Football Fans, Their Information, The Web and The Personal Home Page Shant Narsesian,2010-01-08 From the early days of the Internet to the present day, the World Wide Web has developed into one of the world's largest information resources. One of the first genres of web pages, which was also one of the first information resources, was the Personal Home Page (PHP). Over this same period of time, professional football in England has created the world's richest league and by extension an abundance of football-related PHPs. This book examines the role of the PHP as an information resource using the subject area of professional football in England. A holistic approach was taken so as to view the PHP in a broader context, as one information resource amongst many, including non-PHPs and even offline information resources (e.g. reference books). Within this study, football fans were interviewed along with web authors, surveys were carried out (by distributing both online and offline questionnaires) and additional research was also carried out online, examining football-related PHPs and online web collaborations. Results suggest that whilst there are many informational benefits to be found on PHPs, such as plentiful unique information, they have low levels of use amongst football fans. The study concludes by proposing an avenue to the maximisation of the informational benefit of PHPs through a blueprint for a type of communal football website called the Club Community Composite Page (CCCP). Overall, several contributions are made to the field of information science, most notably attaining an improved understanding of PHPs as unique and accurate information providers online and devising new research methods for PHP research. In particular, the method of identification of PHPs developed here will be a useful tool for future researchers of PHPs. The contributions of this work are likely to be of value to researchers working in relevant sub-fields of information science, such as information seeking, web genres, grey literature and virtual communities.

Diversity in Leadership Joy Damousi,Kim Rubenstein,Mary Tomsic,2014-11-25 While leadership is an over-used term today, how it is defined for women and the contexts in which it emerges remains elusive. Moreover, women are exhorted to exercise leadership, but occupying leadership positions has its challenges. Issues of access, acceptable behaviour and the development of skills to be successful leaders are just some of them. *Diversity in Leadership: Australian women, past and present* provides a new understanding of the historical and contemporary aspects of Indigenous and non-Indigenous women's leadership in a range of local, national and international contexts. It brings interdisciplinary expertise to the topic from leading scholars in a range of fields and diverse backgrounds. The aims of the essays in the collection document the extent and diverse nature of women's social and political leadership across various pursuits and endeavours within democratic political structures.

Intercultural Faultlines Maeve Olohan,2017-09-29 Intercultural Faultlines offers an exploration of research models and methods in translation studies, as implemented, discussed and critically evaluated by some of the leading researchers in the field of translation and interpreting. While the focus throughout is on textual and cognitive aspects of translation and interpreting, the objects of study and consequently the methodological considerations are wide-ranging. The volume contains chapters focusing on research conducted in areas as diverse as corpus-based translation

studies, dialogue interpreting, simultaneous interpreting, acquisition of translation competence, cognitive processes in translation, translation into the L2, creativity in translation and translation quality assessment. Some research models and methods are applied to translation for the first time, while others are more established and can be assessed in terms of their reliability and the generalizability of the results they yield. Issues of research design and methodology are addressed, and interesting questions are raised which are likely to become the focus of attention in future research, for example with regard to causal models of translation, translational ethics, collaborative research and issues of power in interpreting research.

Aston Martin Richard Loveys, 2015-04-10 Aston Martin is now more than a century old – and what a century it has been. Since its birth in London on the eve of the First World War, the company has experienced the highs of racing triumph – most famously in the 1959 Le Mans 24-hour race – and the lows of bankruptcy, yet throughout it all has been in the first rank of British marques. Published in association with the Aston Martin Heritage Trust and written by enthusiast Richard Loveys, Aston Martin is a fully illustrated history of the company that has created some of the world's best loved and most widely respected cars, including James Bond's iconic DB5. It covers the cars themselves, the personalities and talents who have shaped Aston Martin from owners to engineers, the drivers who have shared with the company in racing glory, and the centenary celebrations of 2013.
