The Routledge Handbook of Magazine Research David Abrahamson,Marcia R. Prior-Miller,2015-06-05 Scholarly engagement with the magazine form has, in the last two decades, produced a substantial amount of valuable research. Authored by leading academic authorities in the study of magazines, the chapters in The Routledge Handbook of Magazine Research not only create an architecture to organize and archive the developing field of magazine research, but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments and interpretive breakthroughs. Exploration of the digital challenges and opportunities which currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form, as well as of the sociocultural realities it both mirrors and influences. The book includes six sections: -Methodologies and structures presents theories and models for magazine research in an evolving, global context. -Magazine publishing: the people and the work introduces the roles and practices of those involved in the editorial and business sides of magazine publishing. -Magazines as textual communication surveys the field of contemporary magazines across a range of theoretical perspectives, subjects, genre and format questions. -Magazines as visual communication explores cover design, photography, illustrations and interactivity. -Pedagogical and curricular perspectives offers insights on undergraduate and graduate teaching topics in magazine research. -The future of the magazine form speculates on the changing nature of magazine research via its environmental effects, audience, and transforming platforms.

Disability and Social Media Katie Ellis,Mike Kent,2016-11-10 Social media is popularly seen as an important media for people with disability in terms of communication, exchange and activism. These sites potentially increase both employment and leisure opportunities for one of the most traditionally isolated groups in society. However, the offline inaccessible environment has, to a certain degree, been replicated online and particularly in social networking sites. Social media is becoming an increasingly important part of our lives yet the impact on people with disabilities has gone largely unscrutinised. Similarly, while social media and disability are often both observed through a focus on the Western, developed and English-speaking world, different global perspectives are often overlooked. This collection explores the opportunities and challenges social media represents for the social inclusion of people with disabilities from a variety of different global perspectives that include Africa, Arabia and Asia along with European, American and Australasian perspectives and experiences.

Spirituality across Disciplines: Research and Practice: Marian de Souza,Jane Bone,Jacqueline Watson,2016-06-29 This book collects multiple disciplinary voices which explore current research and perspectives to discuss how spirituality is understood, interpreted and applied in a range of contexts. It addresses spirituality in combination with such topics as Christian mysticism, childhood and adolescent education, midwifery, and sustainability. It links spirituality to a variety of disciplines, including cognitive neuroscience, sociology, and psychology. Finally, it discusses the application of spirituality within the context of social work, teaching, health care, and occupational therapy. A final chapter provides an analytical discussion of the different voices that appear in the book and offers a holistic description of spirituality which has the potential to bring some unity to the meaning, expression and practice of spirituality across a variety of disciplines as well as across cultural, religious and secular worldviews. A strength of the book is that each chapter is characterized by a fearless confronting of oppositional perspectives and use of the latest research in addressing them. The book takes the difficult topic of spirituality into almost every nook and cranny of personal and professional life. There is a persistent grasping of the contentiousness of the topic, together with addressing counter positions and utilizing updated research across a range of fields in doing this. The opening and closing chapters serve as book ends that keep the whole volume together.Terence Lovat, The University of Newcastle, Australia The interdisciplinary nature of the work is by far the strongest aspect of this volume. It has the potential to contribute to a dialogue between different professions and disciplines. This prospective publication promises to promote a more holistic approach to the study of spirituality. This volume takes into consideration a wide variety of issues. The way the editors have structured the sequence of chapters contributes to facilitate any possible dialogue between the different areas.Adrian-Mario Gellel, University of Malta, Malta

<u>An Intergenerational Feminist Media Studies</u> Jessalynn Keller,Jo Littler,Alison Winch,2019-10-23 Feminism and generation are live and ideologically freighted issues that are subject to a substantial amount of media engagement. The figure of the millennial and the baby boomer, for example, regularly circulate in mainstream media, often accompanied by hyperbolic and vitriolic discourses and effects of intergenerational feminist conflict. In addition, theories of feminist generation and waves have been, and continue to be, extensively critiqued within feminist theory. Given the compelling criticisms directed at these categories, we ask: why bother examining and foregrounding issues of generation, intergeneration, and transgeneration in

feminist media studies? While remaining skeptical of linearity and familial metaphors and of repeating reductive, heteronormative, and racist versions of feminist movements, we believe that the concept of generation does have critical purchase for feminist media scholars. Indeed, precisely because of the problematic ways in which it is used, and its prevalence as a volatile, yet only too palpable, organizing category, generation is in need of continual critical analysis, and is an important tool to be used—with care and nuance—when examining the multiple routes through which power functions in order to marginalize, reward, and oppress. This book covers a range of media forms: film; games; digital media; television; print media; and practices of media production, intervention, and representation. The contributors explore how figures at particular stages of life—particularly the girl and the aging woman—are constructed relationally and circulate within media, with particular attention to sexuality. The book emphasizes exploring the ways in which the category of generation is mobilized in order to gloss sexism, racism, ageism, class oppression, and the effects of neoliberalism. The chapters in this book were originally published as a special issue of Feminist Media Studies.

Media Convergence Handbook - Vol. 1 Artur Lugmayr,Cinzia Dal Zotto,2015-11-20 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges. Approaching the topic from a managerial, technological as well as end-consumer perspective, it acts as a reference book and educational resource in the field. Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools. However, it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account. Media consumers, content producers and managers face different challenges in the process of media convergence. Volume I of the Media Convergence Handbook encourages an active discourse on media convergence by introducing the concept through general perspective articles and addressing the real-world challenges of conversion in the publishing, broadcasting and social media sectors.

Low Resource Social Media Text Mining Shriphani Palakodety,Ashiqur R. KhudaBukhsh,Guha Jayachandran,2021-10-01 This book focuses on methods that are unsupervised or require minimal supervision—vital in the low-resource domain. Over the past few years, rapid growth in Internet access across the globe has resulted in an explosion in user-generated text content in social media platforms. This effect is significantly pronounced in linguistically diverse areas of the world like South Asia, where over 400 million people regularly access social media platforms. YouTube, Facebook, and Twitter report a monthly active user base in excess of 200 million from this region. Natural language processing (NLP) research and publicly available resources such as models and corpora prioritize Web content authored primarily by a Western user base. Such content is authored in English by a user base fluent in the language and can be processed by a broad range of off-the-shelf NLP tools. In contrast, text from linguistically diverse regions features high levels of multilinguality, code-switching, and varied language skill levels. Resources like corpora and models are also scarce. Due to these factors, newer methods are needed to process such text. This book is designed for NLP practitioners well versed in recent advances in the field but unfamiliar with the landscape of low-resource multilingual NLP. The contents of this book introduce the various challenges associated with social media content, quantify these issues, and provide solutions and intuition. When possible, the methods discussed are evaluated on real-world social media data sets to emphasize their robustness to the noisy nature of the social media environment. On completion of the book, the reader will be well-versed with the complexity of text-mining in multilingual, low-resource environments; will be aware of a broad set of off-the-shelf tools that can be applied to various problems; and will be able to conduct sophisticated analyses of such text.
