Rising China Jane Golley,Ligang Song,2011-06-01

Where the last three decades of the 20th century witnessed a China rising on to the global economic stage, the first three decades of the 21st century are almost certain to bring with them the completion of that rise, not only in economic, but also political and geopolitical terms. China's integration into the global economy has brought one-fifth of the global population into the world trading system, which has increased global market potential and integration to an unprecedented level. The increased scale and depth of international specialisation propelled by an enlarged world market has offered new opportunities to boost world production, trade and consumption; with the potential for increasing the welfare of all the countries involved. However, China's integration into the global economy has forced a worldwide reallocation of economic activities. This has increased various kinds of friction in China's trading and political relations with others, as well as generating several globally significant externalities. Finding ways to accommodate China's rise in a way that ensures the future stability and prosperity

of the world economy and polity is probably the most important task facing the world community in the first half of the 21st century. The book delves into these issues to reflect upon the wide range of opportunities and challenges that have emerged in the context of a rising China.

A Mosque in Munich Ian Johnson, 2010-05-04 In the wake of the news that the 9/11 hijackers had lived in Europe, journalist Ian Johnson wondered how such a radical group could sink roots into Western soil. Most accounts reached back twenty years, to U.S. support of Islamist fighters in Afghanistan. But Johnson dug deeper, to the start of the Cold War, uncovering the untold story of a group of ex-Soviet Muslims who had defected to Germany during World War II. There, they had been fashioned into a well-oiled anti-Soviet propaganda machine. As that war ended and the Cold War began, West German and U.S. intelligence agents vied for control of this influential group, and at the center of the covert tug of war was a quiet mosque in Munich—radical Islam's first beachhead in the West. Culled from an array of sources, including newly declassified documents, *A Mosque in Munich* interweaves the stories of several key players: a Nazi scholar turned postwar spymaster; key Muslim leaders across the globe, including members of the Muslim Brotherhood; and naïve CIA men eager to fight communism with a new weapon, Islam. A rare ground-level look at Cold War spying and a revelatory account of the West's first, disastrous encounter with radical Islam, *A Mosque in Munich* is as captivating as it is crucial to our understanding the mistakes we are still making in

our relationship with Islamists today

Our Great Qing Johan Elverskog, 2008-07-31 In a sweeping overview of four centuries of Mongolian history that draws on previously untapped sources, Johan Elverskog opens up totally new perspectives on some of the most urgent questions historians have recently raised about the role of Buddhism in the constitution of the Qing empire. Theoretically informed and strongly comparative in approach, Elverskog's work tells a fascinating and important story that will interest all scholars working at the intersection of religion and politics. —Mark Elliott, Harvard University Johan Elverskog has rewritten the political and intellectual history of Mongolia from the bottom up, telling a convincing story that clarifies for the first time the revolutions which Mongolian concepts of community, rule, and religion underwent from 1500 to 1900. His account of Qing rule in Mongolia doesn't just tell us what images the Qing emperors wished to project, but also what images the Mongols accepted themselves, and how these changed over the centuries. In the scope of time it covers, the originality of the views advanced, and the accuracy of the scholarship upon which it is based, *Our Great Qing* seems destined to mark a watershed in Mongolian studies. It will be essential reading for specialists in Mongolian studies and will make an important contribution and riposte to the 'new Qing history' now changing the face of late imperial Chinese history. Specialists in Tibetan Buddhism and Buddhism's interaction with the political realm will also find in this work challenging and thought-

provoking. –Christopher Atwood, Indiana University

Although it is generally believed that the Manchus controlled the Mongols through their patronage of Tibetan Buddhism, scant attention has been paid to the Mongol view of the Qing imperial project. In contrast to other accounts of Manchu rule, *Our Great Qing* focuses not only on what images the metropole wished to project into Mongolia, but also on what images the Mongols acknowledged themselves. Rather than accepting the Manchu's use of Buddhism, Johan Elverskog begins by questioning the static, unhistorical, and hegemonic view of political life implicit in the Buddhist explanation. By stressing instead the fluidity of identity and Buddhist practice as processes continually developing in relation to state formations, this work explores how Qing policies were understood by Mongols and how they came to see themselves as Qing subjects. In his investigation of Mongol society on the eve of the Manchu conquest, Elverskog reveals the distinctive political theory of decentralization that fostered the civil war among the Mongols. He explains how it was that the Manchu Great Enterprise was not to win over Mongolia but was instead to create a unified Mongol community of which the disparate preexisting communities would merely be component parts. A key element fostering this change was the Qing court's promotion of Gelukpa orthodoxy, which not only transformed Mongol historical narratives and rituals but also displaced the earlier vernacular Mongolian Buddhism. Finally, Elverskog demonstrates how this eighteenth-century conception of a Mongol community, ruled by an

aristocracy and nourished by a Buddhist emperor, gave way to a pan-Qing solidarity of all Buddhist peoples against Muslims and Christians and to local identities that united for the first time aristocrats with commoners in a new Mongol Buddhist identity on the eve of the twentieth century.

Overtourism Claudio Milano, Joseph M Cheer, Marina Novelli, 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous

scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

History of Civilizations of Central Asia: Development in contrast : from the sixteenth to the mid-nineteenth century Chahryar Adle, Irfan Habib, 1992 The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.

Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

Integration of the Armed Forces, 1940-1965

The Souls of China Ian Johnson, 2017 From the Pulitzer Prize winning journalist: a revelatory portrait of religion in China today, its history, the spiritual traditions of its Eastern and Western faiths, and the ways in which it is influencing China's future. Following a century of violent antireligious campaigns, China is now awash with new temples, churches, and mosques as well as cults, sects, and politicians trying to harness religion for their own ends. Driving this explosion of faith is uncertainty over what it means to be Chinese, and how to live an ethical life in a country that discarded traditional morality a century ago and is still searching for new guideposts. Ian Johnson lived for extended periods with underground church members, rural Daoists, and Buddhist pilgrims. He has distilled these experiences into a cycle of festivals, births, deaths, detentions, and struggle a great awakening of faith that is shaping the soul of the world's newest superpower. (With black-and-white illustrations throughout).
