Preventing Suicide Karen Mason, 2014-08-01 v 12th Annual Outreach Resource of the Year What is the church's role in suicide prevention? While we tend to view the work of suicide prevention as the task of professional therapists and doctors, the church can also play a vital role. Studies show that religious faith is an important factor reducing the risk of suicide. Yet many pastors, chaplains and pastoral counselors feel overwhelmed and unprepared to prevent suicides. In this practical handbook, psychologist Karen Mason equips ministry professionals to work with suicidal individuals. Integrating theology and psychology, she shows how pastoral caregivers can be agents of hope, teaching the significance of life, monitoring those at risk and intervening when they need help. Because church leaders are often present in people's lives in seasons of trouble and times of crisis, they can provide comfort in the midst of suffering and offer guidance for the future. When our church members struggle in the darkness, the darkness need not overcome them. Discover how you and your church can be proactive in caring for those at risk of self-harm.

A Culture of Caring Theodora Schiro,2020-02-20 As awareness grows about the alarming increase in youth suicide rates, school leaders need information on suicide prevention and postvention. Tragically, the search often begins only after the school community has suffered the loss of a student. Schools must start to be proactive and educate themselves about risk factors and prevention strategies. Designed as a handbook for busy educators, *A Culture of Caring: A Suicide Prevention Guide for Schools (K–12)* includes information about prevention, intervention, and postvention along with commentary from experts in the field. Each chapter stands alone and does not have to be read in sequence. Resources and descriptions of programs relevant to each chapter are organized by topic. School leaders, counselors, and teachers can use the information to create their own plans or just glance through it to get ideas. With this book, any school community that takes suicide prevention seriously will have access the knowledge, tools and resources to save lives.

Improving Care to Prevent Suicide Among People with Serious Mental Illness National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Health and Medicine Division,Board on Health Care Services,2019-04-19 Suicide prevention initiatives are part of much broader systems connected to activities such as the diagnosis of mental illness, the recognition of clinical risk, improving access to care, and coordinating with a broad range of outside agencies and entities around both prevention and public health efforts. Yet suicide is also an intensely personal issue that continues to be surrounded by stigma. On September 11-12, 2018, the National Academies of Sciences, Engineering, and Medicine held a workshop in Washington, DC, to discuss preventing suicide among people with serious mental illness. The workshop was designed to illustrate and discuss what is known, what is currently being done, and what needs to be done to identify and reduce suicide risk. *Improving Care to Prevent Suicide Among People with Serious Mental Illness* summarizes presentations and discussions of the workshop.

Reducing Suicide Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Pathophysiology and Prevention of Adolescent and Adult Suicide,2002-10-01 Every year, about 30,000 people die by suicide in the U.S., and some 650,000 receive emergency treatment after a suicide attempt. Often, those most at risk are the least able to access professional help. *Reducing Suicide* provides a blueprint for addressing this tragic and costly problem: how we can build an appropriate infrastructure, conduct needed research, and improve our ability to recognize suicide risk and effectively intervene. Rich in data, the book also strikes an intensely personal chord, featuring compelling quotes about people's experience with suicide. The book explores the factors that raise a person's risk of suicide: psychological and biological factors including substance abuse, the link between childhood trauma and later suicide, and the impact of family life, economic status, religion, and other social and cultural conditions. The authors review the effectiveness of existing interventions, including mental health practitioners' ability to assess suicide risk among patients. They present lessons learned from the Air Force suicide prevention program and other prevention initiatives. And they identify barriers to effective research and treatment. This new volume will be of special interest to policy makers, administrators, researchers, practitioners, and journalists working in the field of mental health.

Rethinking Suicide Craig J. Bryan,2021-10-04 An examination of how suicide

prevention efforts largely fail due to the mistaken assumption that greater mental health awareness is the key to saving lives. Over the last two decades, the US suicide rate has steadily grown despite extensive awareness campaigns, wide implementation of suicide prevention programs and initiatives, and increased mental health advocacy. To the confusion and frustration of researchers, healthcare providers, and many others, these efforts have largely failed to reverse the trend. Why do suicide rates continue to climb despite our best efforts? Why aren't we better at this? What are we doing wrong? *Rethinking Suicide* is a critical examination of what we think we know about suicide, with particular focus on the assumed role of mental illness. Craig J. Bryan, a leading expert on suicide prevention, argues that most prevention efforts have failed because they disproportionately emphasize mental health-focused solutions such as access to treatment and crisis services. Instead of classifying suicide as a mental health issue, careful analysis of research findings suggest it should instead be seen as a highly complex problem with many risk factors - from personal decision-making styles, to the availability of lethal means, to financial uncertainty. As such suicide rates will not be curtailed by conventional solution-oriented thinking; rather, we need process-based thinking that may, in some cases, defy or contradict many of our long-held assumptions about suicide. *Rethinking Suicide* interweaves the author's firsthand experiences with explanations of scientific findings to reveal the limitations of widely-used practices and to introduce new perspectives that may trigger a paradigm shift in how we understand and prevent suicide.

The Suicide Solution Frank Selden, 2016-12-14 To convince yourself or someone else that suicide isn't the answer, you must first accept this reality: For some people, it is the answer. When Frank Selden came home from a tour in Iraq, having been deployed as a member of the Washington Army National Guard, he was a changed man. He went from being a loving father, supportive husband, and proud soldier to someone who no longer loved his country or his own life. He lived for several years under a dark cloud and tried killing himself four times. He should have died each time, but something providential intervened. In *The Suicide Solution*, he examines how he regained his joy for living and initiates an honest discussion on suicide, including its benefits. Making blanket statements such as, There is nothing to gain won't do anything to prevent suicide among those who see it as an attractive option. With an average of twenty-two veterans killing themselves every single day and with suicide being the second leading cause of death in the 15 to 34 age group, it's time to rethink suicide from the ground up.

Eight Stories Up DeQuincy Lezine, David Brent, 2008-04-14 As a teenager, DeQuincy Lezine nearly ended his own life, believing it was the only way to escape the emotional pain that was overwhelming him. Instead, Lezine was able to find expert psychiatric care, and went on to found the first university campus-based chapter of the Suicide Prevention Action Network USA. Now a researcher at the University of Rochester's Center for the Study and Prevention of Suicide, Lezine has devoted his life to preventing suicide in adolescents, and he brings the wealth of his personal and professional experience to bear in *Eight Stories Up*. He starts by describing his deteriorating state of mind in college, using his own email archive to retell the episode that would nearly claim his life. He then offers hard-earned wisdom and practical advice to other young people who may be considering suicide. In straightforward, easy-to-understand language, and drawing on the psychiatric expertise of David Brent, MD, Lezine discusses the potential causes of suicide in adolescents, how to seek psychiatric treatment, and how to get the most out of professional help. He also surveys some of the therapies used to prevent suicide, how to talk to loved ones about suicidal thoughts, and how to stay healthy at home and at school. The result is both a

remarkable memoir and a useful guide that will ease the isolation and hopelessness caused by thoughts of suicide, helping young people to overcome their troubles in a safe and healthy way. Part of the Adolescent Mental Health Initiative series of books written specifically for teens and young adults, *Eight Stories Up* offers hope to young people who are at risk of suicide, extending a lifeline of support and guidance that can save their lives.
