICT Industrial Architecture in East Asia Hitoshi Hirakawa, Nobuhiro Takahashi, Ferdinand C. Maquito, Norio Tokumaru, 2016-11-21 This book aims to shed light on the potentially innovative ICT (information and communication technology) architectures from an East Asian regional perspective. The business environment brought about by the development of ICT intensified global competition and caused dramatic changes in the industrial architecture. Firms that are involved in manufacturing and maintenance of ICT hardware and that offer services for software development are continuously being created, giving rise to the provision of new and diverse services to an increasingly growing East Asian regional market. Such industrial activities are advancing the shift from an old to a new industrial architecture. Some parts of emerging economies have grasped this edge on economic globalization and informatization and have adopted business models that enable them to enter the world economy. Entering this century, China, the Philippines, and Vietnam in East Asia have been rapidly expanding their ICT-BPO (Business Process Outsourcing) businesses as destinations of offshoring of service activities by firms in the advanced economies, following India's example. Policy makers and firms in those countries are also meeting the challenge of catching up with advanced economies through the development of such industries. It has enabled those economies to exploit new possibilities of further development, which may mean a new stage of manufacturing cum services in an ICT- and knowledge-based economy.

Historical Dictionary of India Surjit Mansingh, 2006-05-09 The Republic of India is the second most populous, the seventh largest by geographical area, and has the fourth largest economy in terms of purchasing power parity in the world. While it has always been an important country, it has often been neglected. Of late, however, there has been much talk of the 'new' India, one with greater economic dynamism, a more active foreign policy, and the emergence of a huge middle class. With over a hundred new cross-referenced dictionary entries-the majority of which pertain to the last decade-and updating others, the second edition of the Historical Dictionary of India illustrates the rapidly evolving situation without neglecting the country's ancient past. The chronology has been brought up to date, the introduction expanded, and the bibliography includes numerous new titles.

La Nuova Via Della Seta Diego Angelo Bertozzi, 2019-11-29 A questa riscoperta-invenzione, che ha preso il nome di Belt and Road Initiative, fa da sfondo una storia millenaria. Sono duemila gli anni che ci separano dall'apertura di quella che conosciamo come la Via della seta e che oggi i più recenti eventi politici internazionali ci costringono di fatto a riprendere e ristudiare. L'Italia rappresenta nel Mediterraneo un partner ideale per la Nuova via della seta, beneficiando dal punto di vista geografico di una posizione strategica, ideale tanto per la distribuzione di merci asiatiche quanto per l'invio di prodotti europei destinati al resto del mondo.

China's Belt and Road: A Game Changer? Alessia Amighini (a cura di), 2017-07-11 Officially announced by Xi Jinping in 2013, the Belt and Road Initiative (BRI) has since become the centrepiece of China's economic diplomacy. It is a commitment to ease bottlenecks to Eurasian trade by improving and building networks of connectivity across Central and Western Asia, where the BRI aims to act as a bond for the projects of regional cooperation and integration already in progress in Southern Asia. But it also reaches out to the Middle East as well as East and North Africa, a truly strategic area where the Belt joins the Road. Europe, the end-point of the New Silk Roads, both by land and by sea, is the ultimate geographic destination and political partner in the BRI. This report provides an in-depth analysis of the BRI, its logic, rationale and implications for international economic and political relations.

differences between the two countries with regard to economic development models, the relationship of politics and business, economic structures and developments, and international relations are analyzed in depth. Le imprese estere in Italia e i nuovi paradigmi della competitività AA.VV.,2022-09-16T00:00:00+02:00 In un’economia sempre più globalizzata e digitale, le multinazionali e in generale i gruppi di imprese, giocano un ruolo crescente; la peculiarità della loro struttura organizzativa, più o meno complessa, i modelli di corporate e di governance adottati, le dimensioni, sono elementi che impattano sulla capacità di queste forme organizzative di reagire in maniera più tempestiva alle nuove sfide globali. Anche in Italia, il ruolo delle multinazionali ha avuto negli ultimi anni un’attenzione sempre maggiore da parte dei policy maker, in quanto patrimonio e asset strategico per lo sviluppo del sistema Paese. Sulla base di queste considerazioni, il Rapporto prende le mosse da una dettagliata analisi descrittiva del peso delle imprese multinazionali estere sull’economia italiana per poi approfondire la loro performance, le caratteristiche strutturali, il posizionamento all’interno delle catene globali del valore e la loro vicinanza ai temi della sostenibilità ambientale.
