The Globalization of Corporate R & D Prasada Reddy,2000-08-24 In this study, Prasada Reddy addresses several fundamental questions: What are the driving forces behind this phenomenon? Why are these new trends mainly visible among companies dealing with new science-based technologies, such as electronics or new materials? And what are the implications of this trend for 'host' countries? The book presents important new research material, in the form of detailed case studies of India and Singapore, and offers an evolutionary theoretical basis for comprehending the processes at work. As a result, the book illuminates our understanding of both the behaviour of transnational corporations, and the broader processes of globalization. Globalization of Corporate R & D will be of interest to those working in the fields of development studies, economics or international business.--Jacket.

International HRM and Development in Emerging Market Multinationals Paresha Sinha,Parth Patel,Verma Prikshat,2021-12-21 Emerging multinational enterprises (or EMNEs) have made a huge impact on the international business stage by internationalising at a rapid rate. And they have performed remarkably well in both developing and developed countries. Accordingly, there is a growing strand of literature on how EMNEs manage their international human resource (IHRM) practices in different international contexts. However, the majority of the literature on IHRM practices of EMNEs is limited to explaining what international management practices EMNEs implement in their foreign subsidiaries and how they implement them. Too often, EMNEs struggle to transfer their weak management practices across national borders as they have limited experience, resources and capabilities when compared to MNEs from developed countries. Developing a better understanding on the manner in which EMNEs adopt their international human resource management and development practices abroad is, therefore, paramount to fully understand their globalisation-related behaviours. This dedicated book will aim to provide a holistic picture and contemporary insights on IHRM in emerging multinational enterprises. It will be of interest to researchers, academics and students in the fields of business and management, especially those with a particular interest in human resource management, firm internationalisation and emerging markets.

Corporate Social Responsibility and Sustainable Development Risa Bhinekawati,2016-12-19 Many different companies can significantly contribute to the integrated goals and targets of the United Nations’ sustainable development goals, such as poverty reduction by 2030. Poverty is not only about people living on less than \$1.25 per day, but more fundamentally, it is their lack of capabilities and access to participate in productive economic activities. If companies can contribute in order to provide access and the necessary skills, then individuals will have the capabilities to achieve their aspirations, including earning a higher income. Corporate Social Responsibility and Sustainable Development supports Sen’s assertions that poverty can be alleviated if the capability of individuals is improved. Beyond that, this book shows that sustainable development goals can be achieved when the company’s CSR programs and social capital development in improving people’s capabilities are combined with necessary finance access and market access for the poor. The theoretical model developed from the journey of Astra International, one of the largest public-listed companies in Indonesia, is replicable for other companies aspiring to be sustainable in developing countries. The model shows a virtuous cycle between the corporate aim, CSR programs, social capital and corporate sustainability. This volume is of great value to academics, practitioners and policy makers interested in the themes of CSR, social capital and sustainable development of developing countries. It also appeals to professionals in industry associations, development agencies and international organizations, as well as NGOs that are concerned with the achievement of sustainable development goals by 2030.

Towards a new order in the global automotive industry: How Asian companies catch up to their western peers Daniel Wäldchen, 2014-02-01 The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

Cemeterians Jack W. Plunkett, 2008 Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Automotive Industrialisation Kaoru Natsuda, John Thoburn, 2020-10-14 This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

China and the Global Business Revolution P. Nolan, 2001-07-26 China has used industrial policies to try to build large corporations that can challenge those based in more advanced countries. By the late 1990s the operational mechanism of China's large firms had seen large advances. Simultaneously, a revolution has taken place in global business systems, and China's large firms are even further behind the global leaders than when they began their reforms. The WTO will require China to operate rapidly on the 'global playing field' in competition with the world's leading corporations, and this increased gap presents a deep challenge for China's business and political leaders. Peter Nolan presents here the first in-depth case studies of China's large corporations under economic reform, combined with systematic benchmarking of these firms against the world's leading corporations. The book is an unrivalled resource of information on Chinese businesses,

and also leads the reader to consider the impact of China's response to its current challenges not only on China itself, but on the wider global economy.
