Managing Intercollegiate Athletics Daniel Covell,Sharianne Walker,2019-03-07 This practical, comprehensive book combines solid theoretical concepts with relevant examples, extensive factual information, and important insider perspectives to help prepare students who are interested in pursuing a career in collegiate athletics management. The authors' in-depth discussions reveal the inner workings of athletic departments and the conferences and governing organizations that impact them. Using examples from institutions of varying sizes and representing numerous conferences, associations, and divisions, *Managing Intercollegiate Athletics*, second edition, provides an extensive view of management processes such as generating revenue to cover expenses; recruiting and its mechanics and regulations; the role of the conferences and national governing bodies; and academic standards, reform, and fraud. New to the second edition is an increased emphasis on the impact of division, institution, and department missions and goals on decision making. The book also includes new discussions of the application of management functions--including goal setting, decision making, and strategic management--on intercollegiate athletics at various levels. Adding to the practical nature of the book, and providing an important critical-thinking component to each chapter, are Practitioner Perspectives. These contributions demonstrate how and why administrators make and implement their decisions, and they present creative problem-solving ideas for readers that they can use in their own careers. New Practitioner Perspectives in this edition provide, for example, an insider's view from an NCAA vice president, a conference commissioner, and a Division I athletic director. Chapters also feature one or more Case Studies offering an in-depth look at how institutions grapple with management challenges. In the second edition, new case studies look at the NCAA's leadership role in the Penn State University abuse case, the role of the TRAC model to ensure data-based decision making in terminating the University of Alabama at Birmingham football program, and others. These case studies and accompanying questions can serve as starting points for class discussion.

Bob Zuppke Maynard Brichford,2009-09-12 Bob Zuppke was head football coach at the University of Illinois from 1912 to 1941, a period that saw two world wars, a major economic depression, and significant changes in higher education and the role of sports, as major intercollegiate competitions became primary public relations events for the most competitive universities. Often credited with several significant football innovations including the huddle, Zuppke won two national championships and won or tied for seven Big Ten conference titles. This biography of Zuppke is a study of his passion for football, his advocacy for its educational value and his ability to promote and market the game to the academic community and the general public. It places him in the context of multiple themes, including the development of interscholastic, intercollegiate and professional football; presidential support and public relations; sports psychology; stadium building and commercial sports; academic criticism; the fraternity system; boosters; and sports in a state-supported public university.

Comprehending Columbine Ralph W Larkin,2007-01-12 On April 20, 1999, two Colorado teenagers went on a shooting rampage at Columbine High School. That day, Eric Harris and Dylan Klebold killed twelve fellow students and a teacher, as well as wounding twenty-four other people, before they killed themselves. Although there have been other books written about the tragedy, this is the first serious, impartial investigation into the cultural, environmental, and psychological causes of the massacre.Based on first-hand interviews and a thorough reading of the relevant literature, Ralph Larkin examines the complex of factors that led the two young men to plan and carry out their deed. For Harris and Klebold, Larkin concludes, the carnage was an act of revenge against the jocks who had harassed and humiliated them, retribution against evangelical students who acted as if they were morally superior, an acting out of the mythology of right-wing paramilitary organization members to die in a blaze of glory, and a deep desire for notoriety.Rather than simply looking at Columbine as a crucible for all school violence, Larkin places the tragedy in its proper context, and in doing so, examines its causes and meaning.
