Asteroid Discovery Bobby Akart, 2019-06-19 Gunner Fox finds himself in a place of darkness, without a reason to live. Until now. An asteroid is on a collision course with our planet. Gunner Fox is on a collision course with death. International best selling author, Bobby Akart, introduces Gunner Fox, a United States Air Force fighter pilot and Earth Scientist. When America needs a hero, they turn to a man who has nothing to live for, without a care in the world - except to save it. Somewhere out there, an asteroid is on a collision course with Earth. Five times in the history of our planet, extinction level events have occurred, arguably all of which have been caused by asteroids. Will we be ready to meet it? We'll get just one chance to defend ourselves. Will we succeed? In Bobby Akart's Asteroid Series, he serves up hard evidence for the astonishing fragility of life and a humbling lesson for us all. It shows we are at the mercy of forces we do not see nor understand; forces that made our existence possible a few hundred thousand years ago and that just as quickly - in the twinkling of an eye - can and will one day, take us out. A page turning trilogy from a master storyteller, this new Gunner Fox series begins with *Asteroid Discovery*. WHAT READERS ARE SAYING: I have not been so enthralled in a story in a long time! If you want an intense, intelligent read, this is for you. I love the way Mr. Akart does his research and his writing shows it. Bobby Akart writes so eloquently that you forget you're reading a story. You're in the book ... racing against time, looking over your shoulder, gasping for air.

Asteroid Diversion: A Gunner Fox Trilogy Bobby Akart, 2019-07-06 Space is far from empty. It's full of debris ... wandering nomads seeking a target. Including Asteroid IM86, large enough to destroy us all. When the world needs a hero, they turn to Gunner Fox who will move Heaven to save Earth. _____ *DIVERSION* places Gunner Fox, a United States Air Force Test Pilot and Earth Scientist on a collision course with a planet killing asteroid. Time is running out as asteroid 2029 IM86 is hurtling toward Earth. NASA needs their most fearless combat pilot for a life or death mission. They need Gunner Fox. Can he succeed in saving Earth? The odds are stacked against him and an unexpected foe threatens to derail the whole mission. The fate of the planet rests in the hands of Gunner Fox while the weight of the world rests on his shoulders. Can he move Heaven to save Earth, or will he die trying? Regarded for his fact based fiction, Bobby Akart once again masterfully mixes science with suspense in this page turning Asteroid series, as it continues with book two of the Gunner Fox trilogy, *DIVERSION*. _____ What readers are saying: Best novel yet! ... an intense, adrenaline filled, emotional thriller ... Heart pounding, BP rising, and action in many different locations. Charge your Kindle first! Impossible to put down. ... hold on to your seat ...

Golf Balls, Boomerangs and Asteroids Brian H. Kaye, 2008-07-11 Exciting reading for anyone with a curious mind! 'Walking one day by a golf course in Wisconsin, I was startled to hear a sharp bang as a golf ball narrowly missed my head and hit a tree. My companion cheerfully remarked, 'That could have killed you, you know.' I picked up the innocent looking little white ball and looked at it with

new respect.' Prompted by this perilous experience, Brian Kaye has written a delightful and informative book on the design and behavior of different kinds of missiles from golf balls, arrows, and slingshots to comets and rockets to outer space. You'll learn about the science of tennis and find the answer to questions like why a golf ball has dimples or why a boomerang comes back. Don't miss Brian Kaye's latest, you'll be amused and amazed - and learn some physics to boot.

Asteroid Destruction Bobby Akart,2019-08-03 Heaven and Earth collide in DESTRUCTION, the thrilling conclusion to the Asteroid series. ... outstanding fast paced action book... Humanity was spared extinction, but that doesn't mean it's over. While the world is preparing for the onslaught of the remnants of the asteroid, the Starhopper and its international crew of eight are missing.

Asteroids Richard Hantula,Isaac Asimov,2002-08-02 Introduces the bodies in space also known as planetoids, minor planets, or when they stray from their paths, meteoroids.

Starbreed Samantha Askeborn,2013-05-24 Having just concluded a good trade on Ceti-2, both knew an attack was very likely. But when it came, the luck was not on their side. Almost totally crippled, the smallest ship drifted awaytoward the galactic rim. And only at the many hours from a supreme patience and a bit of luck they finally got the ship moving. Days later, the duo chanced upon a small yellow star. While not wasting energy, they opted for the third planet, and though Roak tried, it was a bouncy, jolting landing. Realization of being marooned, A0ry constructed a pulsar signal. This was done only after instilling great fear and respect in the barbaric primitive, then the signal was initiated. Soon aburst under strange, awesome circumstances, and a startled Roak names the infant Aquina. Soon afterward Roak dies from a poisonous bite. Dien has been entrusted by the Ancient Ones to raise, teach, and guard Aquina until she is of age. As centuries pass, Aquina grows and so too from mental and awesome language skills and blossoms into a statuesque ethereal beauty. It is the era of the crude airplane, and the great war that raged in the South is finished. Aquina knows she and Dien are different. Slowly with great care and skill, they enter the primitive native society.

The Asteroid Threat William E. Burrows,2014 Presents a realistic, workable plan for defusing a potentially lethal threat from a rogue asteroid or comet. The explosion of a large meteor over Chelyabinsk, Siberia, in February 2013 is just the latest reminder that planet Earth is vulnerable to damaging and potentially catastrophic collisions with space debris of various kinds. In this informative and forward-looking book, veteran aerospace writer William E. Burrows explains what we can do in the future to avoid far more serious impacts from Near-Earth Objects (NEOs), as they are called in the planetary defense community. The good news is that humanity is now equipped with the advanced technology necessary to devise a long-term strategy to protect the planet. Burrows outlines the following key features of an effective planetary defense strategy- * A powerful space surveillance system capable of spotting a serious threat from space at least a year in advance * A space craft nudge that would throw a collision-course asteroid off target long before it poses the threat of imminent impact * A weapons system to be used as a last-ditch method to blast an NEO should all else fail. The author notes the many benefits for world stability and increasing international cooperation resulting from a united worldwide effort to protect the planet. Combining realism with an optimistic can-do attitude, Burrows shows that humanity is capable of overcoming a potentially calamitous situation.

Asteroids, Comets, and Meteorites Jon Erickson,2014-05-14 Looks at asteroids, comets and meteorites, including what they are, how they are formed, how they have affected the history of Earth, and definitions of related terms.

Asteroid of Fear Raymond Gallun,2017-09-17 All space was electrified as that harsh challenge rang out ... but John Endlich hesitated. For he saw beyond his own murder - saw the horror and destruction his death would unleash - and knew he dared not fight back!

Enemy Asteroids Angie Timmons,2018-12-15 What happened to the dinosaurs that once roamed Earth? Could they have been extinguished by an explosion or perhaps by a meteor? Through colorful images and accessible language, readers will explore the drastic events that forever changed life on Earth nearly seventy million years ago, learn more about the debris that's been falling to Earth for billions of years, and be introduced to the way Earth interacts with other objects in the solar system. Informative sidebars and fascinating facts encourage learners to ponder what lurks in space, and what it means for the future.

Incoming Asteroid! Duncan Lunan,2013-10-17 'Incoming Asteroid!' is based on a project within ASTRA (the Association in Scotland to Research into Astronautics) to provide scientific answers to the question - what would we do if we knew there was going to be an asteroid impact in ten years' time or less? Clearly there are many things humanity can do nothing about, for example an unseen object traveling towards us so fast that we have no time to prepare, or an object so large it may be unstoppable. A realistic hazard model was decided upon, and the scenario developed from that: an incoming object about 1 kilometer in diameter, in an orbit ranging from the outer rim of the Asteroid Belt to within that of Earth's. Three basic possibilities are considered in this book. The first is the deflection of the asteroid, using remote probes along with a number of possible technologies to change the asteroid's course. Second is the attempt of a manned mission, in order to plant a propulsion system on the asteroid to push it into a different orbit. Third is the nuclear option, a last-ditch attempt to break up and then disperse the asteroid using nuclear weapons. (A rather impractical combination of these second and third options were used as the plot of the popular 1998 Bruce Willis feature film, Armageddon.) Although the cost of developing the technology needed to protect the Earth would be substantial, there would certainly be spin-off benefits. These could eventually result in practical small-scale atomic energy sources, new propulsion systems that could make extraterrestrial mining within the solar system a possibility, and other as-yet unforeseen benefits. And finally,

Incoming Asteroid! considers the political implications - how governments across the world should best react to the threat with a view to minimizing loss of life, and in the weeks running up to the possible impact, preventing panic in the population.

Asteroid Hunters Carrie Nugent, 2017-03-14 One of the top scientists in the field of asteroid hunting explains how, for the first time, humanity could have the knowledge to prevent a devastating asteroid impact. --
