**Cooperation Networks and Economic Development** Andrés Cárdenas O'Farrill, 2021-02-11 For most Western audiences, Cuba is a touristic paradise stuck in time and virtually detached from world technology networks by the US embargo – anything but a hub of industrial innovation and high value-added biotechnology. However, a closer look reveals more subtle but equally powerful stories that challenge the homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban economy and industry. From this kind of enquiry emerges the case of the internationally respected Cuban biotech industry as the most successful case of science and technology policy in the country's economic history. The book takes an interdisciplinary approach, exploring issues such as interdependency, purpose and history as natural constituencies of the innovation process. It also examines the dynamic and crucial role played by the state in the formation of innovative business enterprises. This book will be of interest to academic researchers in the fields of innovation and economic development.

**The Spectacle of Expertise** Alex Preda, 2023-02-16 Financial experts have become ubiquitous on television, radio, and social media. They provide investment advice, interpret market movements, and explain the implications of political events, wielding a great deal of power and influence through their media presence. How do these experts acquire their authority, and what makes displays of financial expertise persuasive to their audiences? Alex Preda provides an ethnographic exploration of how financial expertise is performed and produced in the media, analyzing its features and how audiences react to

it. He examines how analysts, anchors, and producers collaborate in manufacturing financial talk that circulates around the world. Preda emphasizes the significance of talk—as opposed to the written word—in finance, as the fabric of many transactions and a means of capturing capital. Analysts and media figures understand financial talk as requiring a skill set distinct from conducting research or representing facts. Preda demonstrates that analysts and media professionals deploy expertise when they engage with audiences in ways that make it difficult to contest the claims conveyed in their talk. The Spectacle of Expertise is based on close observations of TV and radio studios in Hong Kong, a global financial center and a crucial gateway to China, including interviews with audience members and financial analysts who appear as regular guests. It offers new and global perspectives on the relationship between financial expertise and the media, the making of public-expert talk, and how expertise is used to legitimize financialization.
