Asian Data Privacy Laws Graham William Greenleaf,2014 The first work to examine data privacy laws across Asia, covering all 26 countries and separate jurisdictions, and with in-depth analysis of the 14 which have specialized data privacy laws. Professor Greenleaf demonstrates the increasing world-wide significance of data privacy and the international context of the development of national data privacy laws as well as assessing the laws, their powers and their enforcement against international standards.

Wellness for a Healthy Asia Asian Development Bank,2021-10-01 The health and well-being of Asians took a battering during the coronavirus disease (COVID-19) pandemic. Wellness, or the active pursuit of activities for holistic health, is vital for a sound mind and body. As such, now is an opportune time to take stock of the current state of wellness and the wellness economy in Asia. Asians are blessed with rich wellness traditions they can leverage in their quest for mental and physical health. This timely book examines the key drivers of the demand for wellness in the region. It also sets out concrete policy options for promoting wellness among all Asians.

Routledge Handbook of Energy in Asia Subhes C. Bhattacharyya,2017-10-12 The Routledge Handbook of Energy in Asia presents a comprehensive review of the unprecedented growth of Asian energy over the past quarter of a century. It provides insightful analysis into variation across the continent, whilst highlighting areas of cross-learning and regional cooperation between the developed and developing countries of Asia. Prepared by a team of leading international experts, this book not only captures the East Asian domination, particularly that of China, but also highlights the growing influence of South Asia and the ASEAN. Organised into four parts, the sections include: the demand for energy in the region and its main drivers at the sector level; developments in energy supply, including fossil fuels and renewable energy sources; energy policies and issues such as sector reform and climate change; the transition to a low carbon pathway. This handbook offers a complete picture of Asian energy, covering supply and demand, as well as contemporary challenges in the sector. As such, it is a valuable resource for students and scholars of energy policy, Environmental Studies, and Asian Studies.

Public Debt Sustainability in Developing Asia Benno Ferrarini,Arief Ramayandi,Raghbendra Jha,2012-11-12 Addressing the Global Financial Crisis required fiscal intervention on a substantial scale by governments around the world. The consequent build up of public debt, in particular its sustainability, have moved centre stage in the policy debate. If the Asia Pacific region is to continue to serve as an engine for global growth its public debt must be sustainable. The book addresses this issue for Asia Pacific as a whole as well as for three of the most dynamic economies in the region: China, India and Vietnam. The book begins with a discussion of the reasons why there is increased attention on debt related issues and outline the contents of the volume. The book also includes fiscal indicators for Developing Member Countries (DMCs) as categorized by the Asian Development Bank (ADB). Debt sustainability for these countries is assessed through extant approaches and with the most updated data sources. It also surveys the extant literature on debt sustainability, outlining the main issues related to debt sustainability and discusses the key implications for the application of debt sustainability analysis in developing Asia. The book highlights the

importance of doing individual country studies in view of wide variations in definitions of public expenditure, revenues, contingent liabilities, government structures (e.g. federal), and the like as well as in the impact of debt on interest rates. It provides in-depth debt sustainability analyses of China, India and Vietnam. The book is a comprehensive analytical and empirical update of the sustainability public debt in developing Asia. It breaks new ground in that various characteristics of the sustainability that have not yet been explored in the literature which, nevertheless, are crucial to understanding it. As a consequence, the policy analysis is based on firmer footings than in the extant literature and should prove useful to graduate students, researchers as well as policymakers.

Asian Forms of the Nation Stein Tønnesson, Hans Antlov, 2013-10-23 The general tendency among theorists in nationalism and national identity has been to assume that the modernization process in Asia and Africa is a kind of distorted reflection of a Western precedent; Asian forms of the nation have rarely been seen as independent, alternative models. Among today's leading theoreticians, there is a growing tendency to take Asia seriously, and to include Asian examples in the general discussion. The aim of the present collection is to build on and reinforce this tendency. It does not postulate any specifically Asian form of the nation, as opposed to a Western one. Rather, it seeks to demonstrate that in Asia, as well as in Europe, each

nation forms a unique amalgam which can be compared fruitfully with others. History, culture and geography have posed various kinds of limits to what can be imagined (as Benedict Anderson puts it). The relationship between geographical space and national construction is explored in depth here.

Global Environmental Changes in South Asia A.P. Mitra,C. Sharma,2012-03-05
The Fourth Assessment Report of IPCC having clinched in 2007 the evidence of global warming on account of anthropogenic activities, backed with scientific data gathered and analyzed globally, has made it mandatory world over to focus efforts on delineation of the anticipated adverse impacts of global warming on regional temperature and moisture regimes and the linked hydrologic, climatic and biospheric processes. First and foremost is the requirement to understand vulnerability to food and livelihood security in various ecosystems—on mainland, mid-range and high mountains as well as coastal areas including CEZs. The projected global temperature rise of the order of about two degrees or more and further rise at a decadal rate of around 0.2°C is sufficient to make grievous changes in sea surface level and submerge many low lying coastal areas around the world thereby possibly causing unprecedented losses to human habitat and livelihood in the coming years. A rise in climate variability is also becoming increasingly evident with potential direct impact on agricultural performance, on water accessibility and on weather extremes. Developing countries due to their poor infrastructure, limited resources and large impoverished population are likely to face more intense and widespread adverse impact of climate change than the developed world and also have limited adaptation capacity.

Europe-Central Asia Relations Kashif Hasan Khan,Anja Mihr,2023-05-29 This book addresses the current state of economic and political development within Central Asia and the importance of European countries and organizations as international actors and supranational organizations for the Central Asian Region (CAR). It aims to provide a better understanding of Central Asia's multi-faceted relations in rapidly evolving geostrategic dynamics and serves as a timely insight into the contours of Central Asian states' policies, emerging trends, and significant features of these interactions. The aim is to analyze the main challenges for future between the Europe and Central Asia relations, to make recommendations for improvement, and to identify lines for future research on this matter. It highlights key aspects of current discourses in CAR vis-à-vis the role of European countries and China and other key players. It explores post-Soviet scenarios, considering recent drastic changes in the equation of international relations in general and, more particularly the role of Russia and China vis-à-vis Europe in the CARs. This book covers the different perspectives on the EU's new strategy (2019), which will contribute to strengthening relations between the two growing regions. It will be beneficial for academics, practitioners, and policymakers.

Pentagon's South Asia Defence and Strategic Year Book 2010 Col. Harjeet Singh (Retd),2010 Pentagon's South Asia Defence and Strategic Yearbook is now in its fourth year of publication. It covers relevant issues of defence and security, military affairs and military technology written by experts and academicians themselves. These issues are important for defence services, foreign ministers and security experts spread among defence units, strategic think-tanks, government organisations / public sector units, national and

international technology manufacturers and diplomats and bureaucrats. The book has been extremely well received and its circulation has grown tremendously in the last three years. It has been regularly reviewed in the USI Journal and other reputed journals and magazines. As The Book Review has commented: In comparison to the other yearbooks, this book stands out due to the well documented opinion pieces by the experienced people from the armed forces, think tanks and academics. It creates a space for dialogue on important topics...

The Economics of Climate Change in Southeast Asia Asian Development Bank, 2009-04-01 This publication reviews the economics of climate change in Southeast Asia, with a particular focus on Indonesia, Philippines, Singapore, Thailand, and Viet Nam. It confirms that the region is highly vulnerable to climate change, demonstrates that a wide range of adaptation measures are already being applied, and that it has great potential to contribute to the reduction of greenhouse gas emissions globally. It shows that the cost to the region and globally of taking no early action against climate change far outweighs the cost of action. The publication urges Southeast Asia to play an important part in working toward a global solution to climate change, and to apply all feasible and economically viable adaptation and mitigation measures as key elements of poverty reduction and sustainable development strategies. It also argues that the current global economic crisis offers Southeast Asia an opportunity to start a transition towards a climate-resilient and low-carbon economy by introducing green stimulus programs that can simultaneously shore up economies, create jobs, reduce poverty, lower carbon emissions, and prepare for the worst effects of climate change.

Three Faces of Populism in Asia Shiru Wang, 2024-04-23 Drawing on evidence from eight case studies from across three Asian subregions, this volume highlights the distinctive features of Asian populism in comparison with Western experiences. In contrast to the latter, populist practices in Asia tend to exhibit an ambiguous nature, often characterized by ad hoc and mixed ideological add-ons. The case studies shed light on the cultural dimension of populism, an aspect that has been largely overlooked in Western contexts. Empirical evidence shows that political culture and identity politics exert an influence on populist practices in Asia. In the meantime, populist attitudes towards the role of politicians, the popular will and the relationship between the elite and the people can serve as an explanatory variable for political outcomes. The relationship between populism and democracy in Asia is observed to be more intricate than that in Western contexts. Populism is not necessarily endogenous to democracy, and thus its emergence may not solely be a response to the crisis of democracy. The book presents a valuable resource for scholars and students of Asian politics and those looking at the phenomenon of populism through a comparative lens.

Historical Dictionary of the Peoples of the Southeast Asian Massif Jean Michaud, 2006-04-19 Dwelling in the highland areas of Cambodia, Laos, Vietnam, Thailand, Burma (Myanmar) and southwest China are hundreds of ethnic groups known as 'tribes' in popular literature. Some groups number barely more than one hundred, others millions. Together their population adds up to 80 million, more than any of the countries (bar China) they inhabit, yet in each they are designated and treated as 'minorities.'

Routledge Handbook of the International Relations of South Asia Šumit Ganguly, Frank O'Donnell, 2022-10-28 This handbook offers a comprehensive

overview of the international relations of South Asia. South Asia as a region is increasingly assuming greater significance in global politics for a host of compelling reasons. This volume offers the most comprehensive collection of perspectives on the international politics of South Asia, and it covers an extensive range of issues spanning from inter-state wars to migration in the region. Each contribution provides a careful discussion of the four major theoretical approaches to the study of international politics: Realism, Constructivism, Liberalism, and Critical Theory. In turn, the chapters discuss the relevance of each approach to the issue area addressed in the book. The volume offers coverage of the key issues under four thematic sections: - Theoretical Approaches to the Study of the International Relations of South Asia - Traditional and Emerging Security Issues in South Asia - The International Relations of South Asia - Cross-cutting Regional Issues Further, every effort has been made in the chapters to discuss the origins, evolution and future direction of each issue. This book will be of much interest to students of South Asian politics, human security, regional security, and International Relations in general.

Asian Mobilities Consumption in a Changing Arctic Young-Sook Lee, 2021-10-20 This book provides an in-depth examination of the growing Asian tourism market and consumption in Arctic destinations. Through five parts, the book covers Asian mobilities consumption as an extension of Arctic international politics, the transportation sector and green cruise tourism, and ethnicity, culture, and history. It contributes to further understanding of the impacts of increased tourism in these polar regions by exploring climate change, debates around emerging economies and global power roles in the political, socio-economic, security and legal issues of the Arctic and Antarctic and associated polar strategies and policy. By drawing on a range of disciplines and with contributions from experts in Arctic destinations or who are associated with the Arctic, it further provides a holistic framing of emerging demand and mobility patterns of Asian tourists in a polar context. *Asian Mobilities Consumption in a Changing Arctic* will be valuable reading for students and academics across the fields of tourism, economics, sustainability, development studies as well as other social science disciplines.

Winning in Asia, European Style V. Aggarwal, 2016-05-24 Despite the regional currency crisis of 1997-1998, Asia-Pacific economies continue to be among the most attractive markets in the world. Although Japanese and American firms have invested heavily in the past decades, European firms are poised to take advantage of the post-Asian recovery, phenomenal Chinese growth rates, and deepening economic liberalization. This volume focuses on understanding the market and nonmarket strategies employed by European firms to boost their share of the Asian market and to rally European governments and the European Union in support of their initiatives. In addition to a novel theoretical framework to analyze strategy, three chapters focus on investment trends in Asia, lobbying in Asia and the EU, the book includes original case studies of

the air transport, automobile, software, and finance sectors.

Communicating with Asia Gerhard Leitner, Azirah Hashim, Hans-Georg Wolf, 2016-01-11 Communicating with Asia brings together an international team of leading researchers to discuss South, South-East, East and Central Asia, and explore Mandarin, Cantonese, Hindi-Urdu, Malay, and Russian as major languages. The volume locates English inside a number of national, regional or lingua franca contexts and illustrates the way it develops in such contact situations. Local dynamics affecting languages in contact and cultural links of languages are dealt with, such as educational-political issues and tensions between conflicting norms. In today's global world, where the continent is an increasing area of focus, it is vital to explore what it means to 'understand' Asian cultures through English and other languages. This important new study will be of interest to students and researchers working in the fields of regional studies, English as a global language, Asian languages and cultural studies.
