Sic Itur Ad Astra Paul Kunitzsch,2000 Die Festschrift vereinigt 29 Beiträge, die folgende Sachgebiete betreffen: arabische und mittelalterlich-europäische Mathematik, Überlieferungsgeschichte der indisch-arabischen Ziffern, die arabisch-islamische Astronomie, die volkstümliche arabische Himmelskunde, das Astrolab und seine Nomenklatur, antike und spätgriechische astronomische Traditionen, weitere Fragen bzw. Texte zur Überlieferung der Wissenschaften im griechisch-syrisch-arabisch-lateinischen Traditionsraum. Alle Arbeiten sind originell und beruhen auf einschlägigen Originalquellen. Mehrere griechische, syrische, arabische und lateinische Texte bzw. Auszüge daraus sind auch ediert. Die Sammlung enthält somit wichtige, neue Bausteine für unser Gesamtbild von den arabischen Wissenschaften, ihrem Nachleben in Europa und weiteren Ausstrahlungen auf die europäische Geistesgeschichte.

Manilius and His Intellectual Background Katharina Volk,2009-02-12 This is the first English-language monograph on Marcus Manilius, a Roman poet of the first century AD, whose *Astronomica* is our earliest extant comprehensive treatment of astrology. Katharina Volk brings Manilius and his world alive for modern readers by exploring the manifold intellectual traditions that have gone into shaping the *Astronomica*: ancient astronomy and cosmology, the history and practice of astrology, the historical and political situation at the poem's composition, the poetic and generic conventions that inform it, and the philosophical underpinnings of Manilius' world-view. What emerges is a panorama of the cultural imagination of the Early Empire, a fascinating picture of the ways in which educated Greeks and Romans were accustomed to think and speak about the cosmos and man's place in it.

Humanistica Lovaniensia Gilbert Tournoy,2004-02-15 Volume 53

Unceasing Strife, Unending Fear William Chester Jordan,2016-07-26 This absorbing book explores the tensions within the Roman Catholic church and between the church and royal authority in France in the crucial period 1290-1321. During this time the crown tried to force churchmen to accept policies many considered inconsistent with ecclesiastical freedom and traditions--such as paying war taxes and expelling the Jews from the kingdom. William Jordan considers these issues through the eyes of one of the most important and courageous actors, the Cistercian monk, professor, abbot, and polemical writer Jacques de Thérines. The result is a fresh perspective on what Jordan terms the story of France in a politically terrifying period of its existence, one of unceasing strife and unending fear. Jacques de Thérines was involved in nearly every controversy of the period: the expulsion of the Jews from France, the relocation of the papacy to Avignon, the affair of the Templars, the suppression of the

heresies of Marguerite Porete and of the Spiritual Franciscans, and the defense of the exempt monastic orders' freedom from all but papal control. The stands he took were often remarkable in themselves: hostility to the expulsion of Jews and spirited defense of the Templars, for example. The book also traces the emergence of King Philip the Fair's (1285-1314) almost paranoid style of rule and its impact on church-state relations, which makes the expression of Jacques de Thérines's views all the more courageous.
